TUNNEL CLAMP

FOR HOSPITAL AND LABORATORY

Rate of infusion accurately controlled

One-half the actual size

Delicate adjustment of flow in intravascular infusions is afforded by the Shannon-Bradley device for compressing the rubber tube over a relatively long segment. It has proved of special value where extremely slow input is required (e.g. 1 to 2 cc. per minute) for long periods, as in *penicillin* administration.

The material is brass, heavily nickered, permitting sterilization. Compression plate is assured steady contact with adjusting screw by springs acting on the two guide-pins, and the removable sliding cover is so flanged as to resist deformation of the casing during compression. A side-rod is provided for fixation to a rigid upright by means of our Heavy Clamp, or similar device for firm attachment.

FROBISHER'S FUNDAMENTALS of BACTERIOLOGY

Dr. Frobisher's text is one of those books that satisfies equally well the preferences of teachers and students alike. It contributes in a practical manner to improved student development through its many excellent features.

One of these—favored by teachers—is Dr. Frobisher's thorough coverage and evaluation of phases of the study of current significance. For example, he discusses the uses, theoretical implications and future possibilities of radio-active carbon in studies of metabolism. The interest in electron microscopy is adequately satisfied as is that in rickettsial diseases, diphtheria, antibiotics and microbiological assay of vitamins.

398 excellent illustrations are placed advantageously throughout the text bringing added clarification to those discussions of more intricate character.

By MARTIN FROBISHER, JR., S.B., Sc.D., F.A.A.S., F.A.P.H.A., Associate Professor in Bacteriology, The Johns Hopkins University. 824 pages, 5½" x 7½" with 398 illustrations. \$4.00. *Third Edition.*

McCLUNG'S BACTERIOLOGY LABORATORY MANUAL

This manual offers the instructor a laboratory program readily adaptable to individual needs or desires. It is composed of 61 tested experiments and four appendices giving miscellaneous data of importance. Each experiment is complete in itself thus permitting it to be worked into the course as required.

By L. S. McCLUNG, Ph.D., Associate Professor of Bacteriology, Indiana University. 115 pages, 8½" x 11". \$1.25.

LABORATORY MANUAL for GENERAL BACTERIOLOGY

Actual teaching experience has demonstrated the value of this manual. Covering both the morphological and physiological aspects of the study, it makes plain the gross differences of various types of microorganisms.

By THE DEPARTMENT OF BACTERIOLOGY AND IMMUNOLOGY, University of Minnesota. 54 pages, 8" x 11", of experiments, with 54 pages for recording results. Illustrated. Wire-O-Binding, \$1.00

(Cover Photo by Bachrach.)

Science, a weekly journal, is published each Friday by the American Association for the Advancement of Science at Mt. Royal & Guilford Avenues, Baltimore 2, Maryland. Founded in 1880, it has been since 1900 the official publication of the AAAS. Editorial, Advertising, and Circulation Offices, 1515 Massachusetts Avenue, N.W., Washington 5, D. C. Telephone, EXecutive 6060 or 6061.

Articles offered for publication should be sent to the Editor, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Membership correspondence for the AAAS should be sent to the Administrative Secretary, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Change of address. Four weeks notice required for change of address. When ordering a change, please furnish an address stencil label from a recent issue. Address changes can be made only if the old as well as the new address is supplied.

Annual subscription, \$7.50; single copies, \$.25; foreign postage (outside the Pan-American Union), \$1.00 extra, Canadian postage, \$.50 extra. Remittances and orders for subscriptions and for single copies, notices of changes of address, and claims for missing numbers should be sent to the Circulation Department.

Entered as second-class matter July 18, 1923, at the postoffice at Lancaster, Pennsylvania, under the act of March 3, 1879. Re-entered as second-class mailing matter under the act of March 3, 1879, January 17, 1947, at Baltimore, Maryland.
