VOL. LXX

FRIDAY, AUGUST 16, 1929

No. 1807

The Chronaxic Switching in the Nervous System:
PROFESSOR LOUIS LAPICQUE 151

The American Association for the Advancement of Science:
The Second Berkeley Meeting of the Pacific Division: DR. ARTHUR G. VESTAL 154

Scientific Events:
The Australian Institute of Anatomy; Malaria in India; Soil Surveys Approved by the Pacific Science Congress; The Philippine Research Institute; The Bermuda Oceanographic Expedition 159

Scientific Notes and News 162

University and Educational Notes 166

Discussion:
Need for an International Repository for Original Research Data: PRESIDENT R. W. THATCHER.
Preservation of Natural Areas: DR. WILLARD G. VAN NAME. *Insect Nutrition:* PROFESSOR E. F. PHILLIPS. *New Fossils from Maine:* PROFESSOR EDWARD S. C. SMITH 167

Special Correspondence:
The Field Trip of the Ohio-Kentucky Academies of Science and the Seventy-fifth Anniversary of the Kentucky Geological Survey: PROFESSOR CHAS. H. BEHRE, JR. 169

Scientific Books:
Bailey and Spoehr on the Role of Research in the Development of Forestry in North America: PROFESSOR HENRY S. GRAVES 170

Scientific Apparatus and Laboratory Methods:
New Forms of Dry and Wet Bulb Thermometers: PROFESSOR ALEXANDER MCADIE 172

Special Articles:
Is Ossification Influenced Solely by Ultra-violet Light? PROFESSOR R. ADAMS DUTCHER and H. E. HONEYWELL. *A Comparison of the Copper Content of Oklahoma Wheat with Those of Other States:* JAMES E. WEBSTER and FRANK JANSMA 173

THE CHRONAXIC SWITCHING IN THE NERVOUS SYSTEM¹

By Professor LOUIS LAPICQUE

PHYSIOLOGY has until now paid but very slight attention to the important part which time, in the sense of duration of the stimulus, plays as a condition of excitation, and has given no thought whatever to the correlations of such time characteristics among functionally related cells. I shall not here inquire into the historical reasons for such an oversight or show in detail how Du Bois Reymond, the omnipotent master of electro-physiology for half a century, was to blame for this. But I must mention the pioneers, Fick, Brücke, Engelmann, who had begun to open the way seventy years ago, but whose valuable work on the time factor in excitation has long been buried in undeserved oblivion. Engelmann went so far as to use the phrase "physiological time" to indicate the difference between quick muscles and slow ones, noting

¹ Introduction to the Dunham Lectures at the Harvard Medical School, 1928-29.

that excitability was correlated with contractility in this respect. But he drew no further inferences from this relationship, and his remark awakened no echo.

In order to indicate the possible physiological significance of the time factor of excitation let me review some of the classical notions as to the mechanism involved in the central nervous system.

A spinal reflex is generally accepted as the elementary unit in terms of which the more complicated functions are to be explained. But, as Sherrington has emphasized, the ordinary flexion reflex of the decapitated frog, as it pulls up its leg when pinched, is by no means a simple phenomenon. Any reflex motion, as well as any voluntary motion, implies coordination. Every joint is provided with antagonistic muscles, which tend to move it in opposite directions when they contract, and if all should contract at the same moment motion would not result, but

Successful Textbooks

Textbook of Physiology

By **W. D. Zoethout, Ph.D.**, Professor of Physiology, Chicago College of Dental Surgery (Loyola University) and Chicago Normal School of Physical Education. 3rd Edition. 664 pages, with 193 illustrations. Cloth, \$4.50. Fills the gap between the larger texts of which there are many in the field and those offering a briefer course of physiology. Highly recommended by teachers in normal schools and colleges.

Laboratory Experiments in Physiology

By **W. D. Zoethout, Ph.D.** 251 pages, 102 illustrations. Cloth, \$2.25. The outcome of years of teaching experience. Planned so it will accompany any standard text on physiology. Simpler experiments and those requiring a minimum of laboratory equipment selected.

