

ZEISS

NEW STAND H

is a large research microscope stand

with the pinion of the fine adjustment in the axis of the inclinable joint, thus assuring a restful position for the manipulating hand. Unintentional pressure on the tube is obviated.

This together with other improvements in design results in exceptional stability of the stand.

Supplied with complete Abbe illuminating apparatus, either centering or non-centering and any of the standard stages.

Wide choice of tubes

such as standard straight wide tube, inclined monocular, inclined binocular, polarising tube.

A copy of micro catalog 488 will be sent upon request.
