

# Recent McGraw-Hill Books on Physics

## Richtmyer—Introduction to Modern Physics

By F. K. RICHTMYER, *Professor of Physics, Cornell University*. 596 pages, 6 x 9, 169 illustrations. \$5.00

A discussion of the origin, development and present status of some of the more important concepts of physics, classical as well as modern, that will give the reader a correct perspective of the growth and present trend of physics as a whole.

## Joffé—The Physics of Crystals

By ABRAM F. JOFFÉ, *Director, Roentgen Institute; Director, Physical Technical Institute, Leningrad, Russia*. Edited by LEONARD B. LOEB, *Associate Professor of Physics, University of California*. 198 pages, 6 x 9, 61 illustrations. \$3.00

## Knowlton—Physics for College Students—An Introduction to the Study of the Physical Sciences

By A. A. KNOWLTON, *Professor of Physics, Reed College*. 641 pages, 6 x 9, illustrated. \$3.75

## Humphreys—Physics of the Air—New Second Edition

By W. J. HUMPHREYS, *Meteorological Physicist, United States Weather Bureau*. Second Edition, revised and enlarged. 654 pages, 6 x 9, 226 illustrations. \$6.00

## Valasek—Elements of Optics

By JOSEPH VALASEK, *Associate Professor of Physics, University of Minnesota*. 215 pages, 5 x 8, 122 illustrations. \$2.00

# The Holman-Robbins Botanies

*For One or Two-Semester Courses*

*Second Edition*

## Textbook of General Botany

BY RICHARD M. HOLMAN  
AND WILFRED W. ROBBINS

*(Both at the University of California)*

**T**HIS text was the Wiley best seller for 1928. It is generally considered the best textbook on the subject. In excellence of content, arrangement, and illustrations it is unsurpassed.

The book presents practically the whole content of the usual lectures on the fundamentals of botany, leaving more time to the instructor for recitation, conference and quiz.

The text is equally suitable for liberal arts and agricultural students. It presents a broad survey of the whole field, but economic plants are used for illustrative material wherever they serve as well as any others.

This book contains information on the most recent advances in botanical knowledge, particularly in histology and physiology.

624 pages. Price \$4.00

*Second Edition*

## Laboratory Guide for a Course in General Botany

BY LEE BONAR, R. M. HOLMAN, AND  
LUCILLE ROUSH

This guide has been used successfully with the text on "General Botany," by Holman and Robbins. The second edition has been revised in accordance with the changes made in the second edition of that text.

106 pages. Price \$1.25

endorsed  
by 50  
colleges

adopted in  
nearly 200  
colleges

## Elements of Botany

BY THE SAME AUTHORS

*a text for a short course*

**T**HE text of this book embodies the same material, the same organization and viewpoint as that of the "General Botany." It meets the need made obvious by the brilliant success of that book for a similar one-semester textbook.

The authors believe that a few forms and processes studied with some degree of completeness brings more to the student than work that is superficial and extensive.

The chief concern of the book is, of course, with the activities of the plant but its authors maintain that a knowledge of structure is essential to an intelligent understanding of function.

In accordance with the authors' effective methods the book is fully illustrated.

Its table of contents follows very closely that of its popular predecessor with the following chapter headings:

The Plant Body; The Cell; The Stem; The Root; The Leaf; The Flower; Fruit and Seed; Relation of Plant to Environment; Plant Relationships and Classifications; Thallophyta—Algæ; Thallophyta—Fungi; Bryophyta—(Liverworts and Mosses); Pteridophyta (Ferns and Fern Allies); Spermatophyta (Seed-Bearing Plants); Evolution and Heredity.

380 pages. Price \$2.75

John Wiley & Sons, Inc., 440 Fourth Ave., New York

## SCIENTISTS FOR AUSTRALIA

The Council for Scientific & Industrial Research for the Commonwealth of Australia invite applications for the following appointments:—

1. Senior Plant Introduction Officer. Salary £700 to £900, according to qualifications. Candidates must possess technical knowledge of grasses, fodder plants, cereals, and must have had graduated training in botany, agrostology, crops, or plant breeding, and soil.
2. Assistant to above.
3. Assistant Plant Pathologist.
4. Weed Officer. Should have botanical knowledge and training in field and other studies on weeds.
5. Assistant Mycologist, mainly for maintenance purely culture.
6. Assistant Plant Geneticist.
7. & 8. Assistants to Agrostologists (two positions).

Appointees will be stationed originally at the Waite Institute.

Applications for positions 2 to 8 inclusive should have graduated with honours in botany or agriculture at some recognized University.

All appointments will be made under Section 14A of the Council's Act, thus obtaining superannuation rights, and excepting No. 1 appointment, will be subject to one year's probation, and carrying initial salaries of £300 to £400, dependent on qualifications.

Applications giving details as to training and experience, accompanied by recent photographs and not more than four testimonials, should be addressed before June 20th, 1929, to:—

Official Secretary for Australia  
25 Broadway, NEW YORK CITY

## CARNEGIE PENSIONS

By J. McKEEN CATTELL

Together with extracts from letters from two hundred and fourteen college and university professors, an article on the history of the Carnegie Foundation by Joseph Jastrow, and the reports of the committee on pensions and insurance of the American Association of University Professors.

*Published 1919. Pages viii + 253.*

*Price, \$2.50 postpaid*

THE SCIENCE PRESS

*Grand Central Terminal, New York*

## The Wistar Institute Bibliographical Service

is of invaluable assistance to

Librarians—Investigators—Teachers

It brings to them, in AUTHORS' ABSTRACT form, a brief review of all original papers on Biological Subjects which appear in the following journals:

Journal of Morphology and Physiology  
The Journal of Comparative Neurology  
The American Journal of Anatomy  
The Anatomical Record  
The Journal of Experimental Zoology  
American Journal of Physical Anthropology  
The American Anatomical Memoirs  
Folia Anatomica Japonica (Tokio, Japan)  
Stain Technology (Geneva, N. Y.)  
Physiological Zoology (Chicago, Ill.)

### Advance Abstract Sheets

issued semi-monthly, bearing Authors' Abstracts without bibliographic references, offer a practical means of making research immediately available in abstract form and of purchasing articles of special interest in reprint form without the necessity of subscribing to all the journals. Subscription, \$3.00 per year.

### Bibliographic Service Cards

with complete bibliographic references, printed on Standard Library-catalogue cards, are of value and assistance to Librarians and Investigators. Subscription, \$5.00 per year.

### Abstracts in Book Form

referred to above, are brought together periodically, with Authors' and Analytical Subject Indices. Price \$5.00 per volume.

*Subscriptions to the Bibliographic Service  
and orders for reprints should be sent to*

## Sources of the Common Alcohols

Ethyl and methyl alcohols can no longer be considered the *only* common alcohols. The recent advances in petroleum cracking processes, fermentation and other methods have made possible the manufacture of many new alcohols on a large scale. Uses for these new alcohols are constantly being found in industrial processes, and with increased production many of them will become much cheaper and more generally known. A brief discussion of the sources of some of the new aliphatic alcohols which are finding their way into industry, is contained in an article in the December issue of "Synthetic Organic Chemicals."

We shall be glad to send you a copy of this leaflet on request.