Textbook of Physiological Chemistry

Revised and rewritten by **J. F. McClendon, Ph.D.**, Professor of Physiological Chemistry, Med. School of University of Minnesota. 4th Edition. 400 pages, illustrated. Cloth, \$3.75. Dr. McClendon has completely revised and rewritten this popular text of **Pettibone's** which has been used for many years as the required book on physiological chemistry in college work.

Personal and Community Health

By **Clair E. Turner, M.A., Dr.P.H.**, Professor of Biology and Public Health, Mass. Institute of Technology, etc. 2nd Edition. 426 pages, 53 illustrations. Cloth, \$2.50. Deals with the health of the individual and with the health of the community. As a text for the student at the university, college or professional school, it has few equals. Widely recommended by teachers.

Elements of Scientific Psychology

By **Knight Dunlap**, Professor of Experimental Psychology, Johns Hopkins University. Formerly President American Psychological Assn. 368 pages, 31 illustrations. Cloth, \$3.50. The book is primarily one for the college student, but may be read with profit by those in various professions who wish to orient themselves as to the aims and methods of modern psychology. Highly recommended by teachers.

Recommended and Used in Leading Colleges

Teachers in many of the leading colleges, normal schools, and universities have for years been using these books as the texts for their classroom work. We shall be glad to correspond with teachers in regard to any of these texts. Ask also for our complete catalog of books.

The Wistar Institute Bibliographical Service

is of invaluable assistance to

Librarians—Investigators—Teachers

It brings to them, in AUTHORS' ABSTRACT form, a brief review of all original papers on Biological Subjects which appear in the following journals:

Journal of Morphology and Physiology
The Journal of Comparative Neurology
The American Journal of Anatomy
The Anatomical Record
The Journal of Experimental Zoology
American Journal of Physical Anthropology
The American Anatomical Memoirs
Folia Anatomica Japonica (Tokio, Japan)
Stain Technology (Geneva, N. Y.)
Physiological Zoology (Chicago, Ill.)

Advance Abstract Sheets

issued semi-monthly, bearing Authors' Abstracts without bibliographic references, offer a practical means of making research immediately available in abstract form and of purchasing articles of special interest in reprint form without the necessity of subscribing to all the journals. Subscription, \$3.00 per year.

Bibliographic Service Cards

with complete bibliographic references, printed on Standard Library-catalogue cards, are of value and assistance to Librarians and Investigators. Subscription, \$5.00 per year.

Abstracts in Book Form

referred to above, are brought together periodically, with Authors' and Analytical Subject Indices. Price \$5.00 per volume.

*Subscriptions to the Bibliographic Service
and orders for reprints should be sent to*

The Wistar Institute of Anatomy and Biology

Philadelphia, Pa.

The Printing of SCIENTIFIC PUBLICATIONS

The Science Press Printing Company has been established and equipped for printing scientific literature in the best way, with compositors, pressmen and proof-readers trained for technical work. It is a business corporation but it has been founded to provide facilities essential for the advancement of science.

The corporation owns its building at Lancaster, Pennsylvania, over 14,000 square feet of floor space lighted on all sides, with space for printing a hundred scientific journals. It has the best obtainable presses, composing machinery and binding equipment. What is more important, it has the most competent pressmen and compositors in a city which since "Science" was first printed there in 1894 has become a center for fine scientific printing. The costs are much less than in the large cities.

The press prints "The Scientific Monthly," "Science," "School and Society," "The American Naturalist" and some twenty other scientific journals and publications. The typography and presswork of these journals will bear comparison with any weekly or monthly publication, although, for example, "Science" must be printed mostly in one day in an edition of over 14,000. The new edition of "The Biographical Directory of American Men of Science" is an example of the work of the press. It can to special advantage print scientific monographs and doctorate dissertations.

Samples of work and estimates of costs will be supplied on application.

AMERICAN MEN OF SCIENCE

A Biographical Directory

Edited by J. McKeen Cattell and Jaques Cattell

New Impression now ready

The fourth edition of the Biographical Directory of American Men of Science contains about 13,000 sketches and extends to 1,132 pages. It is an invaluable work of reference for scientific men. It is useful for libraries, newspapers, educational executives and all who have relations with those engaged in scientific research.

Price, Ten dollars net, postage paid
