## CONTENTS

<i>Reminiscences of the Woods Hole Laboratory of the Bureau of Fisheries: PROFESSOR EDWIN LINTON</i> .....	737
<i>The International Engineering Congress</i> ....	753
<i>Edith Jane Claypole</i> .....	754
<i>Scientific Notes and News</i> .....	754
<i>University and Educational News</i> .....	757
<i>Discussion and Correspondence:—</i>	
<i>Balanced Solutions and Nutritive Solutions: DR. JACQUES LOEB. The Typical Case Exemplified: X. A Typical Case: S. L. MACDONALD</i> .....	757
<i>Scientific Books:—</i>	
<i>Keen on Animal Experimentation and Medical Progress: PROFESSOR FREDERIC S. LEE. Rosenhain's Introduction to the Study of Physical Metallurgy: PROFESSOR W. CAMPBELL</i> .....	760
<i>Special Articles:—</i>	
<i>The Temporal Fossæ of Vertebrates in relation to the Jaw Muscles: DR. W. K. GREGORY AND L. A. ADAMS</i> .....	763
<i>The American Association for the Advancement of Science:—</i>	
<i>Section D—Mechanical Science and Engineering: PROFESSOR ARTHUR H. BLANCHARD</i>	765

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

## REMINISCENCES OF THE WOODS HOLE LABORATORY OF THE BUREAU OF FISHERIES, 1882-89<sup>1</sup>

ON February 9, 1871, a law was passed by Congress which directed the President to appoint a man of approved scientific and practical knowledge of fish and fisheries, to be chosen from among the civil officers of the government, who was to serve as U. S. Commissioner of Fish and Fisheries without additional salary.

This act virtually defined Spencer F. Baird, secretary of the Smithsonian Institution, who thereupon was appointed commissioner by the President. The commissioner was clothed with unusual powers; for the act instructed the heads of the various executive departments to render the commissioner such assistance as might lie in their power. Frequent acknowledgments of the cooperation of the departments of the treasury, war, interior and navy are found in the earlier reports of the Fish Commission.

The immediate problem before the commissioner was: An inquiry into the decrease of food fishes. It is interesting to note that Professor Baird chose Woods Hole as the place for beginning research on this problem. That was in the summer of 1871. Those associated with him were Professors A. E. Verrill, Theodore N. Gill and Sydney I. Smith.

The headquarters in 1872 were at Eastport, Maine; in 1873 at Portland, Maine; in 1874 at Noank, Connecticut; in 1875 again at Woods Hole. During the year
