

Officers of the AAAS, 1947

President: HARLOW SHAPLEY, *Harvard University*

President-Elect: E. W. SINNOTT, *Yale University*

Chairman of Executive Committee: JAMES B. CONANT, *Harvard University*

EXECUTIVE COMMITTEE MEMBERS: A. J. Carlson, University of Chicago; Otis W. Caldwell, Boyce Thompson Institute; Fernandus Payne, Indiana University; Walter R. Miles, Yale University; Charles F. Kettering, General Motors Corporation; Kirtley F. Mather, Harvard University; E. C. Stakman, University Farm, St. Paul; Arthur H. Compton, Washington University; G. A. Baitsell, Yale University; and F. R. Moulton, 1515 Massachusetts Avenue, N. W., Washington, D. C.

ADMINISTRATIVE OFFICERS

Forest R. Moulton.....*Administrative Secretary*
John M. Hutzell.....*Assistant Administrative Secretary*
Otis W. Caldwell.....*General Secretary*
William E. Wrather.....*Treasurer*

VICE-PRESIDENTS

Mathematics (A): Robert Lee Moore, University of Texas
Physics (B): Merle A. Tuve, Carnegie Institution of Washington
Chemistry (C): Farrington Daniels, University of Wisconsin
Astronomy (D): Dean B. McLaughlin, University of Michigan
Geology and Geography (E): Marland P. Billings, Harvard University
Zoological Sciences (F): Franz Schrader, Columbia University
Botanical Sciences (G): W. F. Loehwing, State University of Iowa
Anthropology (H): Wilson D. Wallis, University of Minnesota
Psychology (I): Edna Heidbreder, Wellesley College
Social and Economic Sciences (K): Frederick Stephan, Cornell University
History and Philosophy of Science (L): F.S.C. Northrop, Yale University
Engineering (M): Gordon M. Fair, Harvard University
Medical Sciences (N): E. V. Cowdry, Washington University Medical School
Agriculture (O): William H. Alderman, University of Minnesota
Education (Q): W. A. Brownell, Duke University

SECRETARIES

Mathematics (A): Raymond W. Brink, University of Minnesota, Minneapolis, Minnesota
Physics (B): Joseph C. Boyce, New York University, New York City
Chemistry (C): Ed. F. Degering, Purdue University, Lafayette, Indiana
Astronomy (D): Charles C. Wylie, University of Iowa, Iowa City, Iowa
Geology and Geography (E): George W. White, Ohio State University, Columbus, Ohio
Zoological Sciences (F): J. William Buchanan, Northwestern University, Evanston, Illinois
Botanical Sciences (G): George W. Martin, University of Iowa, Iowa City, Iowa
Anthropology (H): Marian W. Smith, Columbia University, New York City
Psychology (I): Harold E. Burt, Ohio State University, Columbus, Ohio
Social and Economic Sciences (K): J. Frederic Dewhurst, Twentieth Century Fund, 330 West 42nd Street, New York City
History and Philosophy of Science (L): Raymond J. Seeger, Bureau of Ordnance, Navy Department, Washington, D. C.
Engineering (M): Frank D. Carvin, Newark College of Engineering, Newark, New Jersey
Medical Sciences (N): Malcolm H. Soule, University of Michigan, Ann Arbor, Michigan
Agriculture (O): Ernest E. DeTurk, University of Illinois, Urbana, Illinois
Education (Q): Dean A. Worcester, University of Nebraska, Lincoln, Nebraska

PACIFIC DIVISION

Thomas G. Thompson.....*President*
University of Washington, Seattle, Washington
Robert C. Miller.....*Secretary*
California Academy of Science, San Francisco, California

Fisher ELECTRO-HEMOMETER

**Eliminates the
Human Factor
in Measuring**

Hemoglobin

**Measures Directly in Grams
per 100 ml. and % of Normal**

The Fisher Electro-Hemometer (Pat. Applied for) is a photo-electric instrument now widely employed for the specific purpose of determining the hemoglobin content of blood. It operates on the well-known acid-hematin method and provides the means of making hemoglobin determinations with a degree of accuracy and reproducibility not possible by ordinary visual means.

This instrument determines hemoglobin directly, both in per cent of normal and in grams per 100 ml. It embodies all the advantages of the photometric method while retaining the simplicity of operation that facilitates rapid use.

With the portable, self-contained Electro-Hemometer, different workers obtain the same results because readings are made directly without calculations and because no human judgment in matching colors is required. The technique of taking and diluting the blood sample is unchanged.

Complete, Compact, Portable Unit

Supplied with the instrument are a Photometric Cell, Standardizing Cell, Diluting Pipette, batteries and printed directions. Simplified instructions for operation are engraved on the panel.

Fisher Electro-Hemometer. \$75.00
(Leather Carrying Case, \$9.00 Additional)

Available along with other modern appliances and reagents from:

New (8th) Edition
RANSON-CLARK'S

ANATOMY *of the* **NERVOUS SYSTEM**

Teacher and student alike will find this the most useable and effective edition of this standard text published to date. This improvement has been gained through a reorganization of the contents and the addition of significant new data. Gross anatomy is now presented early in the text and before functional considerations are discussed. The material on Meninges and Blood Vessels of the Central Nervous System has been placed in chapter three. The chapter on Autonomic Nervous System has been rewritten and throughout the book new facts have been included bringing the subject matter thoroughly up-to-date.

OTHER NEW and REVISED MATERIAL

Wallerian degeneration has been described anew with some interesting points on regeneration of nerves after injury.

Cerebral cortex—localization of areas, and function

Cerebellum—recent work to show some degree of localization of function, etc.

Innervation of choroid plexus

Functional composition of the trigeminal pathways

New data on the cochlear, vestibular and optic nerves

New method of plotting dermatomes by sympathetic ganglionectomy

New classification of thalamic nuclei

By **Stephen W. Ranson, M.D., Ph.D.**, Late Professor of Neurology and Director of the Neurological Institute, Northwestern University Medical School, Chicago. Revised by **Sam Lillard Clark, M.D., Ph.D.**, Professor of Anatomy, Vanderbilt University School of Medicine, Nashville, Tennessee. 532 pages, 6½" x 9¾", with 417 illustrations, some in color.
