SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the Association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

REPORTS OF THE FOURTH CLEVELAND MEETING OF THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE AND ASSOCIATED SOCIETIES

GENERAL FEATURES

THE fourth Cleveland meeting of the American Association was held from Monday, December 29, 1930, to Saturday, January 3, 1931. This was the eighty-seventh meeting of the association. Earlier Cleveland meetings were in July, 1853 (when the association was only five years old); in August, 1888; and in convocation week, 1912-13. The preliminary announcement of the fourth Cleveland meeting appeared in a special issue of SCIENCE for November 28, 1930, and the general program was published at Cleveland on Monday, December 29. Copies of the program may be secured free from the Washington office of the association.

The sessions for the natural and exact sciences were held mainly in the rooms of Western Reserve University and the Case School of Applied Science. The societies in the field of the social and economic sciences

held their sessions in the hotels. These made their own local arrangements and operated their own registration offices, but the other organizations cooperated cordially with the association in the usual manner. The facilities were excellent and the meeting was successful in every way.

The president for this Cleveland meeting was Thomas H. Morgan, of the California Institute of Technology, eminent zoologist and a leading authority in the field of genetics. The retiring president was Robert A. Millikan, of the California Institute of Technology, leader in physical research and in the scientific education of the public. Dr. Millikan's retiring presidential address was given at the opening session of the meeting, on Monday evening, December 29, before an audience of over 3,000 people that filled the Cleveland Music Hall. Several hundred late comers were unfortunately unable to enter the hall. This

Children Who Run On All Fours

By ALEŠ HRDLIČKA

Curator, Division of Physical Anthropology
U. S. National Museum, Smithsonian Institution

Dr. Hrdlička here reports the results of his long and exhaustive study of animal-life manifestations in the human child, with particular reference to "bear-walking," climbing, sleeping "on all fours," and other apparent atavisms. His book, a pioneer study of an obscure field of child behavior, is based upon almost four hundred cases reported in detail to the author from many parts of the world. In addition to these, he has utilized experience derived from first-hand contact with the phenomena to make interpretations and draw conclusions of obvious interest to anthropologists, physicians, psychologists, and of course, parents.

Illustrated \$5.00

A Scientific Book Club Selection

Flights From Chaos

By HARLOW SHAPLEY

One of the world's leading scientists sets forth his daring conception of order in a universe of apparent chaos. \$2.50

"Dr. Harlow Shapley is an explorer in the large sense of the word. While the rest of us stay put, he is feeling his way through millions of miles and aeons of time. This new book sifts the cloud of witnesses that illumine our sky to plot the all inclusive system which is the world."

Atlantic Monthly Bookshelf.

Science and the Scientific Mind

Selected by LEO E. SAIDLA and WARREN E. GIBBS
What has the scientific method to do with modern culture? Twenty-four answers are given in these essays by noted scientists of the present and recent past, writing charmingly of art, poetry, religion, education, and all else of liberal significance to science. Among the contributors are Millikan, Soddy, Pupin, Haldane, Slosson and Bertrand Russell. \$3.00

Living Africa

A geologist's wanderings

By BAILEY WILLIS

Research Associate,

Carnegie Institute of Washington

Seeking an explanation of the rift valleys in Central Africa, Dr. Willis traveled more than six thousand miles, studying the land and its peoples. "For clarity, easily and pleasantly assimilated information, and for sheer sustaining of interest and charm, read this book." *New York Times.*

Illustrated \$4.00

Coming Soon

Biology in Human Affairs

Edited by EDWARD M. EAST

Bussey Institution for Research in Applied Biology,
Harvard University

A striking survey of the outposts of biological knowledge today. Twelve leading scientists tell the story of what man has done towards discovering the secrets of life and living matter. The contributors include Joseph Jastrow, Hugh S. Cumming, Morris Fishbein, H. M. Parshley, Lewis M. Terman, Donald F. Jones and others.

Probable price \$3.50

Man and the Stars

By HARLAN T. STETSON

Director, Perkins Observatory,
Ohio Wesleyan University

The fascinating story of the heavens told with the accuracy and vigor of the scientist. "Interesting, valuable and stimulating. We recommend the author and his book." *New York Times.*

Illustrated \$2.50

UNDER the imprint of Whittlesey House, the McGraw-Hill Book Company extends its range of publishing to include books of wide popular interest. Nontechnical books by distinguished writers in all the broader fields of general literature will bear the WHITTLESEY HOUSE imprint.

World Minerals and World Politics

By C. K. LEITH

Department of Geology, University of Wisconsin

One of the world's leading authorities on mineral resources discusses in concise terms the international problems created by the geographical distribution of minerals. His work is of signal

importance and timeliness, and comprises a clarifying commentary on a problem of ancient complications that is becoming more and more acute.

FILTRATION

Our registered trademarks represent the guarantee of **HIGH QUALITY** and **UNIFORMITY**.

The Chemist

The ever increasing demands of modern industry necessitate the best equipment for the Chemical Laboratory.

Filter Papers

of high quality and uniformity are indispensable for best results in routine analyses and research.

For more than 50 years, we have specialized in the development and manufacture of filter papers for all laboratory and industrial uses. The experience acquired and knowledge thus gained enable us to meet the exacting needs of the American Chemist. Our continuously increasing sales prove his full satisfaction.

Our Handbook on Filtering Operations

tells you just what grade of paper to use for every filtering requirement. Write for your copy.

BOSTON UNIVERSITY SCHOOL OF MEDICINE

ORGANIZED IN 1873

ANNOUNCEMENT

may be obtained by application to

THE REGISTRAR

80 East Concord Street

Boston

Massachusetts

School of Medicine and Dentistry University of Rochester

Medical School, Strong Memorial Hospital, School of Nursing and Out-Patient Department of the University of Rochester and the Municipal Hospital of the City of Rochester, all under one roof. Medical, Surgical, Obstetric, Pediatric, Dental, Contagious and Neurological patients admitted. Unusual opportunities for school and hospital cooperation in medical and graduate dental teaching.

Admission

Medical candidates must have completed three years of college work with special requirements in chemistry, physics and biology. The entering class will not exceed 50, men and women being admitted on equal terms.

Tuition

Charge for tuition will be \$400 per annum, payable in equal installments at the beginning of each semester.

Use Hoke-Phoenix Controls

for
compressed
gases

Reducing Valves—Needle Valves—

Valvo-Gages—Flo-Gages

Hoke
Micrometric
Control

Use them in every field of science. They save your time and improve your results. They handle all kinds of gases from all kinds of tanks—O₂, H₂, CO₂, compressed air, and a few corrosive gases such as NH₃. Special designs on request. Surprisingly sturdy and inexpensive. Shall we send you one on approval?

When working Pyrex or quartz glass, use a Hoke oxy-gas burner. Several models; large and small. Shall we send you one to try?
