

SCIENCE

VOL. 78

FRIDAY, OCTOBER 20, 1933

No. 2025

The American Association for the Advancement of Science:

<i>The Development of our Knowledge of the Laws of Fluid Mechanics: PROFESSOR W. F. DURAND.....</i>	343
<i>The Seventeenth Annual Meeting of the Pacific Division of the American Association. II: DR. J. MURRAY LUCK.....</i>	352

Scientific Events:

<i>Salaries of Scientific Men working under the British Government; The Ninth International Congress of Pure and Applied Chemistry at Madrid; Co-ordinating Committees of the Railroads and the Science Advisory Board; Section F of the American Association for the Advancement of Science; Recent Deaths</i>	355
<i>Scientific Notes and News</i>	358

Discussion:

<i>More about the Spiral Habit: PROFESSOR WILLIAM SEIFRIZ. Vegetation and Reproduction in the Soybean: DR. STANLEY AUSTIN. Some Suggestions on Demonstration: L. F. PINKUS. American Botany, 1886-1932, as Shown in the Botanical Gazette: PROFESSOR FRANCIS RAMALEY. The First American Laboratory of Physiology: PROFESSOR WALTER B. CANNON</i>	361
---	-----

Scientific Apparatus and Laboratory Methods:

<i>Grasshopper Eggs and the Paraffin Method: DR. ELEANOR H. SLIFER and DR. ROBERT L. KING.</i>	
--	--

Simplified Methods for Micro-incineration of Tissues: DR. R. F. MACLENNAN

366

Special Articles:

<i>Demonstration of the Central Body in the Living Cell: PROFESSOR ALFRED F. HUETTNER and MORRIS RABINOWITZ. A Study of Canned Shrimp with Reference to the Presence of Vitamins A, B and D: MARGARET C. MOORE and PROFESSOR HAL W. MOSELEY. Tomatoes, Berries and Other Crops under Continuous Light in Alaska: DR. GEO. M. DARROW</i>	367
<i>Science News</i>	8

SCIENCE: A Weekly Journal devoted to the Advancement of Science, edited by J. MCKEN CATTELL and published every Friday by

Annual Subscription, \$6.00

Single Copies, 15 Cts.

SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the Association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

THE DEVELOPMENT OF OUR KNOWLEDGE OF THE LAWS OF FLUID MECHANICS¹

By Professor W. F. DURAND

STANFORD UNIVERSITY

IN the absence of special thought on the subject, we are little likely to realize the dependence of our every-day life on the laws of fluid mechanics. Thus the air as a fluid is drawn into and expelled from our lungs in accordance with these laws. Again the blood circulates through our arteries and veins under control of the same laws. The gentle zephyr which cools our face in summer or the hurricane which leaves death and destruction in its path are only the expressions of air moving under the laws of fluid mechanics. The trajectory of a golf ball or of the shell from a 16 inch coast defense rifle are likewise the expression of the laws governing the relative motion under gravity of a solid body in a fluid. So

again the sustentation of the airship or of the airplane or again the need for the expenditure of energy to secure continued movement through the air: these are all expressions in different ways of these same laws. The same is true of the flotation of a ship partially immersed in water and of the need for propulsive machinery and the expenditure of energy in order to insure continued movement.

Again the entire collectivity of the phenomena of lubrication is only a special expression of the laws of fluid mechanics. So likewise are such divergent phenomena as the rapid spread of sugar through a cup of coffee when we use the spoon as a stirrer, and the carriage by the Colorado River of a burden of silt amounting to something like 5 billion cubic feet per year. In fact, the present configuration of the earth's surface, in so far as wind and water erosion

¹ Presidential address at the meeting of the Pacific Division of the American Association for the Advancement of Science, Salt Lake City, June 12, 1933.

