Martin H. Dawson, M.D., assistant, department of bacteriology, Hospital of the Rockefeller Institute, New York City.

Peter Heinbecker, M.D., instructor in surgery, Washington University School of Medicine, Saint Louis. Francis F. Heyroth, M.D., department of internal medicine, University of Cincinnati.

T. Duckett Jones, M.D., resident, department of medicine, House of the Good Samaritan, and assistant in medicine, Harvard Medical School, Massachusetts General Hospital.

Ralph G. Smith, M.B., instructor, department of materia medica and therapeutics, University of Michigan.

Lester R. Whitaker, M.D., assistant in anatomy and surgery, Boston University School of Medicine.

Richard W. Whitehead, M.D., associate professor of physiology and pharmacology, University of Colorado, Denver.

Edgar F. Fincher, Jr., M.D., has received a fellowship (neurology) at Mayo Clinic, Rochester, Minnesota. Willard O. Thompson, M.D., has received the Henry P. Walcott fellowship in medicine, Harvard Medical School and Massachusetts General Hospital.

G. Carl Huber,
Chairman, Medical Fellowship Board,
National Research Council

THE YALE SCHOOL OF MEDICINE AND THE NEW HAVEN HOSPITAL

THE formal opening of the new laboratory building for the joint use of the Yale School of Medicine and the New Haven Hospital took place on January 3. On the following day the laboratories and their equipment were thrown open to the public. The building, which was made possible by a grant of \$1,250,000 to Yale University from the General Education Board of New York City, provides for the New Haven Hospital eight operating rooms for ward patients, a completely equipped accident ward, suites of examining rooms for surgery and urology, gynecology and orthopedics, and complete therapeutic facilities for the treatment of orthopedic patients. For the School of Medicine there are adequate quarters for research and teaching in surgery, obstetrics and gynecology, pathology, bacteriology and immunology, nursing and public health.

Connected directly with the existing wards and administrative offices of the hospital the new laboratories represent a further step in the formation of a medical unit, composed of the New Haven Hospital, the New Haven Dispensary, the Yale School of Medicine and the Yale School of Nursing for the care of the sick, the education of men and women in medicine and its allied fields and the advancement of medical research.

The scheme of the building is said to be unique in that it aims to provide for each member of the fulltime staff of the hospital and for each member of the faculty of the School of Medicine a unit consisting of administrative offices, private laboratory, examining and treatment rooms for his particular branch of medicine and student laboratories and classrooms.

The building is constructed in the shape of a U, enclosing on three sides an area equal to half a city block. Each of the three wings is about 200 feet long and 50 feet wide, with a corridor running through the center, so that all rooms have outside exposure. The east and west wings are four stories and basement in height, the south wing three stories and basement. Each wing is named in recognition of a major benefaction to the hospital and school, the east wing, on Cedar Street, being known as the Anthony N. Brady Memorial Laboratory; the south wing, Lauder Hall, and the west wing the Farnam Memorial Building.

A feature of the teaching facilities is a group of twelve small laboratories to each of which six students are assigned for the year. The student has a key to his room and may use it day or night. Two amphitheaters each seating 140 are provided for general lectures and clinics. Small lecture rooms, special laboratories and work rooms for students are also contained in each of the departments represented in the building. Dormitories are provided in the basement of Farnam Memorial Building for internes on call in the accident and obstetrical wards, and living quarters for ten resident doctors are located on the fourth floor of Brady Laboratory.

The new laboratories constitute the fifth unit of the Hospital and Medical School Group to be completed within the last ten years. The Sterling Hall of Medicine, containing the administrative offices, auditorium, library and teaching and laboratory facilities for anatomy, physiology, physiological chemistry, pharmacology and toxicology, was completed in 1923 at a cost of \$2,100,000, including the power house for the group. The Private Patient Pavilion, costing \$437,000, was erected in the same year. The first unit of the Anthony N. Brady Memorial Laboratory was built in 1927 at a cost of \$167,000. The Boardman Administration building of the hospital was completed at a cost of \$183,000 in 1928.

It is planned in the near future to erect a 100-bed ward for medicine and pediatrics, made possible through the gift of \$1,000,000 made to Yale University last spring by A. E. Fitkin, of New York City.

THE ROCKEFELLER FOUNDATION

THE Rockefeller Foundation and the Laura Spelman Rockefeller Memorial have been consolidated by an order of the courts granting the joint petition. The consolidated organization, to be known as the
