PROFESSOR EINSTEIN AT THE CALIFORNIA INSTITUTE OF TECHNOLOGY

ADDRESSES AT THE DINNER IN HIS HONOR¹

MR. ALLAN C. BALCH, PRESIDENT OF THE
ATHENAEUM:

THIS is a dinner of some two hundred California Institute Associates, held at the Athenaeum, a building designed as a club house and meeting center for three groups of people: First, the staffs of the three adjacent cooperating institutions, the California Institute of Technology, the Mount Wilson Observatory of the Carnegie Institution of Washington and the Henry E. Huntington Library and Art Gallery; second, eastern and foreign scholars who are drawn to this research and educational center for participation in, or some sort of association with, its activities; third, the group of residents of this Southern California community known as the California Institute Associates, who are interested in and promoters

¹ The Athenaeum, California Institute of Technology, January 15, 1931.

of the scientific and scholarly work going on in these institutions.

I wish to call first on Russell H. Ballard, president of the Southern California Edison Company and president, also, of the California Institute Associates.

MR. BALLARD:

Mr. Balch, Professor Einstein and the California Institute Associates:

It is rare good fortune that there is at this moment a conjunction here at the Athenaeum of a large number of the men who have worked as collaborators in the development of those phases of modern knowledge and modern thought to which the guest of honor tonight has made far-reaching contributions. I am going to call the roll, in the order of seniority, of this group of Einstein collaborators here present:

Albert A. Michelson, emeritus director of the Ryer-

FOR PATIENTS
WHO DIET
WISELY
OR
UNWISELY

YEAST VITAMINE-HARRIS PRODUCTS

are Standard Sources of Vitamines-B₁ and B₂

Samples on request

The restricted diet frequently means a restriction of vitamine-B₁ and vitamine-G (B₂) also.

Whether dieting is done wisely, under professional direction, or unwisely, in response to the modern craze for the slim figure, a potent source of vitamines-B₁ and B₂ must be added to prevent partial deficiency.

BREWERS' YEAST-HARRIS

This dry, powdered yeast is pasteurized and will not ferment in the stomach. It keeps indefinitely. The Brewers' Yeast contains more vitamines-B₁ and B₂ than the domestic yeast, used for bread-raising. This is the accepted standard of the U. S. Public Health Service for pellagra-preventive potency. The output is carefully assayed on white rats fed on a deficiency diet, so that you can be sure your patient is receiving an abundance of vitamines-B₁ and B₂ when you specify Brewers' Yeast-Harris (Powder).

YEAST VITAMINE-HARRIS

—(TABLETS)—

When special diet is prescribed for rheumatism, gout, nephritis, diabetes, gastric disorders, or ketogenic treatment of epilepsy; when the patient insists on rapid reduction of weight; when religious belief leads to fasting: Under all these circumstances make sure an adequate quota of vitamines-B₁ and B₂ are supplied by prescribing Yeast Vitamine-Harris, 2 TABLETS THREE TIMES DAILY.

In this way, physiological nutrition and general resistance can be kept up to par under the handicap of a restricted or reducing diet.

BOSTON UNIVERSITY SCHOOL OF MEDICINE

ORGANIZED IN 1873

ANNOUNCEMENT

may be obtained by application to

THE REGISTRAR

80 East Concord Street

Boston

Massachusetts

School of Medicine and Dentistry University of Rochester

Medical School; Strong Memorial Hospital, School of Nursing and Out-Patient Department of the University of Rochester and the Municipal Hospital of the City of Rochester, all under one roof. Medical, Surgical, Obstetric, Pediatric, Dental, Contagious and Neurological patients admitted. Unusual opportunities for school and hospital coöperation in medical and graduate dental teaching.

Admission

Medical candidates must have completed three years of college work with special requirements in chemistry, physics and biology. The entering class will not exceed 50, men and women being admitted on equal terms.

Tuition

Charge for tuition will be \$400 per annum, payable in equal installments at the beginning of each semester.

THE PATHOLOGY OF INTERNAL DISEASES

By WILLIAM BOYD

M.D., M.R.C.P. (Ed.), DIPL. PSYCH., F.R.S.C.
Professor of Pathology in the University of Manitoba;
Pathologist to the Winnipeg General Hospital,
Winnipeg, Canada

*Octavo, 888 pages, with 298 illustrations.
Cloth, \$10.00, net*

Few doctors in difficulty consult a Pathology. This book is different. It is unique in its scope, form, method and usefulness. The practitioner in need of help can turn to it in confidence. It emphasizes pathological physiology as well as morbid anatomy especially in the discussion of the kidneys, pancreas, thyroid and parathyroids. It is an illustrated textbook of internal medicine based on the mechanism of disease.

A MANUAL OF CONTAGIOUS DISEASES

By PHILIP MOEN STIMSON, A.B., M.D.

Associate in Pediatrics, Cornell University Medical College; Attending Physician, Willard Parker Hospital; Chief of Staff, etc.

12mo, 353 pages, with 40 engravings and 2 plates. Limp binding, \$3.75, net

This is a new clinical guide for practitioners, specialists in children's diseases, health officers, school and industrial physicians, internes and nurses. Here in a compact handy manual are concise, comprehensive, definite, sound and helpful instructions for handling all of the more common contagious diseases.

BOOK ANNOUNCEMENT

Wiley's Lectures on Darwinism.
Boston (Badger), 1930, \$2.00.

Darwinism rests upon expeditionary rather than upon experimental results. Its field embraces the chances and mischances attending the outward forms of life. Its selection is based largely upon face-values. The life of organisms is about equally divided between certainty and uncertainty. Some effects follow as surely as the night the day; but none knows what the morrow may bring forth. Darwinism, as interpreted by the author of this book, affords a clue to the uncertainties of competitive existence and points the way out.

THE MICROSCOPE

By SIMON H. GAGE, of Cornell University

JUST PUBLISHED

TAXONOMY of the
FLOWERING PLANTS

By

ARTHUR MONRAD JOHNSON, PH.D.

*Assistant Professor of Botany
University of California at Los Angeles*

HIS is a clear and thorough treatment of the technical characteristics by which flowering plants are arranged into classes, orders, genera, and species. The author is an outstanding authority on the subject, and the book is based upon his long experience in the field and in the classroom.

This volume adapts for purposes of instruction the most practical schemes of classification of the flowering plants that have been proposed by the most eminent scholars. In the main it follows the system of Engler and Prantl, but it incorporates in addition certain very practical features of the systems of Warming-Potter, Wettstein, and Rendle.

The presentation is most simple and direct throughout. Phylogeny is given full recognition, but the main emphasis is given to the student's speedy and easy mastery of the fundamentals so that he can find his way about and do his own phylogenetical thinking.

A very valuable and attractive feature of the book is its wealth of illustrations. These consist of nearly five hundred pen-and-ink drawings which have been made by the author, a skilled artist as well as scientist, over a long period of time almost exclusively from living plants.

A bibliography, and a glossary of botanical terms complete the book which also contains practical suggestions for the guidance of teacher and student.

Royal octavo. Profusely Illustrated. 747 pages
