**MACHLETT**

VAN SLYKE MANOMETRIC BLOOD GAS APPARATUS & ACCESSORIES

- Equipped with highly accurate extraction chamber
- Smooth running—precision machined eccentric pulley is equipped only with S K F ball bearings
- Universal motor in conjunction with a wide range rheostat affords delicate control of shaking
- All parts mounted on a fully seasoned substantial oak support finished to resist moisture
- Two choices of illumination, incandescent bulbs or fluorescent tubes
- All glass stopcocks precision ground
- Flexible mounting relieves manometer of strain
- All glassware made of Pyrex brand glass

In addition to the regular accessories for the Van Slyke technique such as the modified Hemple pipette, Ostwald-Van Slyke pipettes, combustion chamber, transfer tube, etc., we are also headquarters for the latest Van Slyke-Folch manometric carbon determination apparatus, and special centrifuge-combustion tube of Hoagland for the microdetermination of sulphate and phosphate by the manometric combustion of their organic precipitates. See The Journal of Biological Chemistry, Vol. 136, No. 2, November, 1940, Pages 509-541 and Pages 543-551 same journal.

June Sunlight For Sale

How long are you assured of your present container, which in the past by its nature automatically protected your edible product from the subtle chemical effect of sunlight?

Is it not a fact that the changing world conditions, with their resulting priority ratings, have brought many perishable products within the scope of the chemical effects of sunlight causing rancidity and other destructive changes in food products?

Are you protecting your interests by determining in advance the Light Factor of the product for which you are personally held responsible?

The radiation of Atlas Carbon Arc so closely resembles June sunlight that it has been accepted by the Bureau of Standards, Ontario Research Foundation, and the A.A.T.C.C., and for that reason many thousands of these units are used throughout the world for determining the effect of sunlight on dyed textiles, lithographic inks, and coatings for protective and decorative finishes.

This new field of studying the effect of light on edible products employs the same testing technique used in the above fields, requiring only a special adapter to accommodate test tubes, containers and bottles of sizes and shapes up to 12-oz. that will meet with your requirements.

This Atlas arc is no new gadget, but has been recognized in laboratories throughout the world as the one and only June sun at your beck and call.

As we have assisted the textile, paint and ink chemist over a period of 24 years, permit us to be of service to you at this critical time when minutes count.

It might be profitable to investigate this subject before summertime, which, with its sunlight, may do irreparable harm to your prestige and product.

Comparison of Spectral Range of Atlas Arc and June Sunlight

Spectral Range in Angstrom Units	Percent of Total Radiation	
	June Sunlight: Washington, D. C.	Atlas Arc
2790 to 2900	0.0	0.8
2900 to 3200	2.0	4.1
3200 to 3600	2.8	6.0
3600 to 4800	12.6	14.5
4800 to 6000	21.9	8.0
6000 to 14,000	38.9	14.8
14,000 to 42,000		21.4
42,000 to 120,000		30.4

GUBELMAN CHARTS

CONVENTIONAL PAPER CHARTS OF ALL TYPES
ELECTRICAL & STYLUS RECORDING CHARTS

Today, as never before, chart accuracy and uniformity are of paramount importance in all recording instrument applications. We are prepared to meet the critical needs of the day with our enlarged production capacity and complete facilities to manufacture instrument charts unsurpassed in quality. GUBELMAN CHARTS will meet your specifications.

We sell to the Instrument MAKER exclusively

Many years of specialized experience in the production of charts enable our organization to render an advisory service with regard to chart problems, particularly in connection with new recording methods and mediums called for in the Defense Program. We are ready to serve you and solicit your inquiries.

CAMBRIDGE INSTRUMENTS

FOR USE IN SCIENCE, MEDICINE and INDUSTRY

CAMBRIDGE ELECTRON-RAY pH METER

Sensitive to .005 pH

This instrument provides extreme accuracy. Readings are reproducible to .01 pH. Compact and portable, it operates from any convenient 110 volt A.C. outlet. No waiting for "warm up." Sturdy glass electrode. Electron-Ray null indicator, immune to damage from mismanipulation. Millivolt scale for direct reading of oxidation-reduction potentials. RANGE: 0 to 14 pH and 0 to 1200 millivolts. Write for List 910-ES.

CAMBRIDGE VOLTAMOGRAPH . . . for Polarographic Analysis

Enables rapid chemical analysis of solutions by an electrochemical method. With it, most metals and many acid radicals and organic substances can be determined both qualitatively and quantitatively. Simple to operate, it requires only a small sample for test. At a specific voltage, increase in current indicates the presence of a specific ion and concentration of the ion is determined by the range of this increase. Although ruggedly built for industrial use, its utility for research has not been sacrificed. Send for details.

OTHER CAMBRIDGE INSTRUMENTS INCLUDE

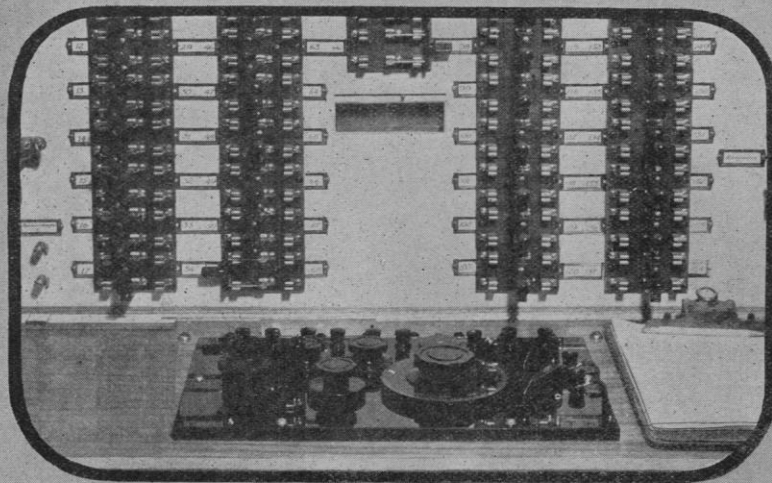

GAS ANALYSIS EQUIPMENT, FABRIC PERMEAMETERS, EWING EXTENSOMETERS, GALVANOMETERS, ELECTROMETERS, VIBROGRAPHS, FLUXMETERS, GEOPHYSICAL SEISMOGRAPHS, ELECTROCARDIOGRAPHS, and many other mechanical and electrical instruments of precision.

Cambridge invites your inquiries on any special instrument problems you may have.

CAMBRIDGE INSTRUMENT CO., Inc.

ANOXIA

Its Effects on the Body

By **EDWARD J. VAN LIERE, M.D.**
West Virginia University

Taking into account the vast amount of research done during the last twenty-five years, the author reviews comprehensively the literature of anoxia. He takes up in detail the effect of anoxia on the blood, heart and circulation, on the blood pressure, lymph and respiration; the chemical changes in the body produced by anoxia; the symptoms and causes of mountain sickness and altitude sickness; acclimatization; the effects of anoxia on the alimentary tract, on the secretion of the kidneys and on the endocrine glands; its effects on oxidative and nitrogen body metabolism, on nutrition, heart regulation and on water distribution of the body. He also examines the effects of anoxia on the nervous system.

Important for physiologists, psychologists,
biological chemists, and doctors.

BLOOMFIELD HILLS, MICHIGAN

"ENRICHED TEACHING of SCIENCE"

*Revised
Edition*

By Woodring, Oakes and Brown

This new, enlarged edition is an invaluable reference work for teachers of general science, biology, physics, chemistry and related fields.

