THE POPULATION OF THE UNITED STATES

THE Bureau of the Census has announced the population of the United States in 1920 as 105,682,108, exclusive of colonial possessions. This shows an increase of 13,710,842 since 1910, or a percentage gain of 14.9. The increase in the previous decade, between 1900 and 1910, was from 75,994,575 to 91,972,266, a percentage gain of 21 and a numerical increase of 15,977,691. The population of outlying possessions will be made public as soon as the figures for Alaska and the military and naval units abroad have been compiled. With these figures included, it is estimated that the colonies have 12,250,000 inhabitants, making the total population of the nation approximately 118,000,000.

The ranking of the states in 1920 and 1910 and their populations for these years, follow:
