THE ATLANTIC CITY MEETING OF THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE AND ASSOCIATED SOCIETIES

Edited by Dr. BURTON E. LIVINGSTON
GENERAL SECRETARY

THE MEETING IN GENERAL

THE Atlantic City meeting, which opened on Tuesday evening, December 27, and closed on Saturday, December 31, was the ninety-first meeting of the American Association. While not to be accounted among the largest meetings, this meeting was very successful in every way. Never before had the association met in Atlantic City.

Attendance was estimated as above 3,000. Since many of those who attend our meetings neglect to register, not having railway certificates for validation and not requiring either badge or General Program, it is increasingly difficult to secure anything approaching an actual count. Most of the societies that meet with the association are unable to furnish accurate information concerning attendance at their meetings.

The actual registration was 2,066. Of these, 565 came from New York State, 238 were from Pennsylvania, and New Jersey, Massachusetts, the District of Columbia and Maryland sent 178, 177, 172 and 126, respectively. Other states that sent more than 30 were Connecticut (87), Ohio (63), Illinois (44), Virginia (40) and Michigan (34). There were 20 registrants from California, 23 from Maine, 4 from Florida and 2 from Washington. A peculiar aspect of this meeting is illustrated by the fact that only 8 persons registered as from Atlantic City.

This meeting was unusual in the manner of its preparation, for there was no local committee. Local arrangements were made through Mr. A. H. Skean, director of the Atlantic City Convention and Publicity Bureau, for whose very efficient and friendly

School of Medicine and Dentistry University of Rochester

Medical School, Strong Memorial Hospital, School of Nursing and Out-Patient Department of the University of Rochester and the Municipal Hospital of the City of Rochester, all under one roof. Medical, Surgical, Obstetric, Pediatric, Dental, Contagious and Neurological patients admitted. Unusual opportunities for school and hospital coöperation in medical and graduate dental teaching.

Admission

Medical candidates must have completed three years of college work with special requirements in chemistry, physics and biology. The entering class will not exceed 50, men and women being admitted on equal terms.

Tuition

Charge for tuition will be \$400 per annum, payable in equal installments at the beginning of each semester.

may be obtained by application to

THE REGISTRAR

80 East Concord Street

Boston

Massachusetts

Allegany School of Natural History

"The School in the Forest"

Quaker Bridge, New York

Seventh Season—July 5 to Aug. 24, 1933

Registration limited to fifty

Field studies in Botany, Zoology, Geology, Birds

Natural conditions favorable in richness and variety, suitable laboratories and equipment, comfortable living in a stimulating climate, guidance from experienced teachers and investigators.

Sponsored by the Buffalo Society of Natural Sciences, the New York State Museum, and the University of Buffalo (with college credit).

For circulars or registration address

Dr. Robert B. Gordon
Ohio State University
Columbus, Ohio

THE BIOLOGICAL LABORATORY Cold Spring Harbor, Long Island, N. Y.

Investigation—Facilities for research in Physiology, Protozoology, Embryology, and other branches of Zoology; Botany; Biophysics and Biochemistry.

Special equipment for mammalian work.

Opportunities for beginning investigators.

Instruction—Courses in Field Zoology, Physiology, Surgical Methods in Experimental Biology, Endocrinology, Plant Sociology, Bryology. Tuition \$75.

For information address The Biological Laboratory, Cold Spring Harbor, L. I.

Efficiency in Teaching Laboratory Technique

is our **GOAL**

SUBJECTS covered are:

Applied Bacteriology
Exotic Pathology
Clinical Pathology
Serology
Blood Chemistry
Basal Metabolism
Radiology, Electrocardiography
Photomicrography

Write for Catalog and Outline of Courses of Study.

HOLT TEXTS ||| **New and Forthcoming Books** ||| HOLT TEXTS

ELEMENTS OF PHYSICS by C. A. CHANT and E. P. BURTON, of the University of Toronto. This college text has received the benefit of years of teaching experience on the part of its authors. It is simpler and shorter than the usual book. It is clear, logical and unusually teachable.

Ready in the spring

INTRODUCTORY COLLEGE ALGEBRA, *Revised*, by H. L. RIETZ, of the University of Iowa, and A. R. CRATHORNE, of the University of Illinois. For the revised edition, just published, the number of problems has been greatly increased, the introductory section has been extended and simplified, and other changes made to improve the book and bring it up-to-date. An ideal text for the college freshman with only one year of high school algebra. \$1.76

DISSECTION OF THE CAT by JACOB REIGHARD, H. S. JENNINGS and RUSH ELLIOTT. This admirable laboratory manual contains: the "system plan" directions for dissection originally published as an appendix to Reighard and Jeannings' ANATOMY OF THE CAT and now revised; a new manual of regional dissection, by Dr. Elliott; and a summary of muscle innervation. \$1.25. An edition of the ANATOMY OF THE CAT is now available at \$4.00.

MATHEMATICS OF FINANCE, *Revised*, by H. L. RIETZ, A. R. CRATHORNE and J. C. RIETZ. "Is proving very satisfactory. The problems seem well chosen. . . . The idea of including solutions of type problems is exceptionally helpful in illuminating principles ordinarily only with difficulty comprehended."—P. J. Ewart, University of Southern California. \$3.00

—||| Standard Texts |||—

A SURVEY OF PHYSICS by FREDERICK A. SAUNDERS, of Harvard University. "I have found the text a most teachable one. His directness of attack and freshness of viewpoint are engaging." —R. D. Rusk, Mount Holyoke College. \$3.75

OUTLINES OF MODERN BIOLOGY by CHARLES R. PLUNKETT, of New York University. "The book impressed me as the most successful attempt that has been made to give a survey of the entire field of modern biology."—H. S. Jennings, Johns Hopkins University. \$3.75

GENERAL BIOLOGY, *Revised*, by L. L. BURLINGAME, H. HEATH, E. G. MARTIN and G. J. PIERCE, and **GENERAL BIOLOGY LABORATORY MANUAL** by L. L. BURLINGAME, A. C. GIESE and R. E. HUNGATE, of Stanford University. Of the text: "I am very pleased with it both as regards content and direct and clear mode of expression."—H. D. Reed, Cornell University. Of the manual: "I find it better balanced than any of the laboratory manuals of the kind that I have seen."—P. D. Strausbaugh, West Virginia University. \$3.50 and \$1.25

GENERAL CHEMISTRY, *Revised*, by L. B. RICHARDSON, and **LABORATORY MANUAL OF GENERAL CHEMISTRY**, *Revised*, by L. B. RICHARDSON and A. J. SCARLETT, Dartmouth College. "In my opinion the *General Chemistry* is an excellent book and is among the best texts published in the United States. . . . The laboratory manual maintains the standard set by the *General Chemistry*."—W. H. Barnes, McGill University. \$3.50 and \$1.50