PART I. An annotated bibliography of carefully selected books, pamphlets, posters, etc., helpful in teaching high school science.

PART II. A complete listing of sources and references for Audio-Visual aids, laboratory equipment and supplies, science clubs and other activities.

416 Pages

Cloth

\$3.25

ENCES PURCHASED at liberal prices.

BIOLOGICAL SYMPOSIA

A Series of Volumes devoted to current Symposia in the field of Biology

VOLUME II

Published April, 1941

Foreword by DR. GEORGE A. BAITSELL

I. Speciation

Dr. Leon J. Cole Dr. M. R. Irwin Dr. Ernst Mayr
Dr. Carl L. Hubbs Dr. R. W. Cumley Prof. W. P. Spencer
Dr. Lee R. Dice Prof. Sewall Wright Prof. Th. Dobzhansky

II. The Defense Mechanisms in Plants and Animals

Dr. F. W. Went Dr. W. C. Price Dr. William Bloom

III. The Biological Basis of Social Problems

Dr. Wm. E. Ritter Prof. C. M. Child Dr. F. B. Sumner
Prof. S. J. Holmes Dr. E. B. Copeland

IV. Regeneration

Prof. J. W. Buchanan Dr. W. C. Curtis Dr. Olin Rulon
Dr. Libbie H. Hyman Dr. William Balamuth

280 Pages \$2.50

VOLUME III

Published July, 1941

Edited by DR. WALLACE O. FENN

Muscle

This volume grew out of a symposium on "Muscle" organized by Dr. Fenn at the request of the American Physiological Society for its annual meeting at New Orleans in April, 1940.

Prof. W. O. Fenn Dr. A. Rosenblueth Dr. J. C. Eccles
Dr. R. W. Ramsey Dr. T. P. Feng Dr. B. Katz
Sibyl F. Street Dr. Allan C. Young Dr. S. W. Kuffler
Dr. F. H. Pratt Dr. C. D. Gammon Prof. D. E. S. Brown
Prof. Henry A. Blair Dr. R. L. Masland Prof. H. O. Elftman
Prof. Emil Bozler Dr. A. N. Harvey Dr. Ernst Fischer
Dr. Otto Meyerhof Dr. C. A. G. Wiersma

370 Pages \$3.50

VOLUME IV

Published November, 1941

Foreword by DR. SEWALL WRIGHT

I. Population Problems in Protozoa

Prof. L. L. Woodruff Prof. R. P. Hall Prof. W. Taliaferro
Prof. G. Hutchison Prof. W. H. Johnson Prof. W. C. Allee

II. Theoretical and Practical Aspects of Polyploidy in Crop Plants

Prof. R. E. Clausen Prof. C. L. Huskins Dr. L. F. Randolph
with discussion by with discussion by with discussion by
Dr. H. H. Smith Dr. H. E. Warmke Dr. G. M. Darrow
Dr. S. L. Emsweller and Dr. M. L. Ruttle
with discussion by H. E. White

III. Experimental Control of Development and Differentiation

Dr. G. W. Beadle Dr. E. L. Tatum Dr. A. F. Blakeslee
Prof. B. H. Willier Dr. Kenneth V. Thimann

IV. The Species Concept

Dr. M. H. Hatch Dr. Jens Clausen William M. Hiesey
Joshua L. Baily, Jr. Dr. David D. Keck Robert L. Usinger

302 Pages \$3.00

VOLUME V

Published December, 1941

Edited by DR. HOWARD B. LEWIS

A collection of four biochemical symposia presented at the meetings of The American Society of Biological Chemists at the annual meetings in April, 1941 of The Federation of American Societies for Experimental Biology.

I. Comparative Biochemistry

H. Bradford Vickery Howard B. Lewis W. H. Peterson

II. The Intermediate Metabolism of Fats

Herbert E. Carter Samuel Soskin R. Levine
R. G. Sinclair Herbert E. Longenecker

III. Carbohydrate Metabolism

T. R. Hogness Carl F. Cori Otto Meyerhof
E. A. Evans, Jr.

IV. The Biochemistry of Choline

E. W. McHenry Wendell H. Griffith David Glick
Vincent du Vigneaud

258 Pages \$3.00

THE JAQUES CATTELL PRESS
LANCASTER .: .: PENNSYLVANIA

IN THE BIOLOGICAL SCIENCES**College Zoology—5th Edition**

R. W. Hegner's highly successful basic text and reference now completely up to date. Improved illustrations and 8 color plates.
Mar. \$3.75

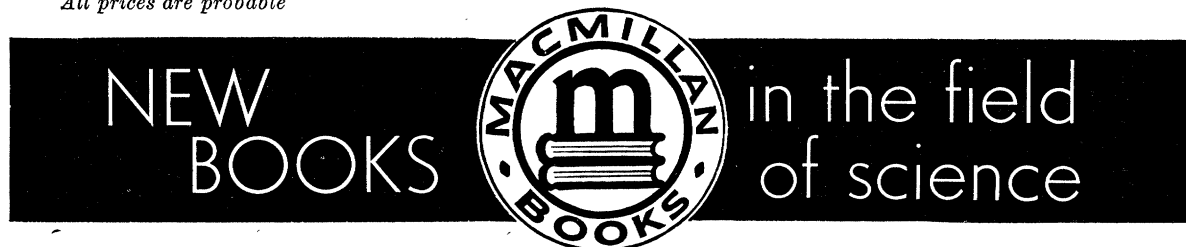

College Entomology

Comprehensive, completely illustrated foundation text by E. O. Essig. Covers the history and biology of the 33 orders of insects.
Jan. \$5.00

Ecological Crop Geography

A new text dealing with the distribution of field crops by Karl H. W. Klages. For courses in Advanced Crop Production, Crop Ecology, etc.
Mar. \$4.50

All prices are probable

**IN THE PHYSICAL SCIENCES****Physics**

A new foundation text by F. L. Robeson simply and clearly written but sufficiently thorough for both engineering and arts students.
Mar. \$4.00

Geomorphology

A comprehensive basic text by O. D. von Engel for courses in Geomorphology and Physiography. The genetic approach is used throughout.
April \$4.50

Physical Science

Professors Ehret, Spock, Schneider, van der Merwe and Wahlert of New York Univ. here provide a rigorous text for the survey course.
Mar. \$3.90

Semi-Micro Qualitative Analysis

A very carefully prepared text by Curtman, author of many well-known chemistry texts.
April \$3.00

The Theory of the Photographic Process

A necessary reference for all interested in photography and the photographic process by the Vice President in charge of research and development, Eastman Kodak Co.—C. E. K. Mees.
April \$12.00

Industrial Chemistry of Colloidal and Amorphous Materials

An authoritative, up-to-date text and reference for colloidal chemistry courses by Lewis, Squires and Broughton.
February \$7.25

A Course of Instruction in the Qualitative Chemical Analysis of Inorganic Substances

The 10th Edition of this well-known standard text by A. A. Noyes has been revised and brought completely up to date by E. H. Swift.
February \$2.75

THE MACMILLAN COMPANY**60 FIFTH AVENUE****NEW YORK**

Recent Wiley Books

Agriculture

Permanent Agriculture

By

Winfield Scott and
J. B. Paul

Both at Iowa State Teachers College, Cedar Falls

A comprehensive, practical textbook in general agriculture. Written from the scientific viewpoint; the treatment is concise, accurate and up to date. 614 pages. \$2.50.

Soils and Fertilizers

By

Firman E. Bear
Rutgers University

A revision of "Soil Management." The book

has been brought up to date, and covers the important phases of soil management with modern concepts and terminology throughout. *Third Edition.* 374 pages. \$3.50.

