

“Pointolite” Lamps

produce an intensely brilliant white light from a very small source, and therefore are especially suited for use with microscopes, reflecting galvanometers, oscillographs and other optical instruments—as well as for photographic and projection work.

30 c. p.
“Pointolite”
for galvanometers.

They require no attention when in operation.

D. C. lamps of 30, 100, 500 and 1000 c. p. and an A. C. lamp of 150 c. p. are available, together with control resistance boxes necessary for each.

Leitz Laboratory and Student MICROSCOPE MODEL "L-10"

Price Reduced

The present reduction in price of the acknowledged standard microscope for medical college use coupled with the Educational Discount allowed to medical students and universities, will act as a stimulus to all medical students to possess their own microscopes.

The Leitz Microscopes Model "L-10" now with the price as low as others, and the recognized surpassing quality will result in an economy that no purchaser can afford to ignore.

The quality and accuracy of Spindler & Hoyer instruments is well exemplified in this small seismograph. Based on the Wiechert astatic seismograph, it is in every way as reliable as the larger instrument, except that the stationary mass is smaller, weighing from 80 to 200 kilos instead of 1000 kilos. The sensitiveness is of course correspondingly reduced. The instrument is eminently suitable for most colleges, universities and observatories.

The recording attachment is so arranged that even in the case of a powerful shock, it will not get out of order. Shocks of as high as 8 on the Rossi-Forel scale do not disturb it.

We are prepared to make quick delivery of this instrument, since we have a number in stock in this country. Do you want further information? Dept. SC is entirely at your service.
