SCIENCE: A Weekly Journal devoted to the Advancement of Science, edited by J. McKEEN CATTELL and published every Friday by

THE SCIENCE PRESS

New York City: Grand Central Terminal Lancaster, Pa. Garrison, N. Y. Annual Subscription, \$6.00 Single Copies, 15 Cts. SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the Association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

THE AMERICAN ASSOCIATION FOR THE ADVANCE-MENT OF SCIENCE

REPORTS OF THE DES MOINES MEETING OF THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE AND ASSOCIATED SOCIETIES

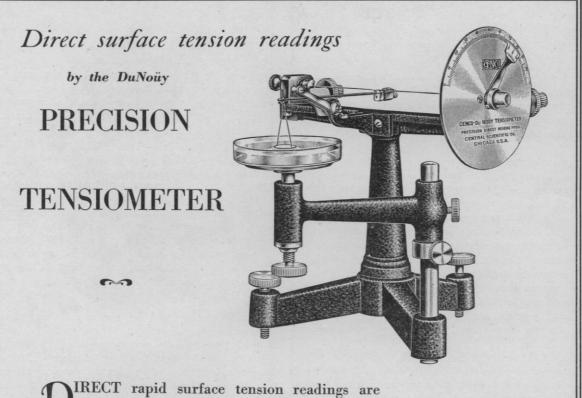

GENERAL FEATURES

THE Des Moines meeting of the American Association for the Advancement of Science was held from Friday, December 27, 1929, to Thursday, January 2, 1930. This was the eighty-sixth meeting of the association and the second one to be held in the state of Iowa, the first having occurred at Dubuque in August, 1872. The preliminary announcement of the Des Moines meeting appeared in a special issue of SCIENCE for November 29, 1929. The sessions of the association and the associated societies were nearly all accommodated in hotels and other down-town buildings, all within a few blocks of one another. There was no snow and the weather throughout convocation week was uniformly fine and unusually warm for the season. Arrangements and facilities were generally unsurpassed and the meeting was successful in every way.

The president for this meeting was Robert A. Millikan, director of the Norman Bridge Physical Laboratory, of the California Institute of Technology, at Pasadena. As most readers know, President Millikan is one of the greatest leaders in physical research and in the advance of science and education. On Sunday afternoon he delivered a remarkably valuable and inspiring address on the importance of science to humanity. It was given in the Shrine Temple auditorium, before a very large audience. This address appears in the February issue of *Scribner's Magazine*.

REGISTRATION

Eighteen hundred and eighty persons registered at the Des Moines meeting, but the actual attendance was much larger. The residence distribution of those who registered is shown in the accompanying list. Altogether, about one hundred and ninety scientific

made in dynes per centimeter to 0.1 dyne/cm with the Cenco DuNoüy Precision Tensiometer.

A platinum ring in contact with the liquid under measurement establishes a liquid film of known circular length which is broken by calibrated torsion of a taut wire. The method is open to exact mathematical interpretation throughout and results are capable of excellent duplication.

This direct reading precision model is equipped with vernier scale and temperature compensation device.

IMMUNITY BUILDING

BY FEEDING

Contents of Living Cells

It is fundamental in Biology and Clinical Medicine that the contents of certain cells are specific remedies in the treatment of disease or deficiencies.

Antitoxin from blood cells, pepsin from gastric cells, pituitary extract of gland cells, bacterial vaccine extracts—are known examples.

IT IS NEW THAT—

Extract from Brewers' Yeast cells develops immunity to invasion of pathogenic organisms. Drs. Cowgill and Rose (Yale Univ. Med. Sch.) have shown that infection with B. Welchii was suppressed by feeding Yeast Vitamine-B (Harris).

THESE STUDIES SUGGEST-

YEAST VITAMINE HARRIS TABLETS AND

BREWERS' YEAST-HARRIS (POWDER)

in common infections, of unknown origin, infection of respiratory tract and as "immunity building," following surgical operations.

Brewers' Yeast-Harris contains, richly, the vitamine known as "B"-which

1-Stimulates the appetite for other food.

- 2-Promotes metabolism-cell activity.
- 3—Favors normal gain in body weight.

4-Promotes "immunity" to infection.

ALSO CONTAINS-

Vitamine "P-P" (pellagra-preventive) or known as "G," bearing the name of the late Dr. Goldberger, who discovered the value of Brewers' Yeast (Harris) in the dietary treatment of pellagra.

Brewers' Yeast-Harris is biologically assayed, by the white rat method, offering a yeast of known Vitamine-B content. We also supply Casein and Lactalbumin, highest chemical purity, for researches of precision.