Statistical Methods

Applied to

Agricultural Economics

By

Frank A. Pearson and
Kenneth R. Bennett

Both at Cornell University

Complete coverage of the field. Chapters are included on the tabular analysis of relationships and on tests of significance with special reference to tabular analysis. 443 pages. \$4.00.

Archaeology

Southwestern Archaeology

By

John C. McGregor
Arizona State Teachers College, Flagstaff
Archaeologist and Curator, Museum of Northern Arizona

An introduction to the subject, covering the aims, principles and methods of archaeology, together with an historical reconstruction of the pre-historic Southwest. 403 pages. \$5.00.

Biological Sciences

Introduction to Vertebrate Embryology

By

Waldo Shumway
University of Illinois

A real comparative embryology, modern in outlook, designed for class use. The book has been extensively rewritten, with increased emphasis on organogeny. *Fourth Edition.* 372 pages. \$4.00.

The Body Functions

By

Ralph W. Gerard
University of Chicago

Organized upon the basic concept of function, this volume offers a sound, thorough, though compact survey of physiology as the basis of the medical sciences. 289 pages. *College Edition*, \$1.75.

Chemistry

Textbook of Quantitative Analysis

By

William T. Hall
Massachusetts Institute of Technology

A widely-used textbook designed for a year's course; the work of an outstanding teacher. Thoroughly revised in this edition. *Third Edition.* 364 pages. \$3.00.

Chemistry

By

Gerald Wendt

A compact treatment, attained by careful selection of those major concepts which provide a simple explanation for complex phenomena, plus their application to practical subjects. 300 pages. *College Edition*, \$1.75.

JOHN WILEY & SONS, INC.

440 Fourth Avenue
New York

Recent Wiley Books

The Glass Electrode

By

Malcolm Dole

Northwestern University

This important volume covers all known facts concerning the glass electrode, except industrial pH meters containing glass electrodes. 332 pages. \$4.50.

The Chemistry of Powder and Explosives

By

Tenney L. Davis

Massachusetts Institute of Technology

An exposition of the modes of behavior of explosive substances and the phenomena, both chemical and physical, which they exhibit. Volume I. 223 pages. \$2.75.

Protective and Decorative Coatings

Volume I

By

Joseph J. Mattiello and
a Staff of Specialists

Twenty-nine chapters on the oils, the resins, drying oils, thinners and solvents, natural minerals and ethers. Volume I of a three-volume treatise. 819 pages. \$6.00.

Physical and Chemical Methods of Sugar Analysis

By

C. A. Browne and
F. W. Zerban

A practical and descriptive treatise for use in research, technical and control laboratories. It gives a clear account of the more important of the newer developments. *Third Edition*. 1353 pages. \$15.00.

Chemical Arithmetic

By

Saul B. Arenson

University of Cincinnati

A companion book to textbooks in general chemistry and an elementary textbook in chemical arithmetic. Stress is laid upon the application of common sense in the solution of problems. *Second Edition*. 130 pages. \$1.50.

Micromethods of Quantitative Organic Elementary Analysis

By

Joseph B. Niederl and
Victor Niederl

Both at New York University

A thoroughly revised second edition, with new chapters on the calibration of weights, the determination of the zero reading, and the use of ordinary analytical balances. *Second Edition*. 347 pages. \$3.50.

A Brief Course in Organic Chemistry

By

Reynold C. Fuson

University of Illinois

Ralph Connor

University of Pennsylvania

Charles C. Price and

H. R. Snyder

Both at the University of Illinois

An elementary textbook and laboratory manual in organic chemistry, for students of agriculture, home economics, veterinary medicine, pre-dentistry, and pre-medicine. 248 pages. \$2.50.

Organic Analytical Reagents

By

John H. Yoe

University of Virginia, and

Landon A. Sarver

American Viscose Corporation

A comprehensive treatise on organic analytical reagents, being probably the first attempt to collect in one volume the data scattered throughout the literature. 339 pages. \$4.00.

pH and Electro Titrations

By

I. M. Kolthoff

University of Minnesota, and

H. A. Laitinen

University of Illinois

Now comprises sections on acid-base indicators and the colorimetric determination of pH, on the potentiometric determination of pH and potentiometric titrations, on conductometric titrations, and on voltammetry (polarography) and amperometric titrations. *Second Edition*. 190 pages. \$3.00.

JOHN WILEY & SONS, INC.

440 Fourth Avenue
New York

Recent Wiley Books

The Chemistry of Pulp and Paper Making

By
Edwin Sutermeister

Gives sufficient details of manufacture to afford chemists a satisfactory understanding of the chemistry involved. Space is given to the more highly specialized analyses. *Third Edition*. 529 pages. \$6.50.

Principles and Practice of Chromatography

By
L. Zechmeister and
L. Chohnoky

Covers fundamental principles, the scope of the method, details of procedure, descriptions of apparatus, and the chromatographic separation of representative compounds. 362 pages. \$5.00.

Identification of Pure Organic Compounds

By
Ernest Hamlin Huntress
Massachusetts Institute of Technology, and
The late Samuel Parsons Mulliken

Tables of data on selected compounds of Order I (compounds of carbon with hydrogen or with hydrogen and oxygen). Includes listings of the characteristics of 1364 compounds. *Volume I*. 691 pages. \$7.50.

Organic Syntheses

Volume 21

Edited by
N. L. Drake

The methods developed during the past year in the preparation of organic chemicals. 120 pages. \$1.75.

Organic Syntheses

Collective Volume I

Edited by
Henry Gilman
Iowa State College
Revised by
A. H. Blatt
Queens College

This revision includes those changes and improvements in procedure and methods which have been developed during the nine years the first edition was on the market. *Second Edition*. 580 pages. \$6.00.

A Textbook of Elementary Qualitative Analysis

By
Carl J. Engelder
University of Pittsburgh

For shorter courses in qualitative analysis. This third revised edition has been rewritten, with changes to bring it up to date and to make it even more teachable. *Third Edition*. 344 pages. \$2.50.

Laboratory Manual of Physical Chemistry

By
Albert W. Davison
Henry S. Van Klooster and
Walter H. Bauer
All at Rensselaer Polytechnic Institute

These features should be particularly noted: the choice of experiments, the concise theoretical treatment, and the practicability of the directions. *Third Edition*. 229 pages. \$2.50.

Earth Sciences

The Pacific Northwest

By
Otis W. Freeman
Eastern Washington College of Education
Howard H. Martin
University of Washington
and 28 contributors

The first comprehensive study of the resources of this region which deals with the geographic bases involved. The book is the work of thirty specialists. 541 pages. \$4.00.

Outlines of Historical Geology

By
Charles Schuchert and
Carl O. Dunbar

A well-organized, authoritative book. In the fourth edition, every chapter presents changes designed to bring the content up to date. *Fourth Edition*. 291 pages. \$2.50.

JOHN WILEY & SONS, INC.

440 Fourth Avenue
New York

Recent Wiley Books

Outlines of Physical Geology

By

Chester R. Longwell
Adolph Knopf and
Richard F. Flint

For one-semester courses in the subject. In this second revised edition, practical aspects are given particular emphasis. *Second Edition.* 381 pages. \$2.75.

Outlines of Geology

By

Chester R. Longwell
Adolph Knopf
Richard F. Flint

Charles Schuchert and
Carl O. Dunbar
All at Yale University

This book presents in one volume a combination of the well-known "Outlines of Physical Geology" and "Outlines of Historical Geology." *Second Edition.* 672 pages. \$4.00.

