## THE JOSEPH LEIDY LECTURE

INTRODUCTION BY THE PROVOST OF THE UNIVERSITY OF PENNSYLVANIA

JOSEPH LEIDY was a son of the University of Pennsylvania. As a token of reverence and affection his devoted nephew and namesake, Joseph Leidy, Jr., has generously endowed the Joseph Leidy Memorial Lectureship for the extension of scientific knowledge through the medium of lectures by eminent specialists.

To-night, we meet to inaugurate this foundation. Of Dr. Leidy, the great student and teacher, whom many of us knew and deeply honored, I would say:

"The wisest man could ask no more of fate  
Than to be simple, modest, manly, true,  
Safe from the many, honored by the few;  
Nothing to count in world, or church, or state,  
But inwardly in secret to be great;  
To feel mysterious nature ever new,  
To touch, if not to grasp, her endless clue,  
And learn by each discovery how to wait,  
To widen knowledge and escape the praise;  
Wisely to teach because more wise to learn;  
To toil for science, not to draw men's gaze,  
But for her love of self denial stern;  
That such a man could spring from our decays  
Fans the soul's nobler faith until it burn."

EDGAR F. SMITH

## A TRIBUTE TO JOSEPH LEIDY<sup>1</sup>

JOSEPH LEIDY was a Philadelphian by his birth, by his career and by his death, and no citizen of this metropolis has more deserved public honor than he.

Leidy was born September 9, 1823, and died April 30, 1891. His first scientific paper was published in 1845, and his last
