

A MICRO-PROJECTOR FOR ANY MODEL OR MAKE MICROSCOPE

The B & L Model B Micro-Projector is adapted for efficient projection upon a screen from any standard microscope. The horizontal microscope supporting plate with clamps to hold the microscope in proper position is sufficiently large to accommodate any model or make.

An arc lamp that will operate efficiently on either AC or DC insures a brilliant, clear image on the screen.

For general class instruction in microscopy, for use where budgets do not permit individual microscopes for each student, or in cases where available specimens are limited, the B & L Model B Micro-Projector represents an economical and efficient solution to the problem.
