MICROMETER SLIDES*for accurate linear measurements of short range**fitted with microscope or telescope, numerous applications include—*

VERTICAL, HORIZONTAL, and DEPTH MEASUREMENTS
 MICROMETER FOCUSING USE AS SMALL COORDINATE COMPARATOR

Ranges :

up to 4 inches
 (100 mm.)

**Readings :**

direct to
 .0005 inch (0.01 mm.)
 by vernier to
 .00005 inch (0.001 mm.)

Over forty-five years experience in making precision measuring instruments is incorporated in these slides. Their accuracy and durability have been proven by long use in industrial laboratories, inspection departments, educational institutions, and astronomical observatories throughout the world.

These and other measuring instruments are listed in catalogue M138

IMPROVED KLINE ANTIGEN for PRECIPITATION TESTS FOR SYPHILIS

This improved Antigen is now being produced under an exclusive arrangement with the Mount Sinai Hospital of Cleveland, in whose laboratory the method of preparation was developed.

Far superior in the sero diagnosis of syphilis.

May be used for tests on spinal fluid.

Antigen solution has excellent keeping qualities. Sensitive at low temperatures.

Prices and full information on the antigen and the new simplified compact outfits for these tests sent on request.

Sections on Slides**

These superior media are inert, high-melting, water-white synthetic resins having many advantages over Canada balsam and gum damar. Clarites have proper refractive indices and adhesion to glass, and will neither become acid nor discolor with age. Clarites are pure, uniform, perfectly transparent, and will not cause stains to fade with age because they are absolutely neutral and remain so.

Clarite and Clarite "X" Resins are available in lumps or ready-to-use solutions.

Send for booklet "Neville Clarite Mounting Media"
