

"WRATTEN LIGHT FILTERS"

NEW, REVISED EDITION

THE SIXTEENTH EDITION of this well-known book, just off the press, contains spectrophotometric and other data concerning the more than one hundred filters that now comprise the Wratten series.

Wratten Light Filters are universally employed in widely separated fields of scientific research. They are made according to rigid standards, for use in

photography, photomicrography, spectroscopy, photometry, and astronomy.

The Sixteenth Edition of the book, *Wratten Light Filters*, is available at dealers in photographic supplies; the price is 50 cents. A booklet containing prices of filters, as well as other information, accompanies each volume and will also be furnished free upon request.

PHENOMENAL SERVICE—ENDURANCE RECORDS NEW DUO-SEAL TWO STAGE VACUUM PUMP

Although smaller than the No. 1405, which has made such remarkable service and endurance records, it has the same internal vane movements and other important mechanical features.

FIVE SPECIAL FEATURES:

1. The proper pump speed is approximately 475 R.P.M., which produces a free air capacity of nineteen liters per minute.
2. Each pump is tested on our certified McLeod gauges to less than 0.1 micron (.0001 mm Hg) and many register less than .07 micron.
3. The mechanical action is unusually quiet for a vacuum pump.
4. The exhaust chamber is arranged for the collection of gases where this is desired.
5. The oil level is visible and the oil can be conveniently drained. Positive oil seal—no oil can back up.

No. 1400B

No. 1400B—DUO-SEAL VACUUM PUMP, Two Stage, Motor driven. Mounted on a cast iron base with $\frac{1}{4}$ H.P. 110 volt A.C. motor and V belt with belt tightening device Each, \$75.00
No. 1400—DUO-SEAL VACUUM PUMP, Two Stage, with pulley but without belt, motor or base Only \$50.00
