SOME PROBLEMS OF COSMICAL PHYSICS, SOLVED AND UNSOLVED¹

By LORD RAYLEIGH, F.R.S.

OF the activities of our section, the Cape has perhaps been more identified with astronomy than with any other branch. In the middle of the eighteenth century, when exact astronomy of the southern hemisphere may be considered to have begun, there were few, if any, other places in a considerable southern latitude where an astronomer could work in safety with the necessary help of trained artisans. This tradition worthily begins with Lacaille (1750-51). Other landmarks were the foundation of the Cape Observatory (1821), the expedition of Sir John Herschel (1833-38) and the forceful and energetic career of Sir David Gill, who was the life and soul of our organization on its visit to South Africa in

¹ Address of the president of Section A—Mathematical and Physical Sciences, British Association for the Advancement of Science, Cape Town, South Africa, July 24, 1929.

1905. Shortly afterwards he retired, and I then had the privilege of friendship with him in London. Indeed, I have taken these few facts and dates from the copy of his "History of the Cape Observatory," which he gave me very shortly before his death. Although past his prime at the time I knew him, he was still vigorous and keenly interested in scientific developments, though if one brought anything new to his notice a severe cross-examination as to the validity of the evidence had to be faced.

It is partly on account of this association of South Africa with astronomy that I have chosen to lean as far towards this direction as I feel able, and to pass in review some subjects lying on the border-line between astronomy and physics.

After the first period of success in identifying the origin of the spectral lines of the sun and stars with

The Wistar Institute Bibliographical Service

is of invaluable assistance to

Librarians—Investigators—Teachers

It brings to them, in **AUTHORS' ABSTRACT** form, a brief review of all original papers on Biological Subjects which appear in the following journals:

Journal of Morphology and Physiology
The Journal of Comparative Neurology
The American Journal of Anatomy
The Anatomical Record
The Journal of Experimental Zoology
American Journal of Physical Anthropology
The American Anatomical Memoirs
Folia Anatomica Japonica (Tokio, Japan)
Stain Technology (Geneva, N. Y.)
Physiological Zoology (Chicago, Ill.)

Advance Abstract Sheets

issued semi-monthly, bearing Authors' Abstracts without bibliographic references, offer a practical means of making research immediately available in abstract form and of purchasing articles of special interest in reprint form without the necessity of subscribing to all the journals. Subscription, \$3.00 per year.

Bibliographic Service Cards

with complete bibliographic references, printed on Standard Library-catalogue cards, are of value and assistance to Librarians and Investigators. Subscription, \$5.00 per year.

Abstracts in Book Form

referred to above, are brought together periodically, with Authors' and Analytical Subject Indices. Price \$5.00 per volume.

Subscriptions to the Bibliographic Service and orders for reprints should be sent to

The Wistar Institute of Anatomy and Biology

Thirty-sixth St. and Woodland Ave. Philadelphia, Pa.

Journal of the Optical Society of America and Review of Scientific Instruments

Published monthly by the *Optical Society of America* in co-operation with the *Association of Scientific Apparatus Makers of the United States of America*

CONTENTS FOR JUNE, 1929

Classical Scattering in X-ray Reflection.

INSTRUMENTS

Award of Prize for 1928.
 Compensating Zero Shunt Circuit.
 High Grid Resistor Amplifier.
 Design of a Double X-ray Spectrometer.
 Nomograms for Rotation Photographs.
 Some Uses of Alternating Current Supply.
 On the Elimination of Errors When Wire Screens are Used as Neutral Filters for Photographic Photometry.

Subscription \$5.00 per year.

