

to be given in honor of the academy by the Eastman School of Music of the University of Rochester.

On Tuesday visits to the Bausch and Lomb Optical Company and the Eastman Kodak Company will be arranged. At the subscription dinner in the evening Dr. E. O. Lawrence, of the University of California, will be awarded the Comstock Prize, which is awarded every five years "to the *bona fide* resident of North America who not less than one year nor more than six years before shall have made in the judgment of the academy the most important discovery or investigation in electricity or magnetism or radiant energy."

#### CELEBRATION OF THE HUNDREDTH ANNIVERSARY OF THE BIRTH OF CHARLES FREDERICK CHANDLER

NATIONAL science organizations will join with Columbia University in a series of events from October 6 to November 4, in celebration of the hundredth anniversary of the birth of Charles Frederick Chandler, father of modern industrial chemistry and the first public health chemist of New York City. Dr. Chandler, a founder of the Columbia School of Mines in 1864 and of the American Chemical Society in 1876, was born on December 6, 1836, and died on August 25, 1925. Professor J. Enrique Zanetti, of the department of chemistry, is chairman of the Chandler Centenary Committee.

The program embraces three Chandler Memorial Lectures, in the fields of chemistry, medicine and public health; the presentation of the Chandler Medal of Columbia University to Dr. John Howard Northrop, of the Rockefeller Institute for Medical Research, and a Chandler centennial dinner at the Waldorf-Astoria. During October a collection of Chandleriana will be exhibited in the Low Memorial Library of Columbia University.

The first of the Chandler Memorial Lectures will be delivered on October 6, at a joint meeting of the university and the New York Section of the American Chemical Society, by Thomas Midgley, Jr., vice-president of the Ethyl Gasoline Corporation, whose subject will be "Man-Made Molecules." Professor Marston Taylor Bogert, of Columbia University, a former president of the American Chemical Society, will preside.

The second lecture, on October 13, will be given by Dean William de B. MacNider, of the University of North Carolina School of Medicine, who will speak on "Certain Recent Developments in Chemistry and their Bearing on Cellular Activity." Dr. William Jay Schieffelin, of New York, a former student of Professor Chandler and honorary president of the School of Pharmacy, of Columbia University, will be chairman.

Dr. Haven Emerson, director of the Institute of

Public Health in the School of Medicine, will be the third lecturer, speaking on October 20 on "New York's First Public Health Chemist." Professor Daniel D. Jackson, head of the department of chemical engineering, will preside. Dr. Emerson was New York Commissioner of Health and president of the Board of Health from 1915 to 1917. Each memorial lecture is scheduled for 8 P. M., and will be preceded by a dinner at the Faculty Club in honor of the lecturer.

The sixteenth award of the Chandler Medal will be made on Wednesday evening, October 27, to Dr. Northrop for "fundamental discoveries concerning bacteria, the constitution of proteins, and the chemistry of digestion." Dr. Northrop will deliver the medal address on "The Chemical Nature and Mode of Formation of Pepsin, Trypsin and Bacteriophage." Dean George B. Pegram, of the Columbia Graduate Faculties, will be chairman of the ceremony, which will be held in 309 Havemeyer Hall, Professor Chandler's old lecture room.

The concluding event will be the Centennial Dinner at the Waldorf-Astoria Hotel, on November 4, at 8 P. M. The speakers will be: Dr. Nicholas Murray Butler; Dr. Willis Rodney Whitney, vice-president of General Electric Company and 1920 Chandler Medalist; and Dean Frank Clifford Whitmore, of the College of Physics and Chemistry of Pennsylvania State College, president-elect of the American Chemical Society.

#### RECENT DEATHS

DR. LEANDER MILLER HOSKINS, who became emeritus professor of applied mathematics at Stanford University in 1925, died on September 8 at the age of seventy-seven years. Dr. Hoskins joined the faculty of the university as assistant professor in 1892, a year after Dr. David Starr Jordan became president of the university.

DR. CHARLES BEACH ATWELL, emeritus professor of botany at Northwestern University, died on September 14 at the age of eighty-two years. Dr. Atwell, a graduate of Syracuse University, joined the faculty of Northwestern University in 1880 and retired in 1928.

DR. HENRY ROBERT MURRAY LANDIS, professor of clinical medicine at the School of Medicine of the University of Pennsylvania and director of the departments of medicine and sociology at the Henry Phipps Institute, known for his work in silicosis, died on September 14 at the age of sixty-five years.

DR. ALFRED JAMES EWART, professor of botany and plant physiology at the University of Melbourne, died on September 13. He was sixty-five years old.
