If we can take the late Mr. Webster's word for it, superior means—"Surpassing in quality, more excellent, preferable, of higher grade, etc." Those are virtues easy to boast of but difficult to possess. We had knowledge of this fact when the Company started in business fewer than three years ago and set out to make Superior Tubing really superior. The unusual progress we have made in this highly competitive market is not due to friendship nor sentiment—industry wanted better tubing so we are making it. The result is known as Superior Tubing in various metals  $\frac{1}{8}$ " OD and smaller!