Dana's Manual of Mineralogy

Revised by

Cornelius S. Hurlbut Jr.
Harvard University

This brief, direct work fills the ordinary needs of the elementary student of mineralogy. It now embodies the most recent information in the subject. *Fifteenth Edition.* 480 pages. \$4.00.

Forestry

Seeding and Planting in the Practice of Forestry

By

The late James W. Toumey and
Clarence F. Korstian
Duke University

This edition includes new data on seed extraction (kiln drying), seed storage, and mechanization of nursery operations. *Third Edition.* 518 pages. \$5.00.

Forestry in Farm Management

By

R. H. Westveld
University of Florida, and
Ralph H. Peck
University of Missouri

A textbook on general principles, designed to show the value of farm forests, how to handle them, and how to convert them into farm assets. 399 pages. \$3.00.

Mathematics

To Discover Mathematics

By

Gaylord M. Merriman
University of Cincinnati

Designed for a survey course for college freshmen, this book is intended to reveal the "utility, philosophy and beauty" of mathematics by means of elementary material. 435 pages. \$3.00.

The Mathematics of Finance

By

L. R. Perkins
Middlebury College, and
R. M. Perkins

For undergraduate students at college level who have a grounding in algebra, this book offers sound, practical means of applying the tools of mathematics to financial computations. 321 pages. \$3.25.

A First Year of College Mathematics

By

Henry J. Miles
University of Illinois

A textbook for a two-semester, freshman course in college mathematics. It includes college algebra, plane trigonometry, and plane and solid analytic geometry. 607 pages. \$3.00.

College Algebra

By

H. P. Pettit and
P. Luteyn
Both at Marquette University

An algebra textbook with a new method of presentation, making for effective teaching. It includes material on permutations and combinations, probability, simultaneous equations, and other important subjects. *Second Edition.* 247 pages. \$1.90.

JOHN WILEY & SONS, INC.

440 Fourth Avenue
New York

Recent Wiley Books

Partial Differential Equations

By

F. H. Miller

Cooper Union Institute of Technology

Planned for students of analysis, geometry and the physical sciences. It presents a thorough treatment of partial differential equations similar to the usual course in ordinary differential equations. 259 pages. \$3.00.

Methods of Correlation Analysis

By

Mordecai Ezekiel

Recent developments in the subject are presented, showing applications, usefulness, and limitations in research and a full description of the technique of correlation analysis. *Second Edition*. 531 pages. \$5.00.

Physics

Physics

By

W. F. G. Swann

Franklin Institute, and

Ira M. Freeman

Central College, Chicago

Presents the broad fundamental laws and concepts underlying all of the various "facts" of physics, without the technicalities. 274 pages. *College Edition*, \$1.75.

An Introduction to Physical Statistics

By

Robert Bruce Lindsay

Brown University

A brief survey of and introduction to all the fundamental methods of statistical technique now in use in physics, with a careful analysis of how they are used. 306 pages. \$3.75.

Applied Science

By

Charles W. Banks

Wentworth Institute

Fundamental principles of physics, mechanics, strength of materials, hydraulics, heat, light, and electricity as applied to practical problems. 212 pages. \$1.75.

A Textbook in Electricity and Magnetism

By

Harry C. Kelly

St. John's College

This book offers an orderly presentation of facts and theories, maintaining a balance be-

tween classical and contemporary electrical science. Designed for the undergraduate student. 356 pages. \$3.75.

Acoustics of Building

By

F. R. Watson

University of Illinois

A rewritten and thoroughly revised edition with new material on the theory of reverberation in rooms, on absorption coefficients, on sound-proof construction, and other subjects. *Third Edition*. 171 pages. \$3.00.

The Identification of Molecular Spectra

By

R. W. B. Pearse and

A. G. Gaydon

A compilation of tables designed to facilitate the identification of molecular spectra. The wavelength region considered is from 10,000 Å to 2,000 Å. 221 pages. \$8.00.

Elliptic Cylinder and Spheroidal Wave Functions

By

J. A. Stratton

P. M. Morse

L. J. Chu and

R. A. Hutner

All at Massachusetts Institute of Technology

Defines certain standard forms of the solution of the wave equation of three important coordinate systems; offers formulas for important mathematical properties of these functions; includes tables from which values of the solutions can be obtained. 127 pages. Paper, \$1.00.

JOHN WILEY & SONS, INC.

440 Fourth Avenue
New York

Recent Wiley Books

Psychology

Unconsciousness

By

James Grier Miller
Harvard University

Summarizes for the first time the clinical and laboratory evidence on unconscious processes and makes a synthetic review and critique of our present knowledge of it. 329 pages. \$3.00.

In Press

An Introduction to the Plant Sciences

By

William C. Darrah
Harvard University

For a one-semester course in botany or plant biology. Its purpose is to present the great biological concepts as they are applied to the interpretation of living plants. Ready in May. Probable price, \$2.50.

Introduction to the Microtechnique of Inorganic Analysis

By

A. A. Benedetti-Pichler
Queens College

Tested experiments to introduce the student to the microtechnique of chemical experimentation. The material includes centigram, milligram, and microgram techniques of qualitative analysis, spot tests, and quantitative microanalysis. Ready in May. Probable price, \$3.50.

X-Ray Crystallography

By

M. J. Buerger
Massachusetts Institute of Technology

The first book to discuss exclusively modern x-ray crystallography. It presents a detailed account of both theory and practice. Ready in March. Probable price, \$6.50.

The Technology of Natural Resins

By

C. L. Mantell
C. W. Kopf
J. L. Curtis and
E. M. Rogers

This book covers the important damar, copal, East India, and related resins from the stand-

point of their properties, their applications, industrial uses, development, and technology. Ready in March. Probable price, \$7.50.

Protective and Decorative Coatings

Volume II

By

Joseph J. Mattiello and
a Staff of Specialists

Covers the classification, chemistry and identification of various pigments, the measurement of particle size of pigments and fillers, metallic powders, and metallic soaps. Volume II of a three-volume treatise. Ready in March. Probable price, \$5.00.

Introductory College Chemistry

By

H. G. Deming and
B. Clifford Hendricks
Both at the University of Nebraska

A well-known elementary textbook now thoroughly revised to include the most modern concepts. A summary and a list of exercises has been included at the end of each chapter. Ready in May. Probable price, \$3.00.

Analytical Chemistry Volume II. Quantitative Analysis

By

F. P. Treadwell
Revised by
William T. Hall
Massachusetts Institute of Technology

A modernized edition of a world-famous book. The order of treatment has been changed, and progresses from Group I to Group V instead of the reverse. Ninth English Edition. Ready in April. Probable price, \$6.00.

