LITHOGRAPHED IN SIX COLORS

No. 4854.

The aid of the cyclotron and betatron in atomic research during the war, and the confirmation of atomic theory in the development of the atomic bomb, has greatly stimulated research and public interest. This revision of our

Atomic Chart, under the direction of Dr. W. F. Meggers Chief Spectroscopy Section, National Bureau of Standards, insures up-to-the-minute coverage of the radio active section of the chart and of the whole field of atomic information.

Biochemistry Books . . . Each with Special Appeal

Harrow's Textbook of Biochemistry

New (4th) Edition—As a text and as a reference, this book is recognized to be one of the finest presentations of its kind in print. It is devoted to a clear-cut description of biochemical fundamentals with particular emphasis on application.

From Introduction on through each succeeding chapter and finally the complete and informative Index, this is a closely knit coverage of the subject. Having been so recently revised, the latest advances are included, as for example: Results of work with radioactive isotopes, new facts concerning foods, important developments in vitamins and vitamin assay, new data on the blood, the sulfonamides and antibiotics, and on hormones.

By BENJAMIN HARROW, Ph.D., Professor of Chemistry, City College, College of the City of New York. 592 pages, 6" x 9", 144 illustrations. \$4.25

Cantarow & Trumper's Clinical Biochemistry

Third Edition—This is *not* a book of biochemical tests. On the contrary, it is a book of interpretations—the clinical meaning of the findings of tests. As such, it is of great significance to physicians, medical students, laboratory and research workers, and pathologists.

Being the joint presentation of a clinician and a biochemist, excellent balance prevails in all chapters. It is definitely a practical book pointed specifically at effecting more exact diagnosis of disease and more objective therapeutic measures.

Abounds with useful information such as a tabular listing of Normal Clinical Standards and an Outline of Chemical Abnormalities in Various Disorders.

By ABRAHAM CANTAROW, M.D., Professor of Physiological Chemistry, Jefferson Medical College; and Max Trumper, Ph.D., Lt. Comdr., H(S), USNR, formerly in charge of Biochemistry Laboratories, Jefferson Medical College and Hospital. 647 pages, 6" x 9", illustrated. \$6.50

CONTENTS

A National Science Foundation—Testimony in the Congress:

William C. Foster 297

James B. Conant 299

Vannevar Bush 302

Programs for Medicine and National Health in the USSR: *Stuart Mudd* . . 306

News and Notes 310

Technical Papers

Antiseptic Action of Glycerite of Hydrogen Peroxide on
Mycobacterium tuberculosis (var. *hominis*):
Ethan Allan Brown and L. W. Slanetz 312

Depletion of Vitamin A Reserves in the Livers of Cattle:
Paul R. Frey and Rue Jensen 313

Thromboplastic Properties of Penicillin and Strepto-
mycin: *David I. Macht* 313

Activity of Protein Synthesis by the Intestine:
Felix Friedberg 314

Lipoid Substance in the Cells of Proximal Convolved
Tubules of the Kidneys of Young Rats on a Choline-
deficient Diet: *W. Stanley Hartroft and C. H. Best* . . . 315

Quick Decline of Orange Trees—A Virus Disease:
J. M. Wallace and H. S. Fawcett 315

A Quantitative Study of the Complement-Hemolysin
Relation: *John F. Kent* 316

Reduction in the Vital Capacity of Asthmatic Subjects
Following Exposure to Aerosolized Pollen Extracts:
Francis C. Lowell and Irving W. Schiller 317

In the Laboratory

A Method for Reclaiming Dried Zoological Specimens:
Harley J. Van Cleave and Jean A. Ross 318

Vacuum Infiltration as a Method for Determining
Enzymic Activity *in Vivo*: *G. Krotkov* 318

Action of Subtilin in Reducing Infection by a Seed-
borne Pathogen: *J. J. Goodman and A. W. Henry* . . . 320

Science, a weekly journal, is published each Friday by the American Association for the Advancement of Science at Mt. Royal & Guilford Avenues, Baltimore 2, Maryland. Founded in 1880, it has been since 1900 the official publication of the AAAS. Editorial, Advertising, and Circulation Offices, 1515 Massachusetts Avenue, N.W., Washington 5, D. C. Telephone, EXecutive 6060 or 6061

Articles offered for publication should be sent to the Editor, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Membership correspondence for the AAAS should be sent to the Administrative Secretary, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Change of address. Four weeks notice required for change of address. When ordering a change, please furnish an address stencil label from a recent issue. Address changes can be made only if the old as well as the new address is supplied.

Annual subscription, \$7.50; single copies, \$25; foreign postage (outside the Pan-American Union), \$1.00 extra; **Canadian postage, \$5.00 extra.** Remittances and orders for subscriptions and for single copies, notice of changes of address, and claims for missing numbers should be sent to the Circulation Department.

Entered as second-class matter January 17, 1947, at the postoffice at Baltimore, Maryland, under the act of March 3, 1879.