Address orders to

F. K. RICHTMYER, Manager
 Rockefeller Hall
 Ithaca, N. Y.

CHARLES SCRIBNER'S SONS

NEW YORK LONDON

Henry Fairfield Osborn

Biological Series (1894-1929)

I. FROM THE GREEKS TO DARWIN

New and completely revised edition of this standard work. 12mo. 3d thousand. \$2.50

II. IMPRESSIONS OF GREAT NATURALISTS

Sequel to Vol. I. Darwin, Wallace, Huxley, Balfour, Bryce, Pasteur, Leidy, Cope, Butler, Burroughs, Muir, Roosevelt. With portraits. 12mo. New and extended edition. 4th thousand. \$2.50

III. EVOLUTION AND RELIGION IN EDUCATION

Discussion with Bryan and other Fundamentalists of the years 1922-25. 12mo. 12th thousand. \$2.00

IV. CREATIVE EDUCATION

in School, College, University, and Museum

Fifty years' observation and experience in school, college, and university education and the training of biologists and geologists. "I rejoice that you have put your ripe experience into this brilliant book. It is tonic."—WILLIAM McANDREW. With portraits. 12mo. \$2.50

Life History of Earth and Man Series
 (1907-1928)

I. THE ORIGIN AND EVOLUTION OF LIFE

On the theory of action, reaction, and interaction of energy. Profusely illustrated. 8vo. 12th thousand. \$4.00

II. THE AGE OF MAMMALS

New and revised edition now in preparation. Profusely illustrated. 8vo. \$6.00

III. EVOLUTION OF MAMMALIAN MOLAR TEETH

Foundation of the tritubercular theory of human mammalian dentition up to the year 1907 (followed by W. K. Gregory's volume, "Origin and Evolution of the Human Dentition," of 1922). Profusely illustrated. 8vo. \$2.75

IV. MEN OF THE OLD STONE AGE

Their Environment, Life, and Art

Standard work in human archæology. Profusely illustrated. Thirteenth printing. Cr. 8vo. 20th thousand. \$5.00

Princeton University Press

V. MAN RISES TO PARNASSUS

Intellectual and spiritual evolution of man to close of New Stone Age. Sequel to Vol. IV. Illustrated. 8vo. 3d thousand. \$2.50

Just Published
the new second edition of
BOTANY
Principles and Problems

By Edmund W. Sinnott
*Professor of Botany, Barnard College,
Columbia University*

441 pages, 6 x 9, 269 illustrations, \$3.00

McGraw-Hill Publications in the Agricultural and Botanical Sciences

ALTHOUGH in its essential features, the book is unaltered there have been several rearrangements of material and changes of emphasis. Among the more important of these are:

1. The material on the cell has been increased considerably and is now set apart as a separate chapter.
2. The discussion of the soil and its relation to plant growth has been included under the chapter on the root.
3. That portion of the chapter on the plant kingdom which dealt with the main steps in plant evolution has been incorporated in the chapter on plant evolution.
4. The portion on classification and nomenclature has been added to the chapter on seed plants.
5. The treatment of the thallophytes has been rearranged.
6. The questions for thought and discussion have been revised.
7. The reference problems have been increased and somewhat broadened in scope.

The entire text has been rewritten and brought up-to-date and somewhat increased in length. Over thirty new illustrations have been added.

**Annual Survey of American
Chemistry****Volume I, 1925-1926, \$2.00****Volume II, 1926-1927, \$3.00****Volume III, 1927-1928, \$3.00**

Prepared by the Division of Chemistry and
Chemical Technology of the National
Research Council

Edited by CLARENCE J. WEST, Director

No chemist can possibly be familiar with all that is going on in the various departments of chemical science and industry. Every chemist, however, should have some idea of the general directions in which progress is being made. This concise, accurate survey will bring your knowledge up to date and point the way for more exhaustive reading in fields in which you are especially interested.

Industrial Fermentations**PAUL W. ALLEN***Professor of Bacteriology, University of Tennessee***424 Pages Illustrated Price \$6.00**

Summarizes accurately and concisely the relation of fermentation to a great variety of processes and industries. The discussion in each chapter includes the history, use and processes of manufacture of the different products followed by tables of useful references.

CATALYTIC ACTION**K. GEORGE FALK***Harriman Research Laboratory***172 Pages Price \$3.50**

Deals with catalytic action on the basis of the principles of physical chemistry, and examines the current theories from this standpoint rather than from the point of view of individual phenomena.
