

The Forest Service also announces the appointment of Horace J. Andrews as senior forest economist, to become regional project leader for the Pacific northwest. Mr. Andrews is a graduate of the University of Michigan and received the M.S. degree in forestry from that institution in 1916. He was formerly employed in the U. S. Forest Service, and later engaged in private forestry work and in teaching at three forest schools. He was closely associated with the development of the Michigan land economic survey, and more recently has been in charge of the divisions of protection and lands in the Michigan department of conservation.

### RADIO TALKS ON SCIENCE IN THE KITCHEN

EACH year since 1925 Mellon Institute of Industrial Research has been giving a series of radio talks, broadcast from the University of Pittsburgh Studio of the Westinghouse Electric & Manufacturing Company's Station KDKA. Each of the five series presented so far has been published in booklet form; three of these publications are really text-books of home economics and, in fact, are being widely used in domestic science courses.

In order to supplement these series of talks, the Mellon Institute has decided to schedule eight radio discourses on "Science in the Kitchen," on the Fridays of February and March, at 5:45 P. M., from the University of Pittsburgh Studio of Station KDKA. They will subsequently be published by the university. In general, the new series will relate to the selection, care and service of foods, and each talk will be given by a research specialist of the institute.

The complete program is as follows:

Date in 1930	Subject	Speaker
Feb. 7	"The Well Planned Kitchen" .....	Dr. Geo. D. Beal
Feb. 14	"The Intelligent Purchasing of Foods" .....	Dr. W. W. Duecker
Feb. 21	"The Care of Food in the Home" .....	Dr. E. W. Morrison
Feb. 28	"Good Proportions of Foods" .....	Dr. G. J. Cox
Mar. 7	"The Uses of Milk in the Home" .....	Dr. L. W. Bass
Mar. 14	"Good Meals by the Young Homemaker" .....	Mr. E. R. Harding
Mar. 21	"Food for Young Children" .....	Dr. R. N. Wenzel
Mar. 28	"School Lunches" .....	Dr. R. F. Beard

### ANNUAL REPORT OF THE YALE SCHOOL OF MEDICINE

TRAINING of physicians and humanitarians, rather than doctor-technicians, is described as the prime ob-

jective of the Yale School of Medicine, in the annual report of Dean M. C. Winternitz to the president and fellows of Yale University. Such an aim is said to necessitate the study of man in his entirety, and great strides in the direction of making this possible were taken during the past year. Of first importance was the formation of the Human Welfare Group, with the Institute of Human Relations as the integrating agent, bringing into close contact various university divisions engaged in the study of individual and social conduct.

Gifts equivalent to \$9,900,000 were obtained by the university during the year to meet financial requirements aggregating \$15,500,000 for the stabilization of the activities of the group. Most of the gifts were designated for the work of the Institute of Human Relations. There was also included, however, the sum of \$2,000,000 for erection of a clinic building and the medical and pediatrics laboratory on the grounds of the New Haven Hospital, and construction of these units is well under way.

During 1929, the Farnam Memorial Building, Lauder Hall and the Brady Memorial Laboratory, on the hospital grounds, were completed at a cost of \$1,250,000, and the Raleigh Fitkin Memorial Pavilion for children, to cost \$600,000, is nearly ready for occupancy.

With this progress in building construction have gone developments which will enable the Yale School of Medicine better to take its part in forwarding the plan for studying man from the mental, social and physical point of view. The work in psychiatry and mental hygiene has been strengthened both by additions of personnel in the fundamental sciences underlying study of the mind, and by adding representatives of the various aspects of treatment and prevention of mental disease. A number of appointments were made following Dr. Winternitz's visit last spring to the European clinics for the study of the central nervous system.

Not only is the mind to be taken into consideration by the Yale School of Medicine in dealing with all its problems of health, but economic and social factors as well, the study of these latter factors to be furthered by cooperation, through the Institute of Human Relations, with the university divisions of the social sciences. Furthermore, the School of Medicine is to devote its attention not alone to the sick in mind and body, but also to the well, with the aim of keeping people from getting sick. The report says:

Not only is the negative side of well-being important, but the positive must also be understood. Furthermore, no one is so efficient that further assistance in one or another direction might not be advantageous. Too long has
