## CONTENTS

<i>The American Association for the Advancement of Science:—</i>	
<i>The Message of the Biologist:</i> PROFESSOR WILLIAM PATTEN .....	93
<i>On Nipher's "Gravitational" Experiment and the Anomalies of the Moon's Motion:</i> DR. F. W. VERY .....	102
<i>Frank Perkins Whitman</i> .....	105
<i>Horatio C. Wood</i> .....	106
<i>Scientific Events:—</i>	
<i>Water Power and Dartmoor; Medical Education; Scientific Lectures; The Illinois Academy of Sciences; Gift to the National Academy of Sciences and the National Research Council</i> .....	107
<i>Scientific Notes and News</i> .....	110
<i>University and Educational News</i> .....	112
<i>Discussion and Correspondence:—</i>	
<i>Official Field Crop Inspection:</i> FRANK A. SPRAGG. <i>Science and Politics:</i> PROFESSOR T. D. A. COCKERELL .....	113
<i>Quotations:—</i>	
<i>The Dues of the American Association for the Advancement of Science and the Salaries of Scientific Men</i> .....	115
<i>Scientific Books:—</i>	
<i>Ostwald on the System of the Sciences:</i> PROFESSOR WILLIAM A. NOYES .....	116
<i>Special Articles:—</i>	
<i>Drought and the Root-system of Eucalyptus:</i> JAMES MCMURPHY AND GEORGE J. PEIRCE. <i>The Mathematical Association of America</i> ..	118 120

## THE MESSAGE OF THE BIOLOGIST<sup>1</sup>

It is eminently fitting that we biologists, like virile swarm spores, should periodically come together in a holiday spirit of mutual exchange, and after giving and receiving our messages, go back to our life work, reinvigorated and reoriented, to prepare for another brief period of social conjugation.

The messages we send to one another will have little carrying power, and little influence on the receiver, if they are not specific in content, limited in scope, and securely wrapped up in the precise technical terms of our own familiar code.

On the other hand, the biologist would be wholly lacking in social instincts if he failed to recognize that he also has a more comprehensive message for the layman, who is largely dependent on the biologist for his working knowledge of the great domain of nature-life, and by whom the biologist is provided with the necessary means of existence.

This larger message must have a different vehicle. It must first be summarized, digested and metabolized into the vernacular, before it can circulate through the body of social life, reach its terminals, and there accomplish its strengthening and rectifying purpose.

We may well ask ourselves whether we have such a message to give, and if so, what it is, and who, or what, is our authority. And by "we," I now mean all of us, not merely the biologist, but the astronomer, geologist, chemist, physicist and psychologist, for we are what we are to-day because of the underlying community of our methods and purposes, and because, in our concept of evolution, we acknowledge the same mental sovereignty.

This concept, of which we are the trustees,

MSS. intended for publication and books, etc., intended for review should be sent to The Editor of Science, Garrison-on-Hudson, N. Y.

<sup>1</sup> Address of the vice-president and chairman of Section F, Zoology, American Association for the Advancement of Science, St. Louis, January 31, 1919.
