SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

Entered as second-class matter July 18, 1923, at the Post Office at Lancaster, Pa., under the Act of March 8, 1879.

## PRELIMINARY ANNOUNCEMENT OF THE KANSAS CITY MEETING OF THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

### INTRODUCTORY NOTE

THIS special issue of SCIENCE, which contains the preliminary announcements of the Kansas City meeting of the American Association for the Advancement of Science, is sent to all subscribers for *The Scientific Monthly* as well as to subscribers for SCIENCE, thus reaching all members of the Association. The announcements contain as much information about the approaching meeting as could be brought together at the time of going to press. The complete program of the meeting will be distributed at the registration office in the Aladdin Hotel at Kansas City. The office will open at 9 on Monday, December 28, and will remain open throughout the following days of the meeting. Members who do not attend the meeting may receive the general program if they will write to the permanent secretary asking for it. Such requests should be in the Washington office by December 22nd.

The importance of scientific thinking and of the results of scientific research in the lives of all the people are being rapidly more thoroughly appreciated in recent years. There has never been a period in which the leadership and the great responsibility

Those expecting to attend the Kansas City meeting should look up transportation and arrange for rooms at once. A list of Kansas City hotels has been published in SCIENCE for November 13th. Those who are to present papers or addresses at the meeting should send in their manuscripts for the publicity service as soon as possible.

When purchasing transportation to Kansas City be sure to secure a certificate for the meeting of the American Association for the Advancement of Science and Associated Societies, unless a round-trip ticket is purchased. On arrival at the meeting register the certificate or round-trip ticket promptly on a registration card. The validated certificate will entitle the holder to a half-fare rate for the return trip.

## COLEMAN & BELL

Laboratory Reagents Are Dependable!

Our List Includes:

C. P. Inorganic Chemicals  
C. P. Organic Chemicals  
Chemical Indicators (dry), Including  
Hydrogen Ion Indicators of  
Clark & Lubs and Sorensen  
Biological Stains (dry)  
Reagents and Solutions—  
Stains in Solution  
Indicators in Solution  
Blood Reagents  
Diagnostic Reagents  
Fixing Solutions  
Mounting Media  
Volumetric Solutions  
Test Papers

Coleman & Bell Products may be secured from the principal dealers in laboratory supplies in the United States and in Foreign Countries, or may be ordered direct. Catalogue sent upon request.

**THE COLEMAN & BELL COMPANY**

(Incorporated)

*Manufacturing Chemists*

Norwood, Ohio, U. S. A.

## ELECTRICAL MEASURING INSTRUMENTS

FOR PHYSICISTS AND  
PHYSICAL CHEMISTS

EQUIPMENTS SUITABLE FOR RESEARCH  
AND INDUSTRIAL LABORATORIES

*We Solicit Inquiries*

**LEEDS & NORTHRUP CO.**

PHILADELPHIA

### JAGABI RHEOSTATS

meet a definite need in Educational, Research and Industrial Laboratories.

By means of sliding-contacts the resistance values can be varied from zero to full rating, in exceedingly small steps.

We find greatest demand for Rheostats with tubes 16" long, as illustrated above. Write for Descriptive Bulletin S1040.

**JAMES G. BIDDLE, PHILADELPHIA**  
1211-13 ARCH STREET

**WESTON Engineers**  
*bring a truly Scientific Instrument into general use*

**A** TWO-INCH radio panel voltmeter, Model 506, extremely small and compact and of the usual high quality and workmanship throughout, is now presented to the electrical measuring world by Weston marking a distinct advance in small meter construction. This new Model is made for panel mounting with a special clamp fitting from the rear of the panel so that it can be quickly and securely installed.

Its extremely high internal resistance (125 ohms per volt) causes an insignificant drain upon the "B" battery. This is also an especially noteworthy feature when tubes are operated with dry cells.

Model 506 is furnished in three types—Single Range (with two binding posts) 3-5-7-8-10-15-50 or 150 Volts; Double Range (with three binding posts with push button) 125/5-140/7 or 150/7.5 Volts and Double Range (with four binding posts without push buttons) 125/5-140/7 or 150/7.5 Volts.

These types make it possible to fill the demand for a voltmeter which will indicate one filament voltage or one or more filament voltages and "B" battery voltage. Diagrams and complete information are furnished.

Model 506 is a really scientific instrument of a new and unique design, produced at a cost within the reach of everyone.

## BINOCULAR STEREO MAGNIFIERS

Large Field,  
Stereoscopic  
Vision, Long  
Working  
Distance

### Model "BSM-F"

Adapted in an  
ideal manner for  
use in:

ANATOMY  
BOTANY  
EMBRYOLOGY  
HISTOLOGY  
ZOOLOGY  
and  
Allied Studies.

Interchangeable  
eyepieces offer a  
variety of magni-  
fications.

Prism body can  
be used on any  
one of a variety  
of ten (10) stands  
to fit each individ-  
ual need.

WRITE FOR  
PAMPHLET  
NO. (0) 1060

MODEL "BSM-F," No. 22146.

AGENTS:

Pacific Coast States: SPINDLER & SAUPPE, 86 Third St., San Francisco, Cal.

Canada: THE J. F. HARTZ CO., Ltd., Toronto, Canada.

Philippine Islands: BOTICA DE SANTA CRUZ, Manila, P. I.

Cuba: TEXIDOR CO., Ltd., Habana, Cuba.

# The Ajax-Northrup High Frequency Induction Furnace

For Universities and Colleges

For melting alloys at temperatures up to at least 2900°C. Also for low temperature work

Stationary Cylindrical Furnace

Cross section of the upper part of the furnace

The Simplest Form of the  
Ajax-Northrup High Frequency Furnace

*There is no better or quicker way to  
make alloys of all melting points,—  
without carbon or other contamination.*
