Statistical Mechanics and the Second Law of Thermodynamics: DR. P. W. BRIDGMAN 419

Obituary:

Charles Sheldon Hastings: PROFESSOR FREDERICK E. BEACH. *Recent Deaths* 428

Scientific Events:

A New Tuberculosis Building at the Pasteur Institute; The X-ray Unit of the Hospital of the University of Michigan; Exhibit of the Philadelphia Mineralogical Society; The American Medical Association; Fellowship Awards in the Sciences at Yale University 430

Scientific Notes and News 433

Discussion:

The Analysis of Electromyograms: DR. H. DAVIS, DR. A. FORBES and L. GARCEAU. *The Pine Forests of Costa Rica*: PAUL C. STANDLEY. *The Soaring of Turkey Buzzards*: PROFESSOR G. S. DODDS. *On the Early History of Platinum*: E. P. C. MEYER 436

Reports:

The Incorporation of Scientific Societies: DR. BURTON E. LIVINGSTON, PROFESSOR JAMES B. OVERTON and DR. WALTER THOMAS 438

Scientific Apparatus and Laboratory Methods:

Apparatus for Determination of CO₂ and O₂ of

Respiration: DR. M. H. HALLER and DR. D. H. ROSE. *Vegetable Peptone Agars for Quantitative Work with Lactobacillus Acidophilus*: DR. FRED M. BACHMANN and PROFESSOR W. D. FROST 439

Special Articles:

Cure of the Cachexia Following Hypophysectomy by Administration of the Growth Hormone: PROFESSOR HERBERT M. EVANS, PROFESSOR KARL F. MEYER, RICHARD PENCHARZ and DR. MIRIAM E. SIMPSON. *The Transformation of Serum Albumin into Serum Globulins*: A. FISCHER. *Periodical Properties of Atomic Nuclei*: G. I. POKROWSKI 442

STATISTICAL MECHANICS AND THE SECOND LAW OF THERMODYNAMICS¹

By DR. P. W. BRIDGMAN

HARVARD UNIVERSITY

ONE thing that has much impressed me in recent conversations with physicists, particularly those of the younger generation, is the frequency of the conviction that it may be possible some day to construct a machine which shall violate the second law of thermodynamics on a scale large enough to be commercially profitable. This constitutes a striking reversal of the attitude of the founders of thermodynamics, Kelvin and Clausius, who postulated the impossibility of perpetual motion of the second kind as a generalization from the uniformly unsuccessful attempts of

the entire human race to realize it. Paradoxically, one very important factor in bringing about this change in attitude is the feeling of better understanding of the second law which the present generation enjoys, and which is largely due to the universal acceptance of the explanation of the second law in statistical terms, for which Gibbs was in so large a degree responsible. Statistical mechanics reduces the second law from a law of ostensibly absolute validity to a statement about high probabilities, leaving open the possibility that once in a great while there may be important violations. Doubtless another most important factor in present scepticism as to the ultimate commercial validity of the second law is the discovery of the importance in many physical phenomena of those fluctuation effects which are demanded by sta-

¹ The Ninth Josiah Willard Gibbs Lecture, delivered at New Orleans, December 29, 1931, under the auspices of the American Mathematical Society, at a joint meeting of the society with the American Physical Society, and Section A of the American Association for the Advancement of Science.

THE WISTAR INSTITUTE BIBLIOGRAPHIC SERVICE

ISSUES AUTHORS' ABSTRACTS

of all papers appearing in the journals listed below prior to publication of the articles in full. By this advance information biologists may familiarize themselves with *contemporary research* in a minimum of time.

Advance Abstract Sheets are issued twice a month, each sheet containing ten or more authors' abstracts. Subscription rate is \$3.00 per year.

Bibliographic Service Cards, following the Advance Abstract Sheets, also are issued twice a month. In addition to the authors' abstracts, the cards provide subject headings and complete bibliographic reference. The cards are convenient for filing and library records. Price, \$5.00 per year.

At regular intervals the authors' abstracts are assembled and published in book form with complete authors' and analytical subject indices. Price, \$5.00 per volume. Liberal discount to subscribers to the Bibliographic Service Cards.

SAFE SURE

SUPER-SENSITIVE

You can turn over constant-temperature responsibility to the **NEW AMINCO Super-Sensitive Relay** and forget about it.

This new vacuum contact relay breaks 1350 Watts on a coil consumption of four milliamperes at six volts. Here is a unit that combines sturdiness, long life and low price with extreme sensitivity. Impervious to dust and dirt, safe where open spark is dangerous, this instrument can be mounted in any position.

Write for Details and Prices TODAY.

AMERICAN INSTRUMENT COMPANY, INC.

774 Girard St., N.W.

Washington, D. C.

Bulletins describing a multitude of laboratory apparatus, devices for testing of oils, rubber, cement, paper, etc., mailed on request.

GASES

Ammonia	Methyl Chloride
Argon	Neon
Butane	Nitrogen
Butylene	Nitrous Oxide
Carbon Dioxide	Oxygen
Ethane	Phosgene
Ethyl Chloride	Propane
Ethylene	Propylene
Helium	Pictets Fluid
Hydrogen Sulphide	Sulphur Dioxide
Hydrogen	Dimethyl
Isobutane	Ether
Methane	Nickel Carbonyl