By A. A. DOWELL, University of Minnesota, and KNUTE BJORKA, U. S. Department of Agriculture. 534 pages, \$4.00

Soils and Soil Management

By A. F. GUSTAFSON, Cornell University. 424 pages, \$3.00

Factors of Soil Formation

A System of Quantitative Pedology

By HANS JENNY, University of California. 281 pages, \$3.50

Farm Accounting

By D. R. MITCHELL, University of Wisconsin. 231 pages, \$2.50

Drainage and Flood Control Engineering

By G. W. PICKELS, University of Illinois. *Second edition.* 476 pages, \$4.00

The Market-milk Industry

By C. L. ROADHOUSE and J. L. HENDERSON, University of California. 608 pages, \$5.00

Farm Buildings

By J. C. WOOLEY, University of Missouri. 345 pages, \$3.00

AVIATION

Aerophotography and Aerosurveying

By J. W. BAGLEY, Lieut. Col., U. S. Army, Retired; Lecturer at Institute of Geographical Exploration, Harvard University. 324 pages, \$3.50

Aircraft Instruments

By G. E. IRVIN, President, Irvin-Aircraft Instrument Schools. 506 pages, \$5.00

The Aviation Mechanic

By CARL NORCROSS, Managing Editor, *Aviation*, and JAMES D. QUINN, JR., Naval Air Station, Floyd Bennett Field, New York City. 563 pages, \$3.50. Textbook edition, \$3.00

BOTANY

Flowers and Flowering Plants

By R. J. POOL, University of Nebraska. *Second edition.* 428 pages, \$3.50

CHEMISTRY AND CHEMICAL ENGINEERING

Inorganic Chemical Technology

By W. L. BADGER, The Dow Chemical Co., and E. M. BAKER, University of Michigan. *Second edition.* 237 pages, \$2.50

Experimental Physical Chemistry

By FARRINGTON DANIELS, J. H. MATHEWS, and J. W. WILLIAMS, University of Wisconsin. *Third edition.* 460 pages, \$3.50

The Theory of Rate Processes

By SAMUEL GLASSSTONE, K. J. LAIDLER, and HENRY EYRING, Princeton University. 611 pages, \$6.00

Physical Chemistry for Colleges

By E. B. MILLARD, Massachusetts Institute of Technology. *Fifth edition.* 600 pages, \$3.75

Petroleum Refinery Engineering

By W. L. NELSON, University of Tulsa. *Second edition.* 715 pages, \$6.00

Elementary Qualitative Analysis

By J. H. REEDY, University of Illinois. *Third edition.* 150 pages, \$1.50

Introduction to Chemical Thermodynamics

By L. E. STEINER, Oberlin College. 516 pages, \$4.00

Experiments in General Chemistry

By H. W. STONE, M. S. DUNN, and J. D. McCULLOUGH, University of California at Los Angeles. *Third edition.* 277 pages, \$1.60

Thermochemical Calculations

By R. R. WENNER, formerly of Solvay Process Co. 384 pages, \$4.00

Food Analysis

By A. G. WOODMAN, Massachusetts Institute of Technology. *Fourth edition.* 607 pages, \$4.00

ECONOMICS

Elements of Accounting

By R. W. COLEMAN, Carnegie Institute of Technology. 294 pages, \$3.00

Economic Institutions and Cultural Change

By R. A. DIXON, University of Pittsburgh. 529 pages, \$3.00

Public Utility Economics

By C. W. THOMPSON and W. R. SMITH, State University of Iowa. 727 pages, \$4.50

Economic History of the United States

By C. W. WRIGHT, University of Chicago. 1120 pages, \$4.00

FORESTRY

Textbook of Dendrology

By W. M. HARLOW, New York State College of Forestry, and E. S. HARRAR, Duke University. *Second edition.* 542 pages, \$4.50

Cost Control in the Logging Industry

By D. M. MATTHEWS, University of Michigan. 374 pages, \$4.00

GEOLOGY AND GEOGRAPHY

Introduction to Geology

By E. B. BRANSON, University of Missouri, and the late W. A. TARR. *Second edition.* 482 pages, \$3.75

Fourier Series and Boundary Value Problems

By R. V. CHURCHILL, University of Michigan. 206 pages, \$2.50

Mathematics for Engineers

By R. W. DULL, Consulting Engineer. *Second edition.* 780 pages, \$5.00

Mathematical Tables

By H. B. DWIGHT, Massachusetts Institute of Technology. 231 pages, \$2.50

Plane Trigonometry

By L. M. KELLS, W. F. KERN, and J. R. BLAND, U. S. Naval Academy. *Second edition.* 303 pages, \$1.50. With tables, 418 pages, \$2.40

Practical Mathematics

By the late C. I. PALMER; and S. F. BIBB, Illinois Institute of Technology. *Fourth edition.* Part II. Algebra with Applications. 246 pages, \$1.25
Part III. Geometry with Applications. 206 pages, \$1.25
Part IV. Trigonometry and Logarithms. 203 pages, \$1.25

Higher Mathematics for Engineers and Physicists

By I. S. SOKOLNIKOFF, University of Wisconsin, and E. S. SOKOLNIKOFF. *Second edition.* 571 pages, \$4.50

METEOROLOGY

Dynamic Meteorology

By BERNHARD HAURWITZ, Massachusetts Institute of Technology. 365 pages, \$4.00

Introduction to Meteorology

By SVERRE PETTERSEN, Massachusetts Institute of Technology. 230 pages, \$2.50

MISCELLANEOUS

New Handbook of the Heavens

By H. J. BERNHARD, D. A. BENNETT, and H. S. RICE. 299 pages, \$2.50

The Principles of Physical Metallurgy

By G. E. DOAN, Lehigh University, and E. M. MAHLA, E. I. du Pont de Nemours & Co., *Second edition.* 388 pages, \$3.50

Civil Air Defense

A Treatise on the Protection of the Civil Population against Air Attack

By A. M. PRENTIS, Lieut. Col., U. S. Army. 334 pages, \$2.75

Technical Report Writing

By F. H. RHODES, Cornell University. 125 pages, \$1.50

PHYSICS AND ELECTRICAL ENGINEERING

This Physical World

By C. C. CLARK and C. A. JOHNSON, New York University, and L. M. COCKADAY, U. S. Naval Academy. 528 pages, \$3.25

Gaseous Conductors

Theory and Engineering Applications

By J. D. COBINE, Harvard University. 606 pages, \$5.50

Matter, Energy, and Radiation

By J. R. DUNNING and H. C. PAXTON, Columbia University. 668 pages, \$3.50

Fundamentals of Vacuum Tubes

By A. V. EASTMAN, University of Washington. *Second edition.* 583 pages, \$4.50

Fundamentals of Physical Science

By K. B. KRAUSKOPF, Stanford University. 660 pages, \$3.50

Theory of Gaseous Conduction and Electronics

By F. A. MAXFIELD and R. R. BENEDICT, University of Wisconsin. 483 pages, \$4.50

Electronics

By JACOB MILLMAN and SAMUEL SEELEY, College of the City of New York. 721 pages, \$5.00

Principles of Electron Tubes

By H. J. REICH, University of Illinois. 398 pages, \$3.50

Industrial Instruments for Measurement and Control

By T. J. RHODES, The Procter & Gamble Co. 573 pages, \$6.00

Tours through the World of Science

By W. T. SKILLING, San Diego Teachers College. *Revised edition.* 815 pages, \$1.70

Electromagnetic Theory

By J. A. STRATTON, Massachusetts Institute of Technology. 615 pages, \$6.00

Pyrometry

By W. P. WOOD and J. M. CORK, University of Michigan. *Second edition.* 263 pages, \$3.00

ZOOLOGICAL SCIENCES

Embryology of Insects and Myriapods

By O. A. JOHANNSEN and F. H. BUTT, Cornell University. 462 pages, \$5.00

Principles of Animal Biology

By A. F. SHULL, University of Michigan. *Fifth edition.* 417 pages, \$3.50

330 W. 42nd St., New York, N. Y.

OUTLINES of FOOD TECHNOLOGY

by HARRY W. VON LOESECKE
*Senior Chemist, in charge U. S. Citrus
 Products Station,
 Bureau of Agricultural Chemistry and
 Engineering
 U. S. Department of Agriculture, Winter
 Haven, Florida*

Of the many problems facing us to-day, none is more important than the efficient handling of foods for consumption both at home and in England. This book describes concisely and accurately the current practice for preparing all kinds of food products, with emphasis on canning, preserving, and quick-freezing. One of the most immediately important chapters discusses at length the respective merits of the tin can and glass container. Profusely and originally illustrated, this volume will be found not only to fill a vital need, but also to be extremely interesting reading even for those not directly connected with the food industry. Such recent developments as tenderizing of meats by ultraviolet light, vitamin-fortified milk and flour and dehydration of vegetables are described briefly and clearly.

