THE SCIENTISTS NEWSWEEKLY

President Truman congratulating 10 key scientists for their work in the wartime Office of Scientific Research and Development, January 20. Left to right, seated: James B. Conant, president, Harvard University; the President; and Alfred N. Richards, vice-president, University of Pennsylvania. Standing: Karl T. Compton, president, Massachusetts Institute of Technology; Lewis H. Weed, chairman, Division of Medical Sciences, National Research Council; Vannevar Bush, chairman, new Army-Navy Joint Research and Development Board; Frank B. Jewett, president, National Academy of Sciences; J. C. Hunsaker, Massachusetts Institute of Technology; Roger Adams, University of Illinois; A. Baird Hastings, Harvard University; and A. R. Dochez, Columbia University. Richard C. Tolman, California Institute of Technology, who also received a letter of thanks from President Truman, was not in Washington.

Stokes FREEZE-DRYING Equipment

FOR UNLIMITED PRESERVATION,
WITHOUT REFRIGERATION, OF

- VIRUSES
- PENICILLIN
- STREPTOMYCIN
- VITAMINS
- SERUMS
- AMINO ACIDS
- OTHER BIOLOGICALS, CHEMICALS, PHARMACEUTICALS, AND CHEMOTHERAPEUTICS

Stokes freeze-drying equipment for desiccation from the frozen state helped make possible the development of the Blood Plasma and Penicillin programs. It is in equally successful use for preserving serums and other labile biologicals by Drying by Sublimation* under high vacuum.

Along with the University of Pennsylvania and Sharp and Dohme, Stokes pioneered in developing both the method and the equipment to make freeze-drying commercially practical. Today more than 275 Stokes units are in use in laboratories, hospitals, universities, government

health services and commercial plants in many parts of the world.

Stokes engineers and manufactures complete equipment for the process, from test tube to plant-scale capacity. Facilities and authoritative assistance are available for research, development and application of this process. A complete pilot plant in the Stokes Laboratory is used for tests and demonstrations. Our technical staff invites your consultation.

HOWELL - FULTON'S

TEXT BOOK OF PHYSIOLOGY

A basic text on applied physiology—that's what this book is. All the facts which are directly helpful in the study of this science are included in this work, long one of the World's best on physiology. Edited by JOHN F. FULTON, M.D., Sterling Professor of Physiology, Yale University School of Medicine, with the Collaboration of 10 Other Authorities. 1304 pages, 6" x 9 $\frac{1}{4}$ ", 507 illustrations. \$8.00 *Fifteenth Edition*

Some of the Many Features Responsible for the New Success of this Standard Text

Newer concepts of high altitude physiology and much else that is new in the broad field of aviation medicine.

New work in the field of gastro-intestinal physiology.

The section on basal metabolism is reorganized to include recent disclosures on the part played by endocrines and the central nervous system in the integration of metabolic processes.

Sensory physiology is presented in clinical language, and the large clinical literature on sensory problems is coordinated in terms easily understood by both clinician and physiologist.

A completely rewritten section on muscle and nerve, and largely revised chapters on the central nervous system.

In the completely revamped section on the cardiovascular system, the excitability and conductivity of cardiac muscles are interpreted in the light of modern electrophysiology.

The entire section on the physiology of sex rewritten to keep pace with this rapidly unfolding branch of experimental medicine.

A completely revised discussion of water metabolism and the kidney bringing it into line with current teachings.

CONTENTS

Work of Soviet Biologists: Theoretical Genetics: *N. P. Dubinin*..... 109

Ultrashort Application Time of Penetrating Electrons: A Tool for Sterilization and Preservation of Food in the Raw State:
Arno Brasch and Wolfgang Huber... 112

News and Notes 117

Technical Papers

Differences in Physiological Activity in Brown and White Fat as Revealed by Histochemical Reactions:
Don W. Fawcett..... 123

High-Efficiency Counting of Long-lived Radioactive Carbon as CO₂: *Warren W. Miller*..... 123

Effect of Flavonols on the Bacteriostatic Action of Dicoumarol: *Joseph Naghski, Michael J. Copley, and James F. Couch*..... 125

The Production of Experimental Pellagra by Adenine: *Sigwin B. Raska*..... 126

Elasticity of the Aortic Wall: *Allen L. King*..... 127

Undifferentiated Growth of Orchid Embryos on Media Containing Barbiturates: *John T. Curtis*..... 128

The Inhibitory Effect of Sodium Dodecyl Sulfate Upon the Gastric Secretory Response to Histamine:
Harry Shay, S. A. Komarov, and Herman Siplet..... 128

In the Laboratory

An Apparatus for the Quantitative Separation of Volatile Substances by Fractionation and Distillation:
W. Riley McGaughan and S. C. Werch..... 130

Stability of Penicillin in Glycerin and in Glycols:
R. J. Ferlauto and H. A. Clymer..... 130

A Simplified Method of Preparing Active Extracts of B-Glucuronidase: *William H. Fishman and Paul Talalay*..... 131

Frequency Analysis of Electroencephalograms:
Frederic A. Gibbs and A. M. Grass..... 132

Book Reviews

Science, liberty and peace: Aldous Huxley.
Reviewed by *R. T. Cox*..... 134

Butalastic polymers: their preparations and applications. A treatise on synthetic rubbers: Frederick Marchionna.
Reviewed by *H. L. Trumbull*..... 135

The production of tobacco: Wightman W. Garner.

Science, a weekly journal, is published each Friday by the American Association for the Advancement of Science at Mt. Royal & Guilford Avenues, Baltimore 2, Maryland. Founded in 1880, it has been since 1900 the official publication of the AAAS. Editorial, Advertising, and Circulation Offices, 1515 Massachusetts Avenue, N.W., Washington 5, D. C. Telephone, EXecutive 6060 or 6061.

Articles offered for publication should be sent to the Editor, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Membership correspondence for the AAAS should be sent to the Administrative Secretary, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Change of address. Four weeks notice required for change of address. When ordering a change, please furnish an address stencil label from a recent issue. Address changes can be made only if the old as well as the new address is supplied.

Annual subscription, \$7.50; single copies, \$.25; foreign postage (outside the Pan-American Union), \$1.00 extra; Canadian postage, \$.50 extra. Remittances and orders for subscriptions and for single copies, notices of changes of address, and claims for missing numbers should be sent to the Circulation Department.

Entered as second-class matter July 18, 1923, at the postoffice at Lancaster, Pennsylvania, under the act of March 3, 1879. Re-entered as second-class mailing matter under the act of March 3, 1879, January 17, 1947, at Baltimore, Maryland.
