

that one English monarch for whom he had a reverential regard was Henry VI. He saluted his statue whenever he crossed the lawn at King's College, Cambridge. In the fifteenth century it was possible to spend money on wars in France or on the founding of monasteries, but Henry chose to found King's College. And to encourage learning was still the surest way to secure that one's name was held in honor through grateful generations.

DURING the past year the Bureau made a statistical canvass of the fisheries of the South Atlantic and Gulf States for the year 1918, and the returns for the latter section have recently been compiled and sent to press as Statistical Bulletin No. 470. The last previous canvass of these states by the Bureau was for the year 1902, and a later canvass was made by the Bureau of the Census for the year 1908. The statistics for the Gulf States cover the fisheries of the west coast of Florida and Alabama, Mississippi, Louisiana and Texas. In 1918 there were 14,888 persons employed in the fisheries of these states; the investment amounted to \$6,537,859; and the products aggregated 130,923,583 pounds, having a value of \$6,510,310. Of this total, the west coast of Florida produced 54,753,639 pounds, valued at \$3,420,363; Alabama, 5,609,219 pounds, valued at \$230,567; Mississippi, 20,592,089 pounds, valued at \$762,770; Louisiana, 24,953,876 pounds, valued at \$1,419,367; and Texas, 25,014,760 pounds, valued at \$677,243. #### ROAD-BUILDING PROJECTS WITH FEDERAL AID

THE rate at which the number of Federal-aid road-building projects has increased since the war is shown in a summary relating to all such work from September 30, 1916, to April 30, 1920, which has been prepared by the Bureau of Public Roads, United States Department of Agriculture. On the latter date the states had filed with the bureau 2,885 project statements, of which 2,790 had been approved, representing 27,796 miles of highway. The totals on April 30, 1919, were little more than one third these amounts. Up to May 1 of this year 1,974 projects had proceeded to the stage at which plans, specifications, and estimates had been delivered to the Bureau of Public Roads. The plans, specifications and estimates of 1,827 of these had been recommended for approval, representing 13,845 miles.

Project agreements had actually been executed and construction work was in progress on 1,569 projects, totaling 11,987 miles. In addition, work had been begun on about 100 projects for which agreements had not actually been signed, thus expediting the progress of the work and bringing the total mileage under construction up to 13,540. The summary shows that a great reduction has been made in the time required for preliminary work before the actual construction is begun.
