

NEW WILEY BOOKS

PHYSICS

By **W. F. G. SWANN**, *Director, Bartol Research Foundation of the Franklin Institute.*

One of the series "The Sciences, A Survey Course for Colleges," edited by Gerald Wendt. This volume presents the broad fundamental laws and concepts underlying all of the various "facts" of physics, without the technicalities. Basic principles of motion, heat, etc., are first established, then their applications in many diverse fields are shown. The style is clear, interesting and scholarly.

PRINCIPLES AND PRACTICE OF CHROMATOGRAPHY

By **L. ZECHMEISTER** and **L. CHOLNOKY**, *California Institute of Technology.*

A discussion of a relatively new method for the separation of organic substances. The book is divided into two parts. Part I gives fundamental principles, the scope of the method, details of the procedure, and a description of the apparatus, adsorbents and solvents that can be used. Part II gives, with full experimental details, the chromatographic separation or purification of representative compounds of every class of compound that has been so treated.

PHYSICAL AND CHEMICAL METHODS OF SUGAR ANALYSIS

By **C. A. BROWNE**, *formerly Chief of the Bureau of Chemistry, U. S. Department of Agriculture*, and **F. W. ZERBAN**, *Chemist in Charge of the New York Sugar Trade Laboratory.*

This book represents an entirely rewritten and revised edition. Part I, on physical and chemical methods, of the former "Handbook of Sugar Analysis" has been greatly expanded and modernized. Part II, the descriptive section of the "Handbook," has been omitted. The main purpose of this edition is to give a clear account of the more important of the newer developments.

METHODS OF CORRELATION ANALYSIS

By **MORDECAI EZEKIEL**, *Economic Adviser to the Secretary of Agriculture.*

This book has been revised and brought up to date. The main changes are not those of general techniques, but rather those of interpretation of the meaning of standard errors, the application of logical limitations to the flexibility of graphic curves, the inclusion of the newer and more rapid methods of calculation, and the presentation of newly developed methods of estimating the reliability of an individual estimate or forecast.

JOHN WILEY & SONS, INC., 440 FOURTH AVENUE, NEW YORK

5000 R. P. M. on D.C.

with underguard No. CT-1055.

with six 15 ml. tubes loaded.

4200 R.P.M. on A.C. with same load.

ADAMS ANGLE CENTRIFUGE

These centrifuges offer important advantages over the conventional units. They utilize the new angle principle—the tubes being suspended at a fixed 52° angle—thus, faster sedimentation is achieved by the shorter distance particles are required to travel . . . creating mass, and reaching the bottom more quickly. When at rest, the tubes remain in the angular position and no stirring up of sediment results.

CT-1000 ADAMS SENIOR SAFETY-HEAD CENTRIFUGE for **SIX** 15 ml. **TUBES**, complete with six round bottom brass shields with rubber cushions and three each graduated and ungraduated taper bottom 15 ml. glass tubes. Without Underguard Each \$52.50

CT-1001 Same as the above but without shields or tubes Each \$49.50

CT-1055 UNDERGUARD for Safety-Head, made of aluminum Each \$ 3.50

Above Centrifuges have universal motors for 110-volt A.C. or D.C. current. They can also be supplied to operate on 220-volt A.C. or D.C. current. Additional charge of \$2.00 is made for 220-volt motors.

Also for MICRO and SEMIMICRO WORK

The above Centrifuges will accommodate six 15 ml. round bottom or taper bottom test tubes. Micro and semimicro tubes (5 ml. to 0.5 ml.) can be accommodated by purchasing extra shields, prices from 50c to 75c each. No adapters are required.

Other ADAMS CENTRIFUGES and laboratory supplies are described in our new Catalog No. 102SC. If you do not already have a copy write for one on your letterhead please.

THE BIRD KYMOGRAPH

This modern, efficient and dependable electrically-driven kymograph is the choice of many leading colleges and research laboratories. Its four speeds range from 2.2 to 270 cm. per minute. The drive is obtained from a shaded pole induction motor requiring a minimum of attention, which assures years of trouble-free operation.

For 110 volt, 60 cycle, alternating current . . . \$56.00

THE MANNING PNEUMOGRAPH

A modification of the original Marey model as recommended by Dr. J. H. Manning, Professor Emeritus of the University of North Carolina School of Medicine. The corrugated rubber tubing greatly increases sensitivity over that obtainable with previous pneumographs. With the Manning pneumograph, excellent respiration records have been obtained from rabbits.
