

Designed By as well as

Spencer Stereoscopic Microscope No. 25-L

● ●
Inclined binocular body. Large level stage, has flush top, providing for the use of mechanical stage. Inclination joint. Hand rests. Thumb screw permits removing base, so that instrument can be used for examination of opaque objects or surfaces.

For those who use
**STEREOSCOPIC
MICROSCOPES**

-
- When you examine the newest series of Spencer Stereoscopic Microscopes you will find many improvements which are the result of a long co-operative experience with users of this type of equipment.

In addition to their unusual optical qualities—the large field, the hair-line sharpness of the image, the enhanced stereoscopic effect, the ease of vision—these modern instruments possess many mechanical superiorities.

All these optical and mechanical features are described in a booklet which can be obtained by writing Dept. U2.
