SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

Entered as second-class matter July 18, 1923, at the Post Office at Lancaster, Pa., under the Act of March 3, 1879.

SOME EFFECTS OF THE ATMOSPHERE UPON PHYSICAL MEASUREMENTS¹

It has, I believe, been the custom for the retiring vice-president to address the section either upon the subject of his own research interests or upon recent progress or problems connected with some special field of his science. With your permission, I will to-day depart from this custom by adopting the rôle of a revivalist and delivering an exhortation. In one respect at least I feel that I possess the necessary qualifications for the part, since it is well recognized that the most effective exhorters are those repentant sinners who know, from personal experience, whereof they speak.

I take, as my text, the evil influences of a vagrant atmosphere upon physical measurements. This requires some explanation since the term atmosphere has several different connotations.

In the first place, we have that somewhat vague and impalpable atmosphere which is determined by the intellectual conditions surrounding an investigator and is ordinarily referred to as the research atmosphere of the institution.

Secondly, we have the insidious influences of meteorological conditions, temperature, barometric pressure and humidity, upon the physical and mental well-being of an observer and hence upon his ability to make accurate and trustworthy observations.

Thirdly, these same insidious influences frequently affect the properties of materials to an extent sufficient to cause the measuring instruments of the investigator to behave in a way no self-respecting piece of apparatus should and he is consequently put to all kinds of trouble in his efforts to combat them.

Each of these various types of atmospheric influences is important enough to be worthy of an essay, but none of them forms the topic of to-day's sermon. Instead, I shall direct your attention to certain effects of the physical atmosphere which sometimes result in causing an investigator to be under the delusion that he is measuring or utilizing one quantity when as a matter of fact he is dealing with something, not greatly perhaps but still appreciably different. I do not expect to tell you anything new. No revivalist in good standing would be expected to do that. In so far as any of us may have been guilty of backsliding it is because we have been immoral, not unmoral;

¹ Address of the vice-president and chairman of Section C—Chemistry, American Association for the Advancement of Science, Washington, D. C., December, 1924.

Cleveland, Ohio

NEW LABORATORIES AND HOSPITALS

RESTRICTED CLASSES

THOROUGH INSTRUCTION

LARGE CLINICAL FACILITIES

HIGH STANDARD OF SCHOLARSHIP

Admission confined to students having academic degrees and to Seniors in Absentia.

For information address:

THE REGISTRAR

2109-15 Adelbert Rd.

CLEVELAND

Johns Hopkins University Medical School

The Medical School is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with at least two years' instruction, including laboratory work in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to 75 students, men and women being admitted on the same terms. Except in unusual circumstances, applications for admission will not be considered after July 1st.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill our requirements and present exceptional qualifications.

INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION

The charge for tuition is \$300 per annum, payable in three installments. There are no extra fees except for rental of microscope, certain expensive supplies, and laboratory breakage.

The annual announcement and application blanks may be obtained by addressing the

Dean of the Johns Hopkins Medical School,
Washington and Monument Sts., Baltimore, Md.

Summer Work for Graduates in Medicine

Beginning Monday, June 1st, and ending Saturday, July 11th, a course in medical diagnosis, including laboratory exercises in clinical pathology and demonstrations in pathological anatomy, will be offered. The course will be limited to thirty students, fee \$100. Applications should be made to the Dean's Office.

BOSTON UNIVERSITY SCHOOL OF MEDICINE

ORGANIZED IN 1873

ANNOUNCEMENT

may be obtained by application to

WESLEY T. LEE, M.D., Registrar
80 East Concord Street,
Boston, Massachusetts.

MUSEUM JARS OF STANDARD SIZES

These Museum Jars are supplied with ground-on lids for permanent sealing and are of clear white glass of extra fine finish. The annealing is most perfect and breakage in storage and in museums, due to sudden temperature change, is reduced to a mere minimum.

The sizes listed have been recommended by competent authorities, and include sixteen sizes as are used in the U. S. Army Medical Museum.

No. 3712—Jars, Museum, Rectangular, as described:

Size No.	1	2	3	4	5	6	7	8	9	10	11
Height, cm.	5	10	15	15	15	16	20	20	20	20	22
Width, cm.	5	4.5	8	10.5	15	10	8	13	15	13	15
Depth, cm.	3	3	5	5	9	8	4.5	8	10	13	5.5
Size No.	12	13	14	15	16	17	18	19	20	21	22
Height, cm.	25	25	22.5	25	26	30	30	31	34	36	42
Width, cm.	22	25	17.5	25	15	20	25	29	25	15	10.5
Depth, cm.	10	12	9	14	8	17.5	6	11	12	10	7.5
Size No.	23	24	25	26	27						
Height, cm.	50	40	30	65	40						
Width, cm.	25	30	50	30	40						
Depth, cm.	12	25	15	20	25						

We suggest that you send us a list of your requirements and upon receipt of same, we will submit our estimate.

Write for Pamphlet No. 0.171
