THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

THE PERMANENT SECRETARY'S REPORT ON THE FIFTH PHILADELPHIA MEETING

GENERAL FEATURES

Between Monday, December 27, 1926, and Saturday, January 1, 1927, at Philadelphia and mainly in the halls of the University of Pennsylvania occurred the eighty-third meeting of the American Association for the Advancement of Science and Associated Societies. It was the annual meeting for the association year 1926–27. It was the fifth Philadelphia meeting, at which the association returned to the place of its organization; the history of the association begins with the first Philadelphia meeting, of September, 1848.

President L. H. Bailey, eminent plant scientist, author and editor, of Ithaca, New York, presided at this meeting and took active part in many sessions. The retiring president was Dr. Michael I. Pupin, professor of electromechanics in Columbia University, and Dr. Pupin's retiring presidential address was delivered before a crowded audience in Drexel Hall on the opening evening, Monday, December 27. Thoughts and aspirations aroused by this address, on "Fifty Years' Progress in Electrical Communications," will occupy many minds for many hours in the new year just begun. The address has been printed in Science for December 31, 1926.

Besides the fifteen sections of the American Association, forty-three independent organizations of science workers met with the association at Philadelphia. Most of these are officially associated societies. the majority of which are officially affiliated. Associated organizations are approved by the council of the association, by which they are admitted to official association. The council has elected many associated organizations to official affiliation with the association. and these have representation in the council and thus take part in directing the affairs of the association. Affiliated organizations each name one council member and those that have on their respective membership lists one hundred or more fellows of the association each name an additional council member. There are now one hundred and twelve associated organizaSome of the Volumes in

THE LIBRARY OF MEDICAL HISTORY

ESSAYS IN THE HISTORY OF MEDICINE By Karl Sudhoff, M.D.

Professor of History of Medicine in the University of Leipzig, 1895-1924 Translated by various hands and edited, with foreword and biographical sketch,

By Fielding H. Garrison, M.D. Lieutenant Colonel, Medical Corps, U. S. Army. Sudhoff's first book in English. 38 chapters, translated by 12 students of medical history, under the direction of America's foremost medical historian.

Crown octavo, over 400 pages, illustrated, bound in extra cloth.

\$5.00

REMINISCENCES

By George Henry Fox, M.D.

A most delightful autobiography, by the former Professor of Dermatology at the College of Physicians and Surgeons, Columbia University, New York, to which the Journal of the American Medical Association devoted one of its longest reviews.

Octavo of 250 pages, numerous illustrations, bound in cloth.

\$3.50

SIXTY YEARS IN MEDICAL HARNESS

By Charles Beneulyn Johnson, M.D.

With an introduction

By Victor Robinson, M.D.

A genuine human document of a practitioner of the old school.

340 pages, numerous illustrations, bound in green buckram.

\$3.00

MASTER MINDS IN MEDICINE

By John C. Hemmeter, M.D.

With an introduction by

Karl Sudhoff, M.D.

One of the most important contributions to medical historiography. A monumental work of 800 pages, crown octavo, with 32 inserts. Ready for delivery March 1st. All who order prior to publication will receive an autographed copy.

\$10.00

THE DON QUIXOTE OF PSYCHIATRY

By Victor Robinson, M.D.

Harvey Cushing, in his Life of Osler (Volume II, page 670), states that when Osler was fatally ill, the last book he asked for was The Don Quixote of Psychiatry, by Victor Robinson. This unique volume, containing considerable information and illustrations hitherto unpublished, when out-of-print will not be republished.

339 pages, artistically bound, in cloth and boards.

\$5.00

LIFE OF IACOB HENLE

By Victor Robinson, M.D.

The first biography in the English language of one of the makers of modern medicine. The inimitable letters of Henle, among the wisest and wittiest in all medical literature, now presented in English for the first time.

Edition limited to 500 copies of which 400 are offered for sale.

\$3.00

and now—

3 sets of paired objectives ready to be instantly swung into parfocal position

The New Drum Nosepiece

A new Drum Nosepiece holding three pairs of matched objectives, so arranged that each can be instantly swung into parfocal position (approximate focus), can now be had with the AKW Binocular Microscope. This nosepiece is the greatest single achievement since the introduction of the AKW itself, and is a direct result of the constant effort the Bausch & Lomb Optical Company makes to improve and refine its products to the point of maximum efficiency so that they may continue to be known as the standards of comparison by which other instruments are judged.

by which other instruments are judged.

With this addition the wide field AKW Microscope becomes a more valuable instrument than ever in the biological laboratory.

We will be pleased to send you a catalog if you wish.