Every one will find something of interest in this book!

505 pages. Price, \$7.00. Ready April 10.

MANUFACTURE of SODA

by TE-PANG HOU
 2nd Edition, revised and enlarged

A shortage of soda ash is imminent. In the near future additional capacity must be provided and the efficiency of the present plant increased. The information contained in this new book is indispensable for those who are, or may be, concerned with the construction, operation and supervision of plants and equipment for this vital industry. Complete, up-to-date, crammed with factual, practical information, this important volume presents:

- the history of the ammonia soda industry;
- full descriptions of all processes of manufacture;
- production details not elsewhere available: plant location, power and mechanical requirements, boiler-room problems, and a host of others;
- complete discussion of every step, from the burning of limestone to quality of final product;
- extensive chemical analyses and mechanical computations;
- a large number of photographs, diagrams and charts.

A "must" book for every technical and industrial library as well as the caustic industries!

610 pages, Price \$9.50, ready March 15.

NEW BOOKS for

THE CONDENSED CHEMICAL DICTIONARY

Compiled and Edited by the
 Editorial Staff of the Chemical Engineering Catalog
 FRANCIS M. TURNER, *Editorial Director*

THIRD EDITION completely revised and enlarged under supervision of
 THOMAS C. GREGORY, *Editor*

Never before in the history of the country has the chemical industry been called upon to furnish products of such diversified kinds and for such a variety of uses as today. Defense production is pleading for new and cheaper materials as substitutes for older materials now unavailable. Executives and technologists are straining every resource to provide these raw materials necessary to keep their plants in production.

The THIRD EDITION has been improved by the addition of 6,000 new items, making a total of over 18,000 items. These new items are made up of chemicals, drugs, raw materials, minerals, alloys including a large number of trade, or brand name products. Whenever necessary the more than 12,000 old items have been brought up-to-date by general or partial revision. The number of so-called chemical specialties has been enormously expanded. All such descriptions have been strictly limited to facts. Many of the new chemicals have just been introduced to the market. No other dictionary contains them.

This edition includes data on the chemical and physical properties of chemicals and raw materials. These data have been taken from three sources: (a) From the technical literature; (b) From the private files of leading chemical manufacturers; (c) From the latest catalogs and from many thousands of descriptions of available commercial grades kindly furnished by manufacturers. When the reader sees these specifications, he knows that the information given represents a description of the product as available commercially. When the description of the product of two manufacturers differs in detail, both descriptions are given. It represents a vast fund of useful, practical data for the buyer, seller, handler, and user of chemicals. The very popular information on shipping regulations for each chemical has been continued and brought up-to-date in line with present practice. Many new cross references have been added so as to assist the reader in quickly locating wanted information and to further clarify the confusion associated with chemicals and their synonyms.

These and many other features which are not enumerated here are all to be found in the THIRD EDITION of "Condensed Chemical Dictionary." One of the notable features of the THIRD EDITION is the inclusion of a survey on effects of wartime on chemical prices.

756 Double Column Pages

Price \$12.00

ANHYDROUS ALUMINUM CHLORIDE IN ORGANIC CHEMISTRY

by CHARLES A. THOMAS
Central Research Director, Monsanto Chemical Company

This volume has been eagerly awaited for some time by all those concerned with the catalysis and isomerization of organic compounds. The reaction of aluminum chloride with hundreds of compounds is discussed in detail; and a feature of the book is the presentation of the exact changes which occur in structure. A resume of the work of Friedel and Crafts, who did the pioneer work in this field, is included. This is indeed a monumental compilation which will be invaluable to research workers in the fields of petroleum, plastics, rubber, synthetic coatings, flotation agents, dyes, fats and waxes, cleaning and dry-cleaning agents, perfumes and textiles. *American Chemical Society Monograph*, 972 pages, \$15.00

Today's Problems!

FATIGUE OF WORKERS

Its Relation to Industrial Production

by The Committee on Work in Industry of the National Research Council
Under the Chairmanship of

DR. L. J. HENDERSON, *Fatigue Laboratory, Harvard University*

In these critical months, when everyone is being urged to work harder and produce more—when our very existence as a nation depends on winning the "Battle of Production"—the results described in this timely book are nothing less than startling! Of special interest to executives, engineers, personnel workers and students of industrial relations, the volume will be welcomed also by the general reader who is bewildered by the labor problems arising from the National Defense Program.

Carried out by a Committee appointed by the National Research Council, the aim of this investigation was to determine the physical and mental reactions of industrial workers to the conditions they are exposed to in their daily work. In an unbiased and objective way, it reveals not only the direct causes of fatigue, but the psychological origin of strikes, slowdowns and voluntary limitation of output by workers. Here are laid bare the underlying reasons for the inharmony which often exists between management and labor, and is reflected in lowered production. The ways in which this can be overcome are clearly indicated.

But it is more than this, for it is a practical discussion of management policies. One whole chapter reviews the management ideas of Chester I. Barnard, of the Bell Telephone System, a typical big employer, and one chapter is devoted to the ideas of H. J. Ruttenberg of the S. W. O. C.—a typical labor leader—on self-expression and labor unions. These findings are of the utmost value today for they may be applied to the problems of national defense.

One of the studies described—the effects of working at high altitudes—is of great practical significance in the training of airplane pilots; another, dealing with the influence of heat, is important in securing maximum of both efficiency and comfort in projects involving prolonged effort at high temperatures. 165 pages, Price \$2.50

WHAT ARE THE VITAMINS?

by WALTER H. EDDY

*Professor Physiological Chemistry, Teachers College, Columbia University,
Director of Good Housekeeping Bureau*

This book has long been wanted—for its dependable, scientific guidance through the hocus-pocus surrounding the subject of Vitamins, straight to the frequently amazing, always-reliable facts. Dr. Eddy, from his own work and from a careful survey of the researches of others in the field of Vitamins, answers your questions. What are the VITAMINS? What do they really do? Which ones do I need? In which of the everyday foods will I find them? How can I determine my own particular requirements? These and hundreds of other questions are straight-forwardly and dependably answered. 247 pages, illustrated, tables, \$2.50

SHING CORPORATION

St., New York, N. Y.

THE ELECTRON MICROSCOPE

by E. F. BURTON

*Head of Department of Physics,
University of Toronto*

and W. H. KOHL

*Development Engineer, Rogers Radio Tubes,
Ltd., Toronto*

Certainly one of the outstanding achievements of science in the last decade is the development of the electron microscope, and its revelations are sure to have a vital part in the future progress of both industry and medicine. Germs and deadly bacteria which could be seen only vaguely in the best ultra-microscope are now clearly visible in magnifications of over 100,000 diameters! This book is a short, clearly written story of the basic principles involved in the electron microscope, copiously illustrated with many original drawings, and also with startling photographs of particles of matter so small that they have been heretofore invisible. Every scientist will want to own this epoch-making volume. 250 pages, Price \$4.50, *Ready March 25.*

EMULSIONS and FOAMS

by SOPHIA BERKMAN and GUSTAV EGLOFF

*Universal Oil Products Company,
Research Laboratories*

This clearly written and well digested review of the present knowledge of the subject assembles and evaluates the recent advances in the technology of these phenomena. The many original diagrams and photomicrographs, effectively conceived and presented, bring home to the reader with unique emphasis the electrostatic forces at work in the phenomena of interfacial tension, phase inversion and film rigidity. 591 pages, illustrated, \$8.50

MODERN PULP and PAPER MAKING

by GEORGE S. WITHAM, SR.

