MEMORIAL ON THE FOUNDATION OF AN INTERNATIONAL CHEMICAL INSTITUTE¹

CONTENTS

<i>Memorial on the Foundation of an International Chemical Institute:</i> PROFESSOR WILHELM OSTWALD	147
<i>The Man of Pittdown:</i> PROFESSOR GEORGE GRANT MACCURDY	158
<i>The Production of Coal in 1913</i>	160
<i>The Rockefeller Institute for Medical Research</i>	161
<i>Scientific Notes and News</i>	162
<i>University and Educational News</i>	165
<i>Discussion and Correspondence:—</i>	
<i>Tin Disease and Polar Exploration:</i> B. T. BROOKS. <i>Cubist Science:</i> J. F. A. MO- tions of the Atmosphere: PROFESSOR CLEVE- LAND ABBE	166
<i>Scientific Books:—</i>	
<i>Stevens on the Fungi which cause Plant Disease:</i> DR. F. D. HEALD. <i>Jones's The New Era in Chemistry:</i> PROFESSOR EDWARD C. FRANKLIN. <i>Thomson on Rays of Positive Electricity and their Application to Chemical Analysis:</i> PROFESSOR R. A. MILLIKAN.	168
<i>Special Articles:—</i>	
<i>Desiccation of Certain Gregarine Cysts:</i> PROFESSOR MAX M. ELLIS. <i>Semi-permeable Capsules:</i> WILLIAM W. BROWNE AND DAVID SOLETSKY	174
<i>Societies and Academies:—</i>	
<i>The Wisconsin Academy of Sciences, Arts and Letters:</i> ARTHUR BEATTY. <i>The Kentucky Academy of Science:</i> GARNETT RYLAND. <i>New Orleans Academy of Science:</i> DR. R. S. COCKS	177

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

GENERAL

THE recent foundation with such exceptional rapidity and unanimity of the International Association of Chemist Societies shows that chemistry, as a science, has advanced to a position where unregulated individual efforts are no longer sufficient and must be replaced by organizing the efforts of all chemists.

The participants in that formative meeting held in Paris toward the end of April, 1911, had not given the subject much previous thought, nevertheless even in this preliminary discussion a large number of undertakings of general interest were mentioned which showed how keenly the need of organizing all chemist activities is felt.

Such possible and necessary undertakings of general value discussed in the proceedings are:

1. The uniformity of nomenclature of chemist substances.
2. The inclusion of the international committee of atomic weights in the Association of Chemist Societies.
3. Uniformity in the nomenclature of physics and chemist constants.
4. Conformity in the editing of tables of contents of chemist publications.
5. A standardization of the writing of abstracts and other reviews of the new publications in chemistry.
6. The preparation of an international auxiliary language for publications of universal interest.
7. Standardization of the size of publications.
8. Arrangements for limiting the printing of an article in different publications.
9. Preparation of a chemist thesaurus in which
