

## HEALTH gets top priority in America's fighting forces

Vigorous health is essential for the men who must attack the enemy and bring victory to the United Nations. In past wars, disease has taken a far greater toll of life than bullets.

Today well equipped government scientific and medical staffs should receive credit for the fact that America's armed forces are better fed, better clothed and in better physical condition than any other army in history.

Almost countless are the tasks given the microscope in these undertakings.

Spencer's greatly increased facilities are breaking all production records in

the race to supply the United Nations with the instruments it so vitally needs.

★ ★ ★

*Optical instruments are so vital to defense that the nation's needs absorb practically all of Spencer's greatly increased production. We are, of course, endeavoring to give our customers the best possible deliveries, but understandable delays and shortages are bound to occur.*