2nd edition, revised and enlarged.

Written from the standpoint of the practical paper maker, this exhaustive description of every phase of paper manufacturing will find wide acceptance throughout the industry. The scope of the first edition has been maintained, and widened to the extent of including all pertinent information relating to recent developments. Many tables of wood-pulp consumption and production, and scores of illustrations of new types of equipment have been added. New methods and processes, such as the recent advances in the newsprint field, are described in detail. Complete specifications for heaters, jordan and Fourdrinier machines are given, as well as discussions of all types of paper, such as bag, writing, book, paperboard, wall paper, tissue, glassine and newsprint.

Both technical and non-technical paper men will welcome the reappearance of this standard work. 700 pages, Price \$6.75

Williams & Wilkins, Including Wm. Wood Books

Adams—BIRTH AND DEVELOPMENT OF GEOLOGICAL SCIENCES

Excellent introductory history, 1938, 511 pages, \$5.00.

Greatest medical classic, reprint, 392 pages, \$3.00.

Allen—SEX AND INTERNAL SECRETIONS

Authoritative endocrinology, 1939, 1382 pages, \$12.00.

Amberson—OUTLINE OF PHYSIOLOGY

Strikingly new presentation, 1939, 419 pages, \$4.00.

Armstrong—AVIATION MEDICINE

Authoritative only text, 1939, 508 pages, \$6.50.

Bailey (Smith)—HISTOLOGY

Standard text, 10th, 1940, edition, 782 pages, \$6.00.

Barr—MODERN MEDICAL THERAPY

Today's best methods told by 106 experts on treatment, 3 vols., 1940, 3781 pages, set \$35.00.

Bergey—MANUAL OF DETERMINATIVE BACTERIOLOGY

Indispensable reference, 5th, 1939, edition, 1043 pages, \$10.00.

Best and Taylor—PHYSIOLOGICAL BASIS OF MEDICAL PRACTICE

Tremendous international success, 2nd edition, 1939, 1888 pages, \$10.00.

Bigger—HANDBOOK OF BACTERIOLOGY

Mainly medical, 5th edition, 1939, 482 pages, \$4.25.

Blacklock and Southwell—HUMAN PARASITOLOGY

Standard guide, 4th edition, 1940, 267 pages, \$4.00.

Brown, Lawrason—STORY OF CLINICAL PULMONARY TUBERCULOSIS

New 1941 history, 380 pages, \$2.75.

Brown, William—PSYCHOLOGY AND PSYCHOTHERAPY

Standard work, 4th edition, 1940, 260 pages, \$4.75.

Cabot and Adams—PHYSICAL DIAGNOSIS

World-famous standard work, 12th, 1938, edition, 868 pages, \$5.00.

Cowdry—PROBLEMS OF AGEING

Biological and medical, 25 collaborators, 1939, 788 pages, \$10.00.

Dorcus and Shaffer—ABNORMAL PSYCHOLOGY

Leading textbook, 2nd, 1939, edition, 492 pages, \$4.00.

Eddy and Dalldorf—THE AVITAMINOSES

New 1941, 2nd edition, latest authoritative information on vitamins and deficiencies, 500 pages, \$4.50.

Frazer—EMBRYOLOGY (Human)

Standard British manual, 2nd edition, 1940, 533 pages, \$9.00.

Grant—METHOD OF ANATOMY

Most modern textbook, 2nd edition, 1940, 816 pages, \$6.00.

Henderson—ADVENTURES IN RESPIRATION

Asphyxiation and Resuscitation, 1938, 322 pages, \$3.00.

Hurst—MEDICAL DISEASES OF WAR

Timely and authoritative, 1941, 336 pages, \$5.50.

Kelser—VETERINARY BACTERIOLOGY

Standard text, 3rd edition, 1938, 653 pages, \$6.00.

Koch—PRACTICAL METHODS IN BIOCHEMISTRY

Companion laboratory manual to Mathews or other texts, 2nd edition, 1937, 311 pages, \$2.25.

Kracke and Parker—CLINICAL PATHOLOGY

Diagnosis plus simplest tests, 2nd edition, 1940, 797 pages, \$6.00.

Mathews—PHYSIOLOGICAL CHEMISTRY

Famous standard text, 6th edition, 1939, 1500 pages, \$8.00.

Monnig—VETERINARY HELMINTHOLOGY

Includes entomology, 2nd edition, 1938, 427 pages, \$9.00.

Muir—BACTERIOLOGICAL ATLAS

2nd edition, 1937, 106 pages, 83 fine color plates, \$5.25.

Ogilvie—PATHOLOGICAL HISTOLOGY

Published 1940, 342 pages, 220 superb photomicrographs in color, \$8.50.

Parsons—FUNDAMENTALS OF BIOCHEMISTRY

Standard short text, 6th edition, 1939, 473 pages, \$3.00.

Parsons—ENGINEERING AND ENGINEERING IN THE RENAISSANCE

Inspiring work, 1939, 680 pages, \$8.00.

Thorpe—BIOCHEMISTRY

Mainly medical, 2nd edition, 1940, 472 pages, \$4.50.

Topley and Wilson—BACTERIOLOGY AND IMMUNITY

World-famous text, 2nd edition, 1936, 1660 pages, \$12.00.

Wadsworth—STANDARD METHODS

N. Y. State Dept. of Health laboratory work, 2nd edition, 1939, 705 pages, \$7.50.

Walshe—DISEASES OF NERVOUS SYSTEM

New plain language text, 1940, 300 pages, \$4.50.

Waksman—HUMUS

Vital problem, 2nd edition, 1938, 540 pages, \$6.50.

Wechsler—MEASUREMENT OF ADULT INTELLIGENCE

New, 1942, edition, great timely importance in military, industrial and educational fields. Replaces incongruous children's tests. Standardized from 7 to 70. Has 260 pages, numerous tables, \$3.50.

Wilson—NEUROLOGY

Monumental masterpiece, 1940, 2 vols., 1900 pages, \$21.00.

Zondek, Bernhard—GENITAL FUNCTIONS

New 1941 endocrinology, Clinical and Experimental Investigations of the Genital Functions and Their Hormonal Regulation, 277 pages, \$4.50.

BELL'S TEXT-BOOK OF PATHOLOGY

A Text-Book of Pathology. Edited by E. T. BELL, M.D., University of Minnesota. Fourth edition. Octavo, 931 pages, illustrated with 431 engravings and 2 colored plates. Cloth, \$9.50, net.

BOYD'S MEDICAL SCIENCE

An Introduction to Medical Science. By WILLIAM BOYD, M.D., F.R.C.P. (Lond.), University of Toronto, Toronto, Canada. Second edition. Octavo, 358 pages, illustrated with 124 engravings. Cloth, \$3.50, net.

COWDRY'S TEXT-BOOK OF HISTOLOGY

A Text-Book of Histology. By E. V. COWDRY, Washington University, St. Louis, Mo. Second edition. Imperial octavo, 600 pages, illustrated with 323 engravings, some in colors. Cloth, \$7.00, net.

CRAIG and FAUST'S PARASITOLOGY

Clinical Parasitology. By CHARLES FRANKLIN CRAIG, M.D., Col. U. S. Army (Retired) and ERNEST CARROLL FAUST, M.A., PH.D., The Tulane University of Louisiana, New Orleans, Louisiana. Second edition. Octavo, 772 pages, illustrated with 244 engravings. Buckram, \$8.50, net.

