

the interest of which will sustain a working memorial to General Gorgas, whose genius stamped out yellow fever and malaria in Cuba and Panama, and who taught us how to control those diseases.

3. The memorial is to be known as the Gorgas Memorial Institute of Tropical and Preventive Medicine, and will take the form of a research laboratory and a teaching institute in Panama for those branches of medicine.

4. The headquarters of this institute will be presided over by a board of scientific directors, of which Professor Richard P. Strong, of Harvard University, has been selected as the first director. The institute will be located in Panama on a beautiful site on the shore of the Pacific, which was formerly in the exposition grounds of the city of Panama. The site was donated by the Republic of Panama, and President Porras, backed by the citizens of Panama, has guaranteed the initial buildings.

5. It is the plan of the directors of the institute to raise the sum of five million dollars, which will be invested in trust securities, and only the interest of which is to be used to carry on the purposes of the organization.

6. The board of directors is composed of the following named men:

Honorary president, president of the United States.

Dr. Belisario Porras, president, Republic of Panama.

Surgeon General Merritte W. Ireland, United States Army, Washington.

Surgeon General Hugh S. Cumming, United States Public Health Service.

Dr. Seale Harris, president of the Southern Medical Association.

Mr. Bernard Baruch, New York.

Mr. W. P. C. Harding, president of the Federal Reserve Bank, Boston.

Mr. Fred W. Upham, president, Consumers' Company, Chicago.

Dr. W. H. G. Logan, professor of oral surgery, Chicago College of Dental Surgery.

Dr. Gilbert Fitz-Patrick, chairman of the board of control, American Institute of Homeopathy, Chicago.

Dr. Leo S. Rowe, director-general, Pan American Union, Washington.

Surgeon General Edgar R. Stitt, United States Navy, Washington.

Brig. Gen. Robert E. Noble, Surgeon General's Library, Washington.

Hon. R. J. Alford, Panaman minister, Washington, D. C.
Judge John Bassett Moore, Court of International Justice, The Hague.

Mr. Samuel Gompers, president of the American Federation of Labor.

Brig. Gen. Charles G. Dawes, president of the Central Trust Company of Illinois.

Mr. Adolph Ochs, editor, New York *Times*, New York.

Dr. Frank Billings, Chicago.

Vice-president and chairman of Board of Directors, Dr.

Franklin H. Martin, director-general, American College of Surgeons.

THE ROOSEVELT WILD LIFE FOREST EXPERIMENT STATION

THE Roosevelt Wild Life Forest Experiment Station, Syracuse, N. Y., recently received a valuable gift in the form of an exhibit showing in 14 stages the preparation of Hudson seal or seal-dyed muskrat from the raw skin to the fully dyed fur. This exhibit is enclosed in a polished mahogany case, 20 feet long, with plate glass front, and with electrical illumination. The whole exhibit is beautifully executed. This gift was made by A. Hollander & Son, of Newark, N. J., the leading dyers of this fur, and through the friendly services of Mr. Max Herskovitz, of Alfred Herskovitz and Son, New York City.

Mr. Edward R. Warren, fur naturalist of the station, is continuing his investigations of the beaver in the Yellowstone National Park, begun in 1921. He is aided by Mr. James E. Mills, a volunteer assistant. These studies have been made possible by the gift of the services of these men and by funds from members of the Board of Trade of the Fur Industry of New York City. The cooperation on the part of these men of the fur industry is a part of their program to encourage research and conservation of fur-bearing animals, as they realize that the permanence of the industry depends upon a sustained yield of raw fur.

Mr. Aretas A. Saunders, field ornithologist, has devoted the summer to a study of the breeding grounds of ducks in western New York. His report on the birds of the Alleghany State Park has just been published in the *Roosevelt Wild Life Bulletin*.

Dr. Charles E. Johnson, formerly fur naturalist of the station, who made a study of the Adirondack beaver for the station in 1921, has devoted the summer to a study of the status of muskrat in western New York. Dr. Johnson, recently of the University of Kansas, has accepted a professorship in the department of forest zoology in the New York State College of Forestry.

Dr. William C. Kendall, ichthyologist, assisted by W. A. Dence and W. P. Osborn, continued his investigation of the trout of the Cranberry Lake region in the western Adirondacks which is being made in cooperation with Commissioner Alexander Macdonald, of the N. Y. State Conservation Commission. These are the finest trout waters in the Adirondacks.
