WINCHCOMBE, CHELTENHAM, ENGLAND.

**For Covering Histological
Sections on Slides**

These superior media are inert, high-melting, water-white synthetic resins having many advantages over Canada balsam and gum damar. Clarites have proper refractive indices and adhesion to glass, and will neither become acid nor discolor with age. Clarites are pure, uniform, perfectly transparent, and will not cause stains to fade with age because they are absolutely neutral and remain so.

Clarite and Clarite "X" Resins are available in lumps or ready-to-use solutions.

Send for booklet "Neville Clarite Mounting Media"
