

SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION
FOR THE ADVANCEMENT OF SCIENCE.

FRIDAY, JULY 31, 1908

CONTENTS

<i>The Teaching of Mathematics for Engineers:</i> CHAS. F. SCOTT	129
<i>The Point of View in Teaching Engineering Mathematics:</i> PRESIDENT R. S. WOODWARD	134
<i>The Chicago Academy of Sciences:</i> FRANK C. BAKER	138
<i>The Lloyd Library and Museum</i>	141
<i>Lehigh University and the University of Liverpool</i>	141
<i>Scientific Notes and News</i>	142
<i>University and Educational News</i>	145
<i>Discussion and Correspondence:—</i>	
<i>Meaning of the Spanish Word Gavilan:</i> DR. C. HART MERRIAM	147
<i>Quotations:—</i>	
<i>Professors' Salaries</i>	147
<i>Scientific Books:—</i>	
<i>Spencer on The Falls of Niagara:</i> DR. G. K. GILBERT. <i>Yerkes's The Dancing Mouse:</i> PROFESSOR JOHN B. WATSON	148
<i>Special Articles:—</i>	
<i>The Essential Meaning of d'Alembert's Principle:</i> PROFESSOR FREDERICK SLATE. <i>Some Apple Leaf-spot Fungi:</i> DR. CARL P. HARTLEY. <i>A Cycad from the Upper Cretaceous in Maverick County, Texas:</i> PROFESSOR J. A. UDDEN	154
<i>Societies and Academies:—</i>	
<i>The Torrey Botanical Club:</i> PROFESSOR C. STUART GAGER	160

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y., or during the present summer to Wood's Hole, Mass.

THE TEACHING OF MATHEMATICS FOR ENGINEERS¹

MATHEMATICS, from the standpoint of the engineer, is a means, and not an end. It is an instrument or tool by which he may determine the value and relations of forces and materials.

The usefulness of tools depends upon the sort of work which is to be done, upon the kinds of tools which are available and upon the skill of the man who uses them. We may inquire, therefore, what are the uses to which the engineer may apply mathematics? What kind of mathematics does he need? And what skill should he possess in their use?

First, then, what work is to be done by the young men who are now taking engineering courses? A few—and only a few—will be original investigators or designers who will need mathematics as an instrument of research. A considerable number will regularly employ elementary mathematics in more or less routine calculations. Many will have little use for mathematics, as engineering courses are recognized as affording excellent training for various business, executive and other non-technical positions, particularly in connection with manufacturing and operating companies. It has been stated by the vice-president of a large electric manufacturing company that not over ten per cent. of the technical graduates employed by that
