

J. & J. Fric Research Polarimeter

Recommended for research in all phases of polarimetry. In addition to its fundamental optical and mechanical precision, it is equipped with a light intensity control permitting adjustment to the most favorable degree of brightness. With enclosed scales $-120^{\circ}/0/+120^{\circ}$ circular and $-150^{\circ}/0/+150^{\circ}$ International Sugar Scale, and verniers reading 0.01° circular and 0.10 I.S.S.

**S-70525—POLARIMETER—J.&J. Fric, Research Model,
Variable Sensitivity, 200 mm, Circular and I.S.S. Scales . . . \$575.00**

SOLE AMERICAN AGENTS

*A completely illustrated catalog of all
J.&J. Fric polarimeters and saccharim-
eters will be sent on request.*
