THE SCIENTISTS NEWSWEEKLY

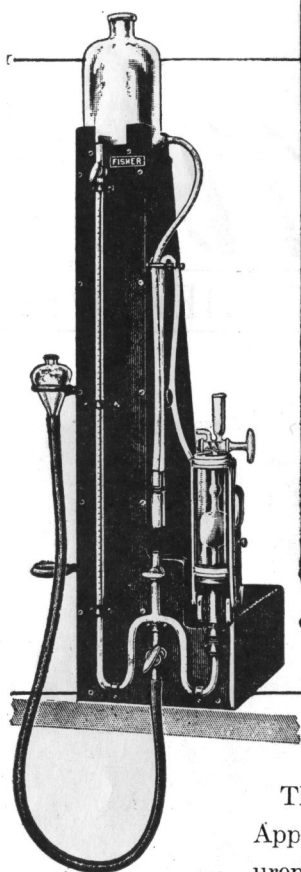

Three officers of the newly formed Inter-Society Committee for a National Science Foundation. Left to right: Harlow Shapley, president, AAAS vice-Chairman; Edmund E. Day, president, Cornell University, chairman; and Dael Wolfe, executive secretary, American Psychological Association, secretary-treasurer (*Science*, February 28). The entire Executive Committee met in Washington on March 5. President Day testified before the Committee on Interstate and Foreign Commerce of the House of Representatives on March 6, explaining the position of the new group with respect to the proposed legislation before Congress (*News and Notes*).

VAN SLYKE MANOMETRIC *Blood Gas* APPARATUS

★
Eliminates Pressure as a
Factor • Incorporates Precise
Workmanship • Suitable
for Micro Determinations

• FISHER-E&A IMPROVED MODEL. •

The Fisher-E.&A. Improved Model, Van Slyke Manometric Apparatus is recommended particularly for rapid, accurate measurements of blood gases. It is also suitable for measurements in any determination where the final product is a gas or in which the final product will enter into a quantitative reaction producing a gas.

This apparatus is carefully designed to relieve strain on the glassware and avoid leaks at the rubber connections. The reaction pipette and water jacket are firmly held to a cast aluminum bracket which, in turn, is agitated by an electric motor.

The manometer is graduated from 0 to 640 mm., and is mounted over a narrow, illuminated slit on the front panel. The apparatus is supplied at \$230.00, complete with wooden and glass parts as illustrated, also motor and lamp for use with 110 volt, 60 cycle A.C.

The New (5th) Edition of

AREY'S DEVELOPMENTAL ANATOMY

Educators have acclaimed the clarity and authority of Dr. Arey's great text since it was first published—more than twenty years ago. Now today in its *New (5th) Edition* it is unsurpassed in holding student interest. Many new illustrations have been added, bringing the total number to nearly 1400. There are entirely new chapters on reproductive cycles and their hormonal control; and on the fundamental concepts and problems of experimental embryology. Of special interest are the new discussions of growth and histogenesis, maturation, cleavage and gastrulation, human embryos and their membranes, and placentation.

By **LESLIE BRAINERD AREY, Ph.D., Sc.D., LL.D.**, Robert Laughlin Rea Professor of Anatomy, Northwestern University. 616 pages, 6½" x 9¾", with nearly 1400 illustrations on 590 figures, many in colors. \$7.00

and

The Eighth Edition of

WILLIAMS' PERSONAL HYGIENE APPLIED

Dr. Williams' aim . . . to apply personal hygiene to everyday living . . . has resulted in a text that is at once readable, dependable and helpful. The specific health advice offered the student in this *Eighth Edition* meets every modern educational standard in this field. There is a simpler, more concise chapter on the nervous system, and a fuller, more scientific treatment of the subject of reproduction. Up-to-date material is given on aerosols, blood banks and blood fractionation. Many new human interest photographs and excellent drawings have been added to more effectively illustrate the anatomical background of the discussion.

By **JESSE FEIRING WILLIAMS, M.D., Sc.D.**, Emeritus Professor of Physical Education, Teachers College, Columbia University. 564 pages, 5½" x 7-¾", illustrated. \$2.50

Science, a weekly journal, is published each Friday by the American Association for the Advancement of Science at Mt. Royal & Guilford Avenues, Baltimore 2, Maryland. Founded in 1880, it has been since 1900 the official publication of the AAAS. Editorial, Advertising, and Circulation Offices, 1515 Massachusetts Avenue, N.W., Washington 5, D. C. Telephone, EXecutive 6060 or 6061.

Articles offered for publication should be sent to the Editor, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Membership correspondence for the AAAS should be sent to the Administrative Secretary, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Change of address. Four weeks notice required for change of address. When ordering a change, please furnish an address stencil label from a recent issue. Address changes can be made only if the old as well as the new address is supplied.

Annual subscription, \$7.50; single copies, \$.25; foreign postage (outside the Pan-American Union), \$1.00 extra, Canadian postage, \$.50 extra. Remittances and orders for subscriptions and for single copies, notices of changes of address, and claims for missing numbers should be sent to the Circulation Department.

Entered as second-class matter January 17, 1947, at the postoffice at Baltimore, Maryland, under the act of March 3, 1879.
