

## Confidence Rides With The Dawn Patrol

**W**HEN the bombers of the Atlantic Patrol thunder into the dawn, their pilots look ahead with confidence—confidence born of faith in their machines and the fuel that drives their motors. American fuels, like American planes, are built to bring back safely those who fly.

Somewhere, in an American refinery, one of America's great army of behind-the-scenes workers, with a Bausch & Lomb Refractometer, is doing his part in making American oils and gasolines so efficient and safely dependable. Modern refractometric methods of control speed refining operations and maintain a greater uniformity and higher quality than ever before.

Here, again, optical science—with Bausch &

Lomb instruments—is at work helping to strengthen America's front lines of defense. Today, American manufacturers—like the nation's forces of defense—turn to precision optical methods for critical analysis, precise measurement, quality control. Bausch & Lomb's Contour Projectors, Metallographic Equipment and microscopes for inspection and control take their place alongside range finders, gun sights and binoculars in contributing to the vital needs of national defense.
