A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION
FOR THE ADVANCEMENT OF SCIENCE.

FRIDAY, NOVEMBER 20, 1908

URANIUM AND GEOLOGY¹

CONTENTS

<i>Uranium and Geology</i> : PROFESSOR JOHN JOLY	697
<i>Abstracts from the Annual Report of the President of Cornell University</i>	713
<i>The Delos Arnold Collections of Natural History Specimens</i>	717
<i>The Department of Microscopy of the Brooklyn Institute of Arts and Sciences</i>	718
<i>The Association of Colleges in New England</i>	719
<i>The Winter Meeting of the American Chemical Society</i> : PROFESSOR CHAS. L. PARSONS	720
<i>Scientific Notes and News</i>	720
<i>President Eliot's Resignation</i>	724
<i>University and Educational News</i>	724
<i>Discussion and Correspondence</i> :—	
<i>The Training of Industrial Chemists</i> : DR. CHAS. S. PALMER. <i>Auroral Displays</i> : MAJOR W. E. ELLIS, DR. ALFRED SANG. <i>Recessive Characters</i> : PROFESSOR C. B. DAVENPORT	725
<i>Quotations</i> :—	
<i>The Presidency of the Massachusetts Institute of Technology; Burdens of College Presidents</i>	729
<i>Scientific Books</i> :—	
<i>Bailey and Coleman's First Course in Biology</i> : S. J. H. WHIPPLE on <i>Typhoid Fever</i> : DR. GEORGE BLUMER	730
<i>Special Articles</i> :—	
<i>Note on the Formulas for Energy stored in Electric and Magnetic Fields</i> : P. G. AGNEW. <i>A Vacuum Stopcock</i> : FREDERICK G. KEYES	734
<i>Societies and Academies</i> :—	
<i>The American Mathematical Society</i> : PROFESSOR F. N. COLE. <i>The New York Section of the American Chemical Society</i> : C. M. JOYCE	735

INTRODUCTION

IN our day but little time elapses between the discovery and its application. Our starting-point is as recent as the year 1903, when Paul Curie and Labord showed experimentally that radium steadily maintains its temperature above its surroundings. As in the case of many other momentous discoveries, prediction and even calculation had preceded it. Rutherford and McClung, two years before the date of the experiment, had calculated the heat equivalent of the ionization effected by uranium, radium and thorium. Even at this date (1903) there was much to go upon, and ideas as to the cosmic influence of radio-activity were not slow in spreading.²

I am sure that but few among those whom I am addressing have seen a thermometer rising under the influence of a few centigrams of a radium salt; but for those who pay due respect to the principles of thermodynamics, the mere fact that at any moment the gold leaves of the electroscope may be set in motion by a trace of radium, or, better still, the perpetual motion of Strutt's "radium clock," is all that is required as demonstration of the cease-

¹ Address of the president of the Geological Section of the British Association for the Advancement of Science, Dublin, 1908.

² See letters appearing in *Nature* of July 9 and September 24, 1903, from the late Mr. W. E. Wilson and Sir George Darwin referring to radium as a solar constituent and one from the writer (October 1, 1903) on its influence as a terrestrial constituent.
