

Psychology without the 'ism

## The Field of PSYCHOLOGY—1924

By MADISON BENTLEY, Ph.D.,

*Professor of Psychology and*

*Director of the Psychological Laboratories*

*University of Illinois*

*The Field of Psychology* is designed to orient the trained individual outside the subject as well as to inform the student of psychology. To the man of science, venturing outside of his own *Fach*, a new "ism" offered in a foreign discipline may, for the want of guidance, appear as plausible and as generally representative as a seasoned body of facts and principles. The credulity frequently displayed by physicists and biologists in alleged instances of "telepathy," "clairvoyance" and "mediumship" illustrates the difficulty of sound and authentic judgment in matters beyond one's specific training.

*The Field of Psychology* maintains that a catholic survey "calls" for the most rigorous criticism and for the most unsparing rejection on every side; that it means the salvage of all that is worth keeping from the psychological labors and laboratories of Europe and America; but that it implies as well the extraction of whatever is *psychologically* substantial in Freudian doctrine, in behaviorism, in phenomenology, in the alleged arts of "testing intelligence," in the attractive doctrine of the *Gestalt*, and in all the other products and proposals of recent years. It appeals as little as possible to dogmas and theories; and it avoids as much as possible the neighborly distractions and allurements of biology, sociology, education and medicine.

Of special interest to the physicist and the physiologist will be the author's critical comparison of observation and measurement in psychology and in the physical sciences (Chapters II, IX, XVII), the descriptive analysis of understanding and discovery (Chapters XIV, XV), and the socialization and development of the total or psychological organism (Chapters XVIII-XX).

545 Pages. Cloth, price \$3.50

## A BIBLIOGRAPHY OF American Natural History

THE PIONEER CENTURY, 1769-1865

The Role Played by the Scientific Societies; Scientific Journals; Natural History Museums and Botanic Gardens; State Geological and Natural History Surveys; Federal Exploring Expeditions in the Rise and Progress of American Botany, Geology, Mineralogy, Paleontology and Zoology.

By MAX MEISEL, B.S., B.L.S.

Formerly of the Science Division, N. Y. Public Library

Volume I.—An Annotated Bibliography of the Publications Relating to the History, Biography and Bibliography of American Natural History and its Institutions, during Colonial Times and the Pioneer Century, which have been published up to 1924; with a Classified Subject and Geographic Index; and a Bibliography of Biographies.

245 p. Cloth. \$5 net postpaid.

## THE LAMOTTE H-ION TESTING SET

(Model 3B)

*Rapid, Accurate, Simple*

A complete, portable outfit for determining the pH values of a wide range of substances. Especially valuable where only a small amount of the material is available for testing purposes. Simple in operation and produces results which are accurate to 0.1 pH.

All the necessary equipment is compactly arranged in a mahogany case which may be carried conveniently, thus permitting accurate work in the field as well as in the laboratory. Descriptive pamphlet sent on request.

We carry a complete line of Indicator Dyes, Buffer Salts, etc., for use in the determination of H-Ion Concentration, as well as many other standardized chemicals.

Our new illustrated catalog, containing full information concerning "LaMotte Standards," sent on request.

## FURFURAL

### AS A BIOLOGICAL REAGENT

FURFURAL is an excellent preservative for Biological Specimens.

FURFURAL can be more conveniently used as an injection fluid than the usual preparations.

FURFURAL has many other uses of importance to the Biologist. See "Furfural as a Biological Reagent", by Prof. C. E. Tharaldsen, Science, Vol. LVII, page 305, March 9, 1923.

*A pamphlet on Furfural will be sent on request.*

## JAGABI RHEOSTATS

meet a definite need in Educational, Research and Industrial Laboratories.

By means of sliding-contacts the resistance values can be varied from zero to full rating, in exceedingly small steps.

We find greatest demand for Rheostats with tubes 18" long, as illustrated above.

**LANGMUIR**

Mercury Condensation  
High Vacuum Pump.

Glass Design

This pump is specially designed for College, University and Experimental Laboratories. It is made entirely of Pyrex glass and is intended for use where the higher speed and greater volume obtainable with the all-metal Langmuir Pump is not needed. It will produce a vacuum of .000002 mm. of mercury quite readily, at a speed of 500 to 600 c.c. per second. Some form of backing pump must be used, and for this purpose a vacuum of 0.1 mm. or lower is recommended. A special mercury heater is available.

Bulletin 1035-S gives particulars and prices. Write for Copy
