

Improved Ultraviolet Sensitive Plates

EASTMAN SPECTROSCOPIC PLATES, Ultraviolet Sensitive, have recently been improved by the use of a new fluorescent ultraviolet sensitizing layer which has no granular structure. This should result in better definition in the images of spectral lines.

In ordering Eastman Spectroscopic Plates, Ultraviolet Sensitive, the type should be specified and followed by the ultraviolet sensitive designation, for example—*Type I-F, UV. Sensitive.*

For full information about the various Eastman Spectroscopic Plates, write for the free booklet, *Photographic Plates for Use in Spectroscopy and Astronomy—Third Edition.*
