THE BODILY EXPRESSION OF HUMAN GROWTH AND WELFARE¹

By Professor T. WINGATE TODD

WESTERN RESERVE UNIVERSITY AND BRUSH FOUNDATION

WITH all the social changes that have swept over us in the past and are scheduled to smite us in the future there are two intensely human traits so entrenched that nothing will ever dislodge them or even rock them in their setting.

The first is the passion for staring. Vision is pre-eminently a sense bound up with spacial dimensions and we can not see clearly unless our eyes are stationary. To say that a mother's eyes rest upon her child or that a lover gazes fondly at his beloved is but simple truth. Staring is natural to the eyes and we indulge it long beyond the days of juvenile rebuke. Whether we actually see anything or not is quite another matter and even if we do see there may be considerable

doubt as to the correctness of the interpretation. Scientists and laymen alike all crave a good look.

Full many a time and oft
Have ye climbed up to walls and battlements,
To towers and windows, yea and chimneytops,
Your infants in your arms, and there have sat
The livelong day with patient expectation
To see Great Pompey pass the streets of
Rome.

The second trait is the fascination of bones. The history of the whole world abounds in pilgrimages to bones. Whether they be the bones of those we have loved or the bones of those we have admired, their resting place is forever set apart, a hallowed spot, the Garden of the Unforgotten. Personality clings to the framework of our mortality. The vision of Ezekiel in

MOSBY BOOKS

Zoethout's TEXTBOOK OF PHYSIOLOGY—Brand New 5th Edition

This book has just come from the press. It clearly reflects the many changes and improvements which now makes it a practically perfect teaching and reading college physiology text.

Zoethout's LABORATORY EXPERIMENTS IN PHYSIOLOGY— 2nd Edition

An excellent manual, the experiments of which cover every general phase of physiology.

Turner's PERSONAL AND COMMUNITY HEALTH—Brand New 4th Edition

Both phases of hygiene are now offered in a completely comprehensive, modern, and *interesting* manner. The new phases of hygiene are included in this excellent book.

White's TEXTBOOK OF GENERAL BIOLOGY

This book can, of course be used where Biology is taught from the general approach. It can also be used where Botany and Zoology are taught separately, because there is as much material offered in one as there is in the other. New and effective presentation.

White's LABORATORY MANUAL OF GENERAL BIOLOGY

Primarily written to accompany the **TEXTBOOK OF GENERAL BIOLOGY**.

McClendon PHYSIOLOGICAL CHEMISTRY—5th Edition

Thoroughly an introductory text for the college level, it is simply written and comprehensive in its scope. There is included a laboratory manual in the book.

There are many teachers who highly recommend the following books for student or personal reference library use:

Macleod's PHYSIOLOGY IN MODERN MEDICINE—New 7th Edition

Gradwohl's CLINICAL LABORATORY METHODS AND DIAGNOSIS—

Brand New Book

Marriott's INFANT NUTRITION—New 2nd Edition

Dodge's MYCOLOGY—Brand New Book

Publications of **THE C. V. MOSBY COMPANY, St. Louis, Missouri**