CRAIG ON PROTOZOAN DISEASES

Laboratory Diagnosis of Protozoan Diseases. By CHARLES FRANKLIN CRAIG, M.D., Col. U. S. Army (Retired). Octavo, 349 pages, illustrated with 54 engravings and 4 colored plates. Cloth, \$4.50, net.

CUSHNY'S PHARMACOLOGY AND THERAPEUTICS

Pharmacology and Therapeutics. Thoroughly revised by C. W. EDMUNDS, M.D., University of Michigan, Ann Arbor, Michigan and J. A. GUNN, M.D., D.Sc., University of Oxford, Oxford, England. Twelfth edition. Octavo, 852 pages, illustrated with 66 engravings. Cloth, \$6.50, net.

EHRICH'S PATHOLOGY

Pathology. For Students and Practitioners of Dentistry. By WILLIAM E. EHRICH, M.D., University of Pennsylvania. Octavo, 509 pages, illustrated with 234 engravings. Cloth, \$5.50, net.

FAUST'S HUMAN HELMINTHOLOGY

Human Helminthology. A Manual for Physicians, Sanitarians and Medical Zoologists. By ERNEST CARROLL FAUST, A.B., M.A., PH.D., Tulane University of Louisiana. Second edition. Octavo, 780 pages, illustrated with 302 engravings. Cloth, \$8.50, net.

KENDALL'S MICROSCOPIC ANATOMY

The Microscopic Anatomy of the Vertebrates. By JAMES I. KENDALL, PH.D., D.Sc., City College, New York City. Second edition. Octavo, 342 pages, illustrated with 197 engravings. Cloth, \$3.75, net.

KNOTT'S VEGETABLE GROWING

Vegetable Growing. By JAMES EDWARD KNOTT, PH.D., University of California. Third edition. 12mo, 356 pages, illustrated with 80 engravings. Cloth, \$3.25, net.

LUCAS ON HUMAN PHYSIOLOGY

Elements of Human Physiology. By MIRIAM SCOTT LUCAS, B.S., PH.D. Octavo, 400 pages, illustrated with 158 engravings, 12 in color. Cloth, \$4.50, net.

LYNN'S ORGANIC CHEMISTRY

Organic Chemistry. With Applications to Pharmacy and Medicine. By ELDIN V. LYNN, PH.D., Massachusetts College of Pharmacy, Boston, Mass. Octavo, 410 pages. Cloth, \$4.50, net.

MCDUGALL ON PLANT ECOLOGY

Plant Ecology. By W. B. MCDUGALL, PH.D. Third edition. Octavo, 285 pages, illustrated with 119 engravings. Cloth, \$3.00, net.

PARK and WILLIAMS' PATHOGENIC MICROÖRGANISMS

Pathogenic Microorganisms. A Practical Manual for Students, Physicians and Health Officers. By the late WILLIAM HALLOCK PARK, M.D., and ANNA WESSELS WILLIAMS, M.D. Eleventh edition. Octavo, 1056 pages, illustrated with 247 engravings and 13 full-page plates. Cloth, \$8.00, net.

SCHAFER'S ESSENTIALS OF HISTOLOGY

Essentials of Histology. Descriptive and Practical for the Use of Students. Edited by H. M. CARLETON, M.A., New College, Oxford. Octavo, 630 pages illustrated with 665 engravings, some in colors, and 2 colored plates. Cloth, \$5.00, net.

WIGGERS' PHYSIOLOGY

Physiology in Health and Disease. By CARL J. WIGGERS, M.D., Western Reserve University, Cleveland, Ohio. Third edition. Octavo, 1144 pages, illustrated with 218 engravings. Cloth \$9.50, net.

Mosby Scientific Texts

MICROBES WHICH HELP OR DESTROY US—

By Paul W. Allen, Ph.D., Professor of Bacteriology and Head of the Department; D. Frank Holtman, Ph.D., Associate Professor of Bacteriology; and Louis Allen McBee, M.S., Formerly Assistant in Bacteriology; All of the University of Tennessee. 540 pages, 102 illustrations, 13 color plates. PRICE, \$3.50

PERSONAL AND COMMUNITY HEALTH—

By Clair E. Turner, Professor of Biology and Public Health, Massachusetts Institute of Technology, Boston, Mass. New 6th Edition. In preparation. About 700 pages, illustrated. PRICE, about \$3.50

TEXTBOOK OF PHYSIOLOGY—

By W. D. Zoethout, Professor of Physiology, Chicago College of Dental Surgery, and W. W. Tuttle, Professor of Physiology, College of Medicine, State University of Iowa. 7th Edition. 743 pages, 302 illustrations. PRICE, \$4.50

TEXTBOOK OF HISTOLOGY—

By Evelyn E. Hewer, Reader in Histology in the University of London. 365 pages, 340 illustrations. PRICE, \$4.50

HISTOLOGICAL TECHNIC—

By Aram A. Krajian, Department of Pathology, Los Angeles General County Hospital, Los Angeles. 272 pages, 44 illustrations, 7 color plates. PRICE, \$3.50

ESSENTIALS OF COLLEGE CHEMISTRY—

By G. H. Whiteford and R. G. Coffin, Professor and Associate Professor of Chemistry, respectively, Colorado State College. 2nd Edition. 534 pages, 32 illustrations. PRICE, \$3.50

ESSENTIALS OF ZOOLOGY—

By George Edwin Potter, Professor of Biology, A. and M. College, College Station, Texas. 432 pages, 204 illustrations. PRICE, \$3.75

HANDBOOK OF COMMUNICABLE DISEASES—

By Franklin H. Top, Director, Division of Communicable Diseases and Epidemiology, Herman Kiefer Hospital and Detroit Department of Health. 682 pages, 73 illustrations, 10 color plates. PRICE, \$7.50

EFFECTIVE LIVING—

By C. E. Turner, Professor of Biology and Public Health, Massachusetts Institute of Technology, and Elizabeth McHose, Director of Physical Education for Girls and Chairman of the Health Council, Senior High School, Reading, Pa. 425 pages, 164 illustrations. PRICE, \$1.90

INTRODUCTION TO ANIMAL BIOLOGY—

By John B. Parker and John J. Clarke, Professor and Assistant Professor of Biology, respectively, Catholic University of America, Washington, D. C. 503 pages, 163 illustrations. PRICE, \$3.75

PRINCIPLES OF GENETICS—

By E. Grace White, Professor of Biology, Wilson College, Chambersburg, Pa. 430 pages, 179 illustrations. PRICE, \$2.50

A TEXTBOOK OF GENERAL BIOLOGY—

By E. Grace White, Professor of Biology, Wilson College, Chambersburg, Pa. 2nd Edition. 667 pages, 336 illustrations. PRICE, \$3.50

METHODS FOR DIAGNOSTIC BACTERIOLOGY—

By Isabelle G. Schaub, Assistant in Bacteriology, Department of Pathology and Bacteriology, Johns Hopkins University School of Medicine, and M. Kathleen Foley, A.B., Bacteriologist in Charge of Diagnostic Bacteriological Laboratory of the Medical Clinic, Johns Hopkins Hospital. 313 pages. PRICE, \$3.00

A TEXTBOOK OF BACTERIOLOGY—

By R. W. Fairbrother, D.Sc., M.D., M.R.C.P., Lecturer in Bacteriology, University of London. 3rd Edition. 452 pages, illustrated. PRICE, \$5.00
