Annual Subscription, \$6.00. Single Copies, 15 Cts.

SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

Entered as second-class matter July 18, 1923, at the Post Office at Lancaster, Pa., under the Act of March 3, 1879.

ADDRESS AT THE EDWARD HART CELEBRATION¹

THIS is a grand occasion, yes, that and much more! And those gathered here are happy. Especially is this true of the chemists in the audience, because it is one of their guild whose completion of the fiftieth milestone in his career as teacher, investigator, printer and manufacturer is at hand, and they proudly rejoice for

Judge him by no more than what you know
Ingenuously, and by the right laid line
Of truth, he will indeed all styles deserve
Of wise, just, of good and true!

But they who've so affectionately arranged this assemblage advised the speakers of the hour to tell something of chemistry in America. Heeding this injunction—free to descant on any phase of the huge, all-embracing subject—this particular speaker, craving your sympathetic indulgence, will hie him back—pretty far back—into the past, for there are some things which “if gathered from the ashes of obscurity” prove interesting, illuminating and worth while.

The wily Subtle, in Ben Jonson's “Alchemist,” shrewdly said:

All arts have still had, Sir, their adversaries;
But ours the most ignorant,—

True! For there were innumerable, unconscionable charlatans among the professors and practitioners of the alchemic art, whose shameful practices brought the craft into general disrepute. They were the *adversaries* of the simple, sincere devotees who had learned to scorn delights and live laborious days in search of the all-powerful transmuting agent, yet not blind to other new and marvelous changes occurring in their crude, primitive furnaces. Nor did these enthusiasts live in European lands alone. They existed here in America. We who've taught chemistry probably never knew this. We imagined that our science, freed from its early shackles of ignorance, and superstition, proudly stalked through the land untouched, untainted by those “close deeds of darkness, that shun the light!”

No, it is recorded that John Winthrop, the younger, erstwhile governor of Connecticut, living in New London, somewhere in the late sixteen hundreds, used to resort with his servant to Governor's Ring—a

¹ Address delivered on the occasion of the Edward Hart celebration at Lafayette College, October 16, 1924.

Marine Biological Laboratory Woods Hole, Mass. Biological Material

1. ZOOLOGY. Preserved material of all types of animals for class work and for the museum.
2. EMBRYOLOGY. Stages of some invertebrates, fishes (including Acanthias, Amia and Lepidosteus), Amphibia, Reptiles and some mammals.
3. BOTANY. Preserved material of Algae, Fungi, Liverworts, Mosses, Ferns and Seed Plants.
4. MICROSCOPE SLIDES in Bacteriology, Botany and Zoology.
5. LIFE HISTORIES, Germination Studies and Natural History Groups.

meet a definite need in Educational, Research and Industrial Laboratories.

By means of sliding-contacts the resistance values can be varied from zero to full rating, in exceedingly small steps.

We find greatest demand for Rheostats with tubes 16" long, as illustrated above.
Write for Descriptive Bulletin S104.

JAMES G. BIDDLE, PHILADELPHIA
1211-13 ARCH STREET

LANGMUIR

Mercury Condensation
High Vacuum Pump.

Glass Design

This pump is specially designed for College, University and Experimental Laboratories. It is made entirely of Pyrex glass and is intended for use where the higher speed and greater volume obtainable with the all-metal Langmuir Pump is not needed. It will produce a vacuum of .000002 mm. of mercury quite readily, at a speed of 500 to 600 c.c. per second. Some form of backing pump must be used, and for this purpose a vacuum of 0.1 mm. or lower is recommended. A special mercury heater is available.

Bulletin 1035-S gives particulars and prices.

"C. P. HAS IT!"

Let us demonstrate what C. P. Service is. Send a list of your current requirements to Dept. S.C.C.

If you are in need of filter paper, glassware, a new balance—or a photometer of unusual accuracy—"C. P. Has It." We are able to meet your requirements in all routine laboratory supplies, reagents and apparatus, but we wish to place particular emphasis on our unequalled stock of rare chemicals and metals, and highly specialized apparatus and instruments. When you want the latest and best in anything required for your laboratory whether it be a monochromator, or an unusual reagent—remember that "C. P. Has It!"

New Leitz Combination Microscope

In Stock for Immediate Delivery

STAND "ABM"

The Latest Research Model for Binocular and Monocular Vision

Leading microscopists consider it the ideal instrument for research investigations

FEATURES—

1. In general design it is similar to our large Research Stand "AA."
2. Binocular and Monocular Body Tubes can be very easily interchanged and attached by eccentrically acting lever-clamp.
3. The Nosepiece adapter is mounted independent of the tubes; objectives remain permanently centered, irrespective of which tube is used.
4. With the Binocular Body Tube attached the stand is in every respect equal to our "Mon-Objective Binocular" Microscope.
5. With the Monocular Body Tube attached it is identical with our Research Stand "AA," available for Photo-Micrography.

With this achievement Leitz has scored another success as originator of new microscope models of the "Leitz Quality of optical and mechanical workmanship." "Leitz Quality" is beyond comparison, it is accepted as "Supreme."

Pamphlet No. 0-1022 will be forwarded upon request

Microscope "ABM" with Binocular Body Tube attached.

U. S. Patent No. 1,448,592.

Agents for Western States—California, Washington, Oregon, Idaho, Utah, Montana and Arizona:

“BECBRO”

LABORATORY SLIDE RHEOSTATS

We carry a large stock of the Sliding Contact Rheostats—wound upon Enameled covered tubes (lengths of 8", 16" & 20") and also wound upon rectangular stone pieces (lengths of 9" & 16").

Also rheostats of the Carbon Compression Type for use in the very fine and uniform regulation of current. Four (4) sizes carried in stock with ratings of 250, 1000, 1500 & 3000 Watts.

Rheostats of Special size and construction made according to specifications submitted to us.
