FRIDAY, AUGUST 12, 1932

No. 1963

Contributions to the Science of Nutrition: A Tribute to the Life and Work of Max Rubner: THE LATE PROFESSOR GRAHAM LUSK 129

The Total Eclipse of the Sun of August 31, 1932: PROFESSOR FREDERICK SLOCUM 135

Obituary:

Louis Winslow Austin: DR. LYMAN J. BRIGGS.
Dr. Hermann von Wechlinger Schulte, 1876-1932: PROFESSOR NICHOLAS A. MICHELS. Recent Deaths 137

Scientific Events:

The Vienna Academy of Sciences; The Journal of Chemical Physics; The Journal of Parasitology; The International Electrical Congress; The New York Dinner for Delegates to the Genetics and Eugenics Congresses; Officers of the National Research Council 138

Scientific Notes and News 141

Discussion:

Dormancy in Tilia Seeds: PROFESSOR J. NELSON SPAETH. Origin of a Tetraploid Shoot from the Region of a Tumor on Tomato: DR. DONTCHO KOSTOFF and DR. JAMES KENDALL. Photoprinting: DR. GLENN M. HOBBS 143

Scientific Books:

Lenzen on the Nature of Physical Theory: DR. LEIGH PAGE 145

Scientific Apparatus and Laboratory Methods:

A Motor-driven Make-break Stimulus Selector: DR. W. R. BOND. Crystallization of Certain Salts used for the Disintegration of Shales: PROFESSOR I. TOLMACHOFF 146

Special Articles: .

Topographic Similarities between Materials Revealed by Ultra-Violet Light Photomicrography of Living Cells and by Micro-incineration: PROFESSOR GORDON H. SCOTT 148

CONTRIBUTIONS TO THE SCIENCE OF NUTRITION

A TRIBUTE TO THE LIFE AND WORK OF MAX RUBNER¹

By the late Professor GRAHAM LUSK

CORNELL UNIVERSITY MEDICAL COLLEGE

GREAT men are very rare. They are worth knowing. They give impulse and stimulus to lesser men. They make the world more worth while for others to live in because of their presence in it. Max Rubner was the greatest man I ever knew.

He was born in Munich on June 2, 1854, and died recently in Berlin on April 27, 1932, in his seventy-eighth year. Rubner received his early training under Carl Voit in Munich and here he also came to be intimately associated with Pettenkofer. He spent a year with Carl Ludwig at Leipzig, whom he always

held in the highest regard. On the recommendation of Pettenkofer he was appointed to the newly established chair of hygiene at Marburg in 1885, thus becoming full professor in his own right at the age of thirty-one. At Marburg he came in contact with several young professors about his own age: Albrecht Kossel, the biochemist; Hans Horst Meyer, the pharmacologist; and Friedrich von Müller, the internist, all of whom became world leaders in their respective subjects. In 1891 he succeeded Robert Koch as professor of hygiene in Berlin and built a new laboratory of hygiene, a building which he retained for his own department when in 1909 he became professor of physiology as successor to Engleman. This position he held for twenty-five years until, at the age of seventy, he was made emeritus.

¹ An address presented before a general session of the American Association for the Advancement of Science at Syracuse, N. Y., June 23, 1932. Dr. Lusk died following a surgical operation on July 18. An obituary notice by Dr. Eugene F. Du Bois was printed in the issue of SCIENCE for August 5.

L253 QUARTZ SPECTROGRAPH

LITTROW AUTO-COLLIMATING TYPE

L253

THIS type of Spectrograph provides a high resolving power and intensity in the visible and ultra-violet regions. It is particularly recommended for metallurgical research and routine quantitative analysis by the raies ultimate method. Every detail has been carefully designed to give permanent accuracy. The instrument is constructed entirely of metal and is mounted on an iron base two meters long. The metal cover is removable by sections giving easy access to the optical parts. The spectrum is photographed in three sections from 200 to 800 Mu Mu on 10" x 2½" photographic plates. Three plate holders are included.

Complete details sent on request.
