## The Greatest Health Crusade in History

Health is the first prerequisite of a soldier. Keeping him healthy is an essential ingredient of Victory.

Since World War I medical science has crusaded relentlessly for greater knowledge to insure better health. The success of this crusade is resulting in an army which is far healthier than any in history. Of equal importance is the fact that the nation behind our armed forces is likewise one of the healthiest which the world has ever known.

Today, as for over a century, Spencer Microscopes are playing an important role in both medical progress and ap-

plied medical practice. Greatly increased production facilities are in operation night and day to meet the unprecedented wartime needs for microscopes.

★ ★ ★

*Optical instruments are so vital to defense that the nation's needs absorb practically all of Spencer's greatly increased production. We are, of course, endeavoring to give our customers the best possible deliveries, but understandable delays and shortages are bound to occur.*