THE SCIENTIFIC MONTHLY

EDITED BY J. McKEEN CATTELL

CONTENTS FOR NOVEMBER

ON THE NATURE AND THE LIMITATIONS OF COSMICAL INQUIRIES. PROF. P. W. BRIDGMAN.
 CHARACTERISTIC FEATURES OF MATHEMATICS AND OF ITS HISTORY. PROF. G. A. MILLER.
 THE WORK OF THE BUREAU OF STANDARDS IN ELECTRICITY AND RADIO. E. C. CRITTENDEN.
 HOHOKAM: A CHAPTER IN THE HISTORY OF RED-ON-BUFF CULTURE OF ARIZONA. CARL TRISCHKA.
 ANTHONY VAN LEEUWENHOEK AND HIS MICROSCOPES. PROF. G. H. PARKER.
 A CENTURY OF PROGRESS IN THE CHEMISTRY OF NUTRITION. PROF. H. C. SHERMAN.
 SCIENCE AND NUMEROLOGY. PROF. JOSEPH JASTROW.
 SCIENCE SERVICE RADIO TALKS:
 CHEMISTRY AND RECENT MEDICAL PROGRESS. PROF. JULIUS STIEGLITZ.
 PESTS AWAY FROM HOME. DR. L. O. KUNKEL.
 THE EARLY IRISH RACE. DR. JAMES A. GEARY.
 NOCTURNAL DREAMS. PROF. WARREN C. MIDDLETON.
 "PEARL" FARMING IN JAPAN. DR. W. O. BLANCHARD.
 PROGRESS OF SCIENCE:
The Science Advisory Board; Newly Elected University Presidents; In Honor of William Beaumont; An Electrical Survey of Islands and Continents in Invisible Films on the Surface of Water; Recent Developments in the Study of Chemical Effects of Alpha Particles and Electrons.

CONTENTS FOR SEPTEMBER

THE CALAKMUL EXPEDITION. DR. SYLVANUS G. MORLEY.
 THE PARADOX IN NATURE AND MATHEMATICS. PROF. AUBREY J. KEMPNER.
 GASOLINE AND LUBRICATING OIL. DR. GUSTAV EGLOFF.
 THE RELATIVE NUTRITIVE VALUE OF LAND AND WATER PRODUCTS. DR. D. BREESE JONES.
 LAW AS A SCIENCE. PROF. GEORGE W. GOBLE.
 THE ORIGINS OF THE FOOD PLANTS OF PUERTO RICO. O. W. BARRETT.
 THE EFFECT OF THE MACHINE AGE ON LABOR. SUMNER BOYER ELY.
 SCIENCE SERVICE RADIO TALKS:
 INDIVIDUAL DIFFERENCES IN MENTAL GROWTH. PROF. FRANK N. FREEMAN.
 THE EFFECT OF WORRY ON DIGESTION. DR. A. C. IVY.
 GOLD. SCOTT TURNER.
 THE WORK OF THE BUREAU OF STANDARDS IN LIGHT AND HEAT. DR. CLARENCE A. SKINNER.
 THE PROGRESS OF SCIENCE:
The Morris Arboretum of the University of Pennsylvania; The High Potential Station at New Bedford; Historical Microscopes at the New York Botanical Garden; Summary of the Present Position of our Knowledge of Anterior Pituitary Function.

CONTENTS FOR OCTOBER

THE UNITED STATES BUREAU OF BIOLOGICAL SURVEY. CHIEF PAUL G. REDINGTON.
 WEST INDIAN HURRICANES. DR. MELVILLE T. COOK.
 WAVE TRANSMISSION AS THE BASIS OF NERVE ACTIVITY. DR. A. V. HILL.
 PLANT PATHOLOGY AND THE CONSUMER. DR. NEIL E. STEVENS.
 CAUSALITY IN THE PHYSICAL WORLD. PROF. R. B. LINDSAY.
 THE ATTACK ON THE ATOM. PROF. JOHN ZELENY.
 THE NEW BURDEN ON BEHAVIOR. PROF. G. T. W. PATRICK.
 THE USES AND LIMITATIONS OF THE STATISTICAL METHOD IN THE SOCIAL SCIENCES. PROF. CHARLES A. ELLWOOD.
 PATHOLOGICAL ARSON. PROF. JOHN H. MACEE.
 SCIENCE SERVICE RADIO TALKS:
 A POSSIBLE SOLUTION OF A MAYAN MYSTERY. DR. C. WYTHE COOKE.
 MAN: DUST OR DEITY? PROF. MADISON BENTLEY.
 BETWEEN THE STARS. PROF. OTTO STRUVE.
 THE SCRIPPS INSTITUTION PIER AS A MARINE OBSERVATORY. PROF. WINFRED EMORY ALLEN.
 THE PROGRESS OF SCIENCE:
Richard Willstätter, Willard Gibbs Medalist for 1933; Hydro-Electric Developments in Switzerland; The Use of the Diving Helmet in Biological Study; Epidemic Encephalitis.
