

## SIMPLIFIED MICRO-PROJECTION APPARATUS

**Compact—Light Weight—Brilliant Illumination**

**T**HE parts of the instrument are housed in a metal case in such a manner that troublesome adjustments are practically excluded. A special condenser ensures a correct beam of light. The source of light is an arc lamp, which is so arranged that each carbon can be adjusted independently. The position of the arc may be examined on a ground glass in the cover of the housing. The carbons are adjusted by two milled knobs which are coaxial and so arranged that they may be simultaneously worked by one hand.

Price with reversing prisms, but without microscope, including 100 pairs of carbons, for 110 v.D.C. .... \$130.00  
for 110 v.A.C. .... \$141.25

A copy of catalog Micro 451/32 will be sent on request
