HIDEYO NOGUCHI

A BIOGRAPHICAL SKETCH¹

HIDEYO NOGUCHI was born on November 24, 1876, in Inawashiro, Fukushima, a village in the mountains of northern Japan. His name during childhood was Seisaku which, as is the custom in his country, was changed to another when he reached manhood. The adoption of the name "Hideyo" gives us an insight into the way his budding mental powers impressed those about him, for of the two parts composing the word, "Hide" means superior or eminent, and "yo" means world. The prophecy carried by the name came to a remarkable realization as subsequent events showed.

Noguchi graduated from the local academy at Aizu in 1889, receiving during this period a preliminary introduction into medical practice. The circumstances of his early schooling are delightfully set forth in an account prepared by his teacher and foster-father, Mr. Sakae Kobayashi, which was used in connection with the memorial exercises held in Dr. Noguchi's honor in his native village.

According to this account, Noguchi belonged to a family which had become greatly impoverished. After the restoration of the Meiji, Mr. Kobayashi, a samurai of the Aizu clan, being learned in the Chinese classics, entered the teaching profession and became principal of the higher school (academy) at Inawashiro, with which were affiliated a number of more elementary schools of the neighboring villages.

The principal visited these lower schools, and on one occasion while examining the children at Sanjogata, his interest was aroused in an ill-clad pupil whose left hand was badly deformed. On inquiry it developed that at the age of two years the hand had been severely burned, and the primitive medical treatment had left the fingers, while not completely lost, yet grown together and almost useless. The physically backward child Seisaku gave his age as fourteen, and explained that, because of the poverty of his family, he would be obliged to leave school. On learning that, in spite of having entered the school a year or two later than the other pupils, his progress had been so rapid that he had surpassed them all, the principal had him transferred to his own school at Inawashiro.

¹ The substance of this sketch was adopted as a minute for the records of the Board of Scientific Directors of the Rockefeller Institute for Medical Research.

THE SCIENCE PRESS

New York City: Grand Central Terminal.

Lancaster, Pa. Garrison, N. Y.

Annual Subscription, \$6.00. Single Copies, 15 Cts.

SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the Association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

The Wistar Institute Bibliographical Service

is of invaluable assistance to

Librarians—Investigators—Teachers

It brings to them, in AUTHORS' ABSTRACT form, a brief review of all original papers on Biological Subjects which appear in the following journals:

Journal of Morphology and Physiology
The Journal of Comparative Neurology
The American Journal of Anatomy
The Anatomical Record
The Journal of Experimental Zoology
American Journal of Physical Anthropology American Journal of Physical Anthropolog The American Anatomical Memoirs Folia Anatomica Japonica (Tokio, Japan) Stain Technology (Geneva, N. Y.) Physiological Zoology (Chicago, Ill.)

Advance Abstract Sheets

issued semi-monthly, bearing Authors' Abstracts without bibliographic references, offer a practical means of making research immediately available in abstract form and of purchasing articles of special interest in reprint form without the necessity of subscribing to all the journals. Subscription, \$3.00 per year.

Bibliographic Service Cards

with complete bibliographic references, printed on Standard Library-catalogue cards, are of value and assistance to Librarians and Investigators. Subscription, \$5.00 per year.

Abstracts in Book Form

referred to above, are brought together periodically, with Authors' and Analytical Subject Indices. Price \$5.00 per volume

> Subscriptions to the Bibliographic Service and orders for reprints should be sent to

The Wistar Institute of Anatomy and Biology Thirty-sixth St. and Woodland Ave. Philadelphia, Pa.

Flowers and Insects

 $\mathbf{B}\mathbf{v}$

CHARLES ROBERTSON

A technical book covering many years of study by the author on the visits of insects to flowers. 15,172 visits of 1,288 insects, and one humming bird, to 441 insect flowers are recorded.

This book should prove of interest both to the Botanist and to the Entomologist.

225 pages \$3.00, plus postage

This book is printed and offered for sale by

THE SCIENCE PRESS PRINTING COMPANY

Lime and Green Streets, Lancaster, Penna.

JOHNS HOPKINS UNIVERSITY

SCHOOL OF MEDICINE

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with two years' instruction, including laboratory work, in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and

with evidence of a reading knowledge or French and German.
Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.
If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill the requirements and present exceptional qualifications. INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the

THITION

The charge for tuition for 1929-30 will be \$600 per annum, payable in two installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the

Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Graduates in Medicine who satisfy the requirements of the heads of the departments in which they desire to work are accepted as students for a period not less than three quarters. Tuition charge is \$50 a quarter.

Coming in July

a new third edition of
the standard textbook on zoological principles

Principles of

ANIMAL BIOLOGY

By A. FRANKLIN SHULL

With the collaboration of
GEORGE R. Larue and ALEXANDER G. RUTHVEN

of the University of Michigan

McGraw-Hill Publications in the Zoological Sciences

N this new edition the authors reaffirm their conviction that the best approach to biological science is through the presentation of great generalizations and fundamental principles.

The intimate relation between function and structure is emphasized by combining the chapters on morphology and physiology of higher types. The combined discussion is divided into several chapters in recognition of distinct types of physiological processes.

The account of cell structure and cell physiology has been rewritten to emphasize still more strongly the fundamental features, and to include some of the most recent conclusions of the general physiologists.

The chapter on genetics has been strengthened by the inclusion of an adequate account of linkage and sex-linkage, by revision of the problems and by the inclusion of additional problems.

The entire book has been thoroughly revised to reflect new discoveries and altered points of view.

Shull's PRINCIPLES OF ANIMAL BIOLOGY has been widely used in previous editions. In fact this past year it has been in use in 87 colleges.

A revision of Shull's LABORATORY DIRECTIONS IN ANIMAL BIOLOGY is also in press.
